QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

LONDON: PUBLISHED BY HIS MAJESTY'S STATIONERY OFFICE.
To be purchased either directly or through any Bookseller, from
E. PONSONBY, LTD., 116, GRAFTON STREET, DUBLIN; or
WYMAN & SONS, LIMITED, FETTER LANE, E.C.; or
OLIVER & BOYD, TWEEDDALE COURT, EDINBURGH.

PRINTED BY ALEXANDER THOM & CO., LIMITED, ABBEY STREET, DUBLIN.

Price One Shilling.

Marriages:—OCTOBER, NOVEMBER, DECEMBER, 1911. **Births and Deaths:**—JANUARY, FEBRUARY, MARCH, 1912.

During the quarter ended 31st March last, there were registered in the 827 Registrars' Districts in Ireland 26,426 births—a number equal to an annual birth-rate of 24·2 in every 1,000 of the estimated population*—and 21,365 deaths, representing an annual rate of 19·5 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,667 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·4 in every 1,000 of the estimated population, and the death-rate 15·8 per 1,000.

The birth-rate in Ireland for the quarter is 0·5 above the average rate for the corresponding quarter of the ten years, 1902–1911, and 0·6 above the rate for the first quarter of 1911. The deaths are 545 above those registered in the corresponding quarter of 1911; the death-rate is 0·4 above the rate for that quarter, but 0·7 below the average for the first quarter of the ten years, 1902–1911.

Compared with those for the corresponding quarter of 1911, the returns of pauperism furnished by the Local Government Board show a decrease of 541 in the average number of Workhouse inmates on Saturdays during the quarter, but an increase of 726 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years, 1902–1911, the number of Workhouse inmates shows a decrease of 5,419, and the number of persons on out-door relief shows a decrease of 15,898, the total under both heads being 20·8 per cent. under the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·4 per cent.

* See page 64.

The annual marriage-rate (5·1 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1911 is 0·3 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st December, 1911, and by the BIRTHS and DEATHS registered in the Quarter ended 31st March, 1912.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year, Census 1911 (unrevised figures); those for Antrim and Down according to the Census of 1901, and those for the provinces and remaining counties on the population according to the Census of 1911 (unrevised figures). See note (*) page 1.

† Exclusive of Belfast Co. Borough.

MARRIAGES.

The Marriages (5,570) registered in Ireland during the fourth quarter of 1911 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being 0·3 above the rate for the corresponding quarter of 1910, and 0·3 above the average rate for the fourth quarter of the ten years 1901–1910. Of the total number of marriages, 3,659 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,911 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·5 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·7 per 1,000 of the members of all other religious persuasions. The rate under each heading is 0·3 above the average rate for the corresponding quarter of the previous ten years.

Of the 23,600 marriages registered last year, 7,234 were registered in the first quarter, 5,554 in the second, 5,242 in the third and 5,570 in the fourth.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years 1901–1911, and the average number for the ten years 1901–1910.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 26,426—13,490 boys and 12,936 girls—being equal to an annual ratio of 1 in every 41.4, or 24.2 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1902–11, was 26,009, equivalent to an annual rate of 23.7 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24.2 per 1,000 of the population according to the Census of 1911; Munster, 23.6; Ulster, 24.4; and Connaught, 24.4.

The highest county or county borough birth-rate* is 31.8 for Dublin county borough, and the lowest 18.8 for Tipperary, N.R. Of the intermediate rates the highest five are—Belfast county borough, 29.2; Mayo, 26.1; Kerry, 26.0; Limerick county and county borough, 25.4, and Donegal, 25.1. The lowest five are—Wicklow, 19.0; Dublin county, 19.3; King's County, 19.7; Monaghan, 19.8; and Meath, 20.4.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 21,365—10,595 males and 10,770 females—affording an annual ratio of 1 in every 51.2, or 19.5 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1902–11, was 20.2 per 1,000.

The death-rate in Leinster was 21.5 per 1,000 of the population according to the Census of 1911; in Munster, 17.6; in Ulster, 20.5; and in Connaught, 16.5.

The county or county borough death-rates* range from 13.7 in Kerry, to 28.3 in Dublin county borough. Between these rates the lowest five are—Mayo, 16.2; Kildare, 16.5; Galway, 16.5; Leitrim, 16.6; and Wicklow, 16.6; and the highest five are—Belfast county borough, 24.2; Queen's County, 23.7; Monaghan, 22.0; Armagh, 21.1; and Kilkenny, 20.7.

See note () on page 2.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1902–1911, and the average number for that period; also the number registered during the first quarter of the year 1912 :—

1912,	24·2	—	—	—	—	19·5	—	—	—	—

AGES.—Of the 21,365 deaths registered last quarter, 2,777, or 13·0 per cent., were of infants under one year of age ; and 9,059, or 42·4 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 105·1 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 14·3 per cent. of the total deaths registered therein ; in Munster, 11·1 per cent. ; in Ulster, 14·2 per cent. ; and in Connaught, 9·2 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 36·5 per cent. ; in Munster, to 45·7 per cent. ; in Ulster, to 41·3 per cent. ; and in Connaught, to 54·6 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 907, and is equivalent to an annual rate of 0·83 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the March quarter of 1912, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1907–1911.

Name of Disease.	Number of Deaths in March quarter, 1912.	Average number of Deaths in March quarter of the 5 years, 1907–1911.
Enteric Fever,	64	81
Typhus,	14	15
Small-pox,	—	—
Measles,	97	151
Scarlet Fever,	65	37
Whooping-cough,	353	296
Diphtheria,	105	93

* See note (†) on page 9.

ENTERIC FEVER.—The deaths from enteric fever, 64, are below the average, 81. In each of the 3 preceding quarters such deaths were 52, 86 and 99. Of the total deaths, 13 belonged to Dublin county borough, and 6 to each of the following:—Cork county and county borough, County Kerry, County Down and County Tyrone.

TYPHUS.—There were 14 deaths from typhus registered for the whole of Ireland during the period under notice. These deaths belonged to the following unions:—one to Belfast, one to Cavan, 2 to South Dublin, one to Killala, 5 to Listol, one to Middleton, one to Mount Bellew, one to New Ross, and one to Oughterard. The deaths are one under the average for the corresponding period in the 5 years, 1907-11.

SMALL-POX.—There was no record of mortality from small-pox during the quarter, nor did any notification of the incidence of the disease in Ireland reach this office.

MEASLES.—The number of deaths from measles, 97, is below the average, 151, the former figure corresponding to an annual mortality of 0·09 per 1,000 of the population of Ireland estimated to the middle of the year 1912. In the Abstract, page 18, it may be seen that of the total deaths, 83 belonged to the Province of Leinster; of this figure, 28 belonged to the County of Dublin, and 40 to Dublin county borough; of the former figure, 15 deaths belonged to the Registrar's district of Bray No. 2, and 10 to the urban district of Kingstown.

SCARLET FEVER.—Unlike the diseases already mentioned the mortality from scarlet fever, 65, is an increase over the average, 37. In the June quarter of 1911 deaths from scarlet fever numbered 61; this fell to 47 in the September quarter of that year and rose to 100 in the December quarter. Of the deaths, 16, or just 25 per cent. belonged to the county borough of Dublin, and 3 belonged to Donnybrook.

WHOOPING-COUGH.—As was the case with scarlet fever, the mortality from whooping-cough shows a considerable increase over the average, the former figure being 353 and the latter 296. The 353 deaths are equivalent to an annual rate of 0·32 per 1,000 of the estimated population. Of the total deaths, 253 belonged to Ulster, and of this figure 152 belonged to Belfast county borough; and of 70 deaths registered in Leinster, 35 belonged to the county borough of Dublin.

DIPHTHERIA.—The deaths from diphtheria are also rather above the average (93), numbering 105, and are equivalent to an annual mortality rate of 0·10 per 1,000. Of the deaths, 32 belonged to Dublin county borough, 8 to Antrim, 7 to Down, 6 to Cork county and county borough, and 6 to County Dublin.

DIARRHOEAL DISEASES.—In the aggregate these deaths numbered 209, and include 3 deaths from dysentery, 172 from diarrhoea and *enteritis* of children under 2 years, and 34 deaths from diarrhoea of persons aged 2 years and upwards.

TUBERCULOSIS.—The number of deaths from all forms of tuberculous disease as returned by the Registrars is 2,520; this figure is equal to an annual rate of mortality of 2·30 per 1,000 of the estimated population of the country.

The notes which follow have been selected from those kindly furnished by the Registrars and published at the end of this Report, as having a special interest in connection with the status of tuberculosis or other matters concerning the public health of the country:—

Balrothery; Lusk.—“Two deaths from tubercular disease, one of old standing and the other of a child from Dublin who contracted the disease there and came here to die.”

Granard; Scrabby No. 2.—“Four deaths from pulmonary tuberculosis have been recorded. Most of these were living in damp insanitary dwellings.”

Dunshaughlin; Killeen.—“Phthisis record diminishing.”

Trim; Innfield.—“The deaths of two men from pulmonary phthisis were registered during the quarter, aged 36 and 48 years, respectively. Both lived in labourers' cottages and were apparently in the best of health two years ago. In the case of the man aged 36, a sister of his came home from service in Dublin and died of consumption some years ago.”

Athy; Stradbally.—“Only one death from tuberculosis occurred during the past quarter and there is no other case of that disease at present under my observation in the district.”

Baltinglass; Kiltegan.—“The number of deaths from tuberculosis is unusually large this quarter.”

Dungannon; Caledon and Ballymagran.—“Two brothers died from tuberculosis this quarter; of a family of six, all, including father, have died of tuberculosis. The adoption of Part I., Tuberculosis Prevention (Ireland) Act, 1908, in the union would be an advantage.”

Gort; Ardrahan.—“The outstanding characteristic at present is the diminution in the incidence of cases of tuberculosis of lungs—the tubercular wave seems subsiding. There are, however, cases of chronic tuberculosis of bones (one case was that of an old age pensioner), or ‘cold’ tuberculosis with intermittent acute recrudescences when discharge occurs. Some of these cases ante-date for a very long period, in one case over fifty years; as a casual link in the chain of production this factor must be taken into account.”

Claremorris; Ballyhaunis.—“Tuberculous, rheumatic, and respiratory affections have been abnormally prevalent during quarter, and are, in my opinion, largely attributable to the abiding neglect of arterial drainage throughout the district.”

CANCER.—As returned by the Registrars it appears that 844 deaths were attributable to cancer; this number is equivalent to a rate of 0·77 per 1,000. In each of the 3 quarters preceding the rate was 0·71, 0·76 and 0·74.

VIOLENCE.—There were 240 deaths by violence, and inquests were held in 454 instances.

The Registrars, in their Notes, report the presence of the following diseases:—

Measles in 4 districts, scarlet fever in 37, whooping-cough in 41, diphtheria in 19, enteric fever in 15, influenza in 86, mumps in 2, typhus in 1, and acute polio-myelitis in 1 district. [See Appendix to this Report commencing on page 65.]

INQUESTS.—There were 454 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 47 of the total deaths registered.

In Leinster there was 1 inquest to every 48 deaths registered, in Munster 1 to 52, in Ulster 1 to 38, and in Connaught 1 to 100.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 21,365 deaths registered, 4,309, or 20·2 per cent., occurred in public institutions. In Leinster the percentage was 28·6, in Munster 23·7, in Ulster 13·8, and in Connaught 13·1.

UNCERTIFIED DEATHS.—According to the returns, 5,081 of the 21,365 deaths which were registered during the quarter were uncertified, being nearly 24 per cent. of the total. In Leinster the percentage was 18, in Munster 28, in Ulster 19, and in Connaught the uncertified deaths were 47 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1912, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Percentage of Total Deaths.	Number in every 100,000 of the Population.

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 22·7, and the birth-rate 27·6 per 1,000 of the population ; in the remainder of the country the death-rate was 18·0 and the birth-rate 22·5 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 1·5 per 1,000 of the population ; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1912, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 30th March, 1912.

(a) Including the deaths of 2 persons from scarlet fever, 3 from diphtheria, 5 from enteric fever, 3 from tuberculous disease, and 2 from cerebro-spinal fever or cerebro-spinal meningitis, admitted from the City of Belfast to the hospital for infectious diseases at Purdy's Burn, in the Registrar's District of Ballyleson, and Union of Lisburn, and the death of one person from cerebro-spinal meningitis registered in Belfast.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, and diarrhoeal diseases.

‡ In the cases of the Dublin Registration Area, Belfast and the urban districts containing a population of over 10,000 in 1901, the population given is according to the Census of 1911 (unrevised figures), and in the other urban districts according to the Census of 1901; the rates for the districts in the Dublin Registration Area and for Belfast have been calculated on the population estimated to the middle of 1912.

URBAN DISTRICTS—continued:

REGISTRATION, FIRST QUARTER, 1912.

[illegible]

* See note (†) on page 9.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1912, there were 14,691 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st March last was 3,667 (2,264 males and 1,403 females), being 442 less than in the corresponding quarter of the year 1911, and 566 below the average number for the first quarter of the ten years 1902-1911.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1911 and 1912:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1911.	1912.	In-crease.	De-crease.	1911.	1912.	In-crease.	De-crease.	1911.	1912.	In-crease.	De-crease.
January,	414	400	—	14	230	253	23	—	644	653	9	—
February,	509	495	—	14	338	316	—	22	847	811	—	36
March, ..	1,692	1,369	—	323	926	834	—	92	2,618	2,203	—	415
TOTAL,	2,615	2,264	—	351	1,494	1,403	—	91	4,109	3,667*	—	442

* Including 2,223 emigrants to the United States of America, viz.:—269 in the month of January, 457 in February, and 1,497 in March. Of 1,864 steerage passengers, 383 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1911 the average price was 6*d.*, and in the corresponding quarter of 1902 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 13*s.* 6*d.* per cwt. For the corresponding quarter of the year 1911 the average price was 13*s.* 6*d.*, and for the first quarter of 1902 the average price was 14*s.* 5*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 5*d.* to 3*s.* 11*d.*. In the first quarter of 1911 the average prices were 3*s.* 3*d.* to 4*s.* 0*d.*, and the prices for the corresponding quarter of 1902 were 2*s.* 4*d.* to 2*s.* 10*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 61*s.* 0*d.* to 66*s.* 6*d.* per cwt. In the corresponding quarter of 1911 the average prices were from 53*s.* 0*d.* to 59*s.* 0*d.*, and in the first quarter of 1902 they were from 52*s.* 6*d.* to 55*s.* 6*d.*

The price (including cartage) of Whitehaven coal in the City of Dublin from the commencement of the quarter until early in February ranged from 23*s.* to 26*s.* per ton nett. Owing to the coal strike, no fixed prices were current from end of February until 9th March, but as high as 50*s.* per ton was reached.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 79 and the lowest 76½.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland from 1st January to 8th February was 4½ per cent., on which date it was lowered to 4 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1912 was 40,443, or 541 below the average for the corresponding period in 1911.

The average weekly number of persons receiving out-door relief during the quarter was 40,911, being 726 above the average for the first quarter of 1911.

Of the persons receiving in-door relief during the first quarter of 1912, an average number of 1,654 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1911 the average weekly number was 1,632.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1912, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									NO. OF PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Out-door.			
	(a)	(b)							Ordinary relief.	By means of works devised for the relief of distress.	Total Outdoor.

(a) Messrs. Bolands, Limited.
(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery was ½d. per 4-lb. loaf lower.
NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the first

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1907 to 1912, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14).

The mean height of the barometer during the first quarter of 1912 was 29·672 inches, being 0·186 below the average for the corresponding quarter of the five years 1907–1911; the highest reading (30·420 inches) was on the 1st January, at 9 P.M., wind S.W., and the lowest (28·795 inches) on the 21st March, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 42·3°, being 1·4° above the average for the first quarter of the 5 years 1907–1911.

The maximum temperature of the air during the quarter was 60·1° and the minimum 17·0°. The maximum heat in sun was 109·3°.

Rain or snow fell on 56 days during the quarter. The rain-fall measured 6·846 inches, being 1·827 inches above the average for the first quarter of the five years 1907–1911. The greatest monthly rainfall was in January, when 3·088 inches were registered.

The wind blew on 23 days from W., on 17 days from E., on 13 days from S., on 8 days from S.E., on 8 days from S.W., on 4 days from N., on 3 days from N.E., and the air was calm on 15 days at 9 A.M.

January.—The mean height of the barometer during this month was 29·878 inches; the highest reading (30·420 inches) was on the 1st, at 9 P.M., wind S.W.; and the lowest (28·900 inches) on the 6th, at 9 A.M., wind E.S.E. The mean temperature of the air was 40·0°, the maximum registered was 55·0°, and the minimum 20·0°. The 14th was the warmest day, and the 30th the coldest night. The mean of the dry bulb was 40·2°, and of the wet bulb, 38·7°. The maximum heat in the sun was 81·1°, and the minimum on the grass 14·6°. The total amount of sunshine recorded was 44·2 hours, the greatest daily amount being 6·2 hours on the 29th. The minimum on the grass was below 30° on 12 nights. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·3. Rain or snow fell on 19 days. The rain-fall measured 3·088 inches; the greatest amount in 24 hours was 0·860 inch on the 6th.

February.—The mean height of the barometer during this month was 29·554 inches; the highest reading (29·970 inches) was on the 15th, at 9 P.M., air calm, and the lowest (28·810 inches) on the 8th, at 9 P.M., wind E.S.E. The mean temperature of the air was 42·0°, the maximum registered was 57·0°, and the minimum 17·0°. The 15th was the warmest day, and the 3rd the coldest night. The mean of the dry bulb was 41·7°, and of the wet bulb 40·4°. The maximum heat in sun was 99·1°, and the minimum on the grass 14·3°. The total amount of sunshine recorded was 69·7 hours, the greatest daily amount being 8·6 hours on the 23rd. The minimum on the grass was below 30° on 12 nights. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain or snow fell on 16 days. The rain-fall measured 1·558 inches; the greatest amount in 24 hours was 0·430 inch on the 18th.

March.—The mean height of the barometer during this month was 29·583 inches, the highest reading (30·212 inches) was on the 28th at 9 P.M., wind W.S.W., and the lowest (28·795 inches) on the 21st, at 9 A.M., wind S.W. The mean temperature of the air was 44·9°; the maximum registered was 60·1°, and the minimum 27·6°. The 17th was the warmest day, and also the coldest night. The mean of the dry bulb was 43·6°, and of the wet bulb 41·5°. The maximum heat in sun was 109·3°, and the minimum on the grass 23·2°. The total amount of sunshine recorded was 120·0 hours, the greatest daily amount being 8·3 hours on the 11th. The minimum on the grass was below 30° on 9 nights. The maximum ozone was 0·8, the minimum 0·1, and the mean 0·6. Rain or snow fell on 21 days. The rain-fall measured 2·200 inches; the greatest amount in 24 hours was 0·350 inch on the 4th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq.,
LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 16 and 17), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South, the former being represented by six stations and the latter by seven.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

STATION.	OBSERVER.
IRELAND NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point	Do.
Markree Castle,	J. R. Armstrong, for Captain Cooper.
Donaghadee,	Meteorological Office.
Armagh, The Observatory, ..	J. L. E. Dreyer, PH.D.
Belfast, Queen's College, ..	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, PH.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Limerick, Mungret College, ..	Rev. W. O'Leary, S.J.

NOTES ON THE STATISTICAL TABLES.

The letters *a* and *p* indicate whether the readings of the maximum and minimum thermometers are taken at the hours of morning or evening observations.

Barometer.—The correction for **latitude** has been applied to all the values. The values at sea-level have been corrected for diurnal variation by using the average difference for the month between the mean of the combination of hours shown and the true mean for the 24 hourly observations at the observatories.

Rainfall.—The amounts are those for the 24 hours commenced at the time of morning observation.

Hygrometer.—At certain stations the vapour pressure and the relative humidity are the results obtained from the daily values. These are entered in clarendon type. At other stations the calculations are made from the monthly means of the dry and wet bulb readings.

Weather Phenomena.—The number of days of **Precipitation, Snow, Hail, Thunderstorm, Fog, Ground Frost, and Gale**, are counted irrespective of the hours at which the phenomena occur. Except in the cases of rainfall (see above) and ground frost the day is the civil day. A day is reckoned as a day of "**clear sky**," if the mean of the estimates of the "amount of cloud" at the fixed hours of observation is **less** than 2, and as an "**overcast**" day if the mean is **greater** than 8. A night is counted as a "Night of Ground Frost" if the minimum on the grass has sunk to 30° or less.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The normal averages used for stations are—Pressure, Temperature, and Rainfall for the 35 years 1871–1905; Bright Sunshine for the 25 years 1881–1905. These averages for the 35 years, 1871–1905, have been corrected for diurnal variation and the values in the column "difference from the normal" have been obtained by using these corrected averages with the results for Pressure at Sea Level.

Valencia.—The figures quoted in the second line assigned to this observatory in the columns for Barometer and Mean Temperature are the true daily means computed from the hourly tabulations of the traces of the photographic recording instruments.

§ Mean Values for Districts.—The stations used in the Weekly Weather Report of the Meteorological Office for the computation of "district values" of rainfall and temperature are distinguished by the sign §, those used for the computation of "district values of bright sunshine" by the sign §. The monthly mean values for districts given in this Report for maximum, minimum, and mean temperature, duration of bright sunshine, number of rain days, and amount of rainfall, are computed from the data for these "representative" stations. The monthly mean values for districts for "amount of cloud" are computed from the data for all stations included in Table IX. The extreme values of the various elements in each district are printed in distinctive type. The averages for districts with which the current values are compared are for the 25 years 1881–1905. The "district values" for Earth Temperature are obtained from the data for all stations.

NOTE.—This table has been constructed for the years 1838 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1912.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW; *Bagenalstown*.—The district is free from any infectious disease.

CARLOW; *Fennagh and Myshall*.—Scarlet fever was prevalent in the district during the quarter. It appeared in a mild form, and caused no deaths. One case of enteric also occurred. Influenza, too, appeared, and the quarter generally from a health point of view, was unusually severe.

CARLOW; *Leighlinbridge*.—Health of district good.

NEW ROSS; *St. Mullins*.—Two deaths registered at over 92 years; one at 85; one at 83 and two at 79 years.

Dublin County.

BALROTHERY; *Kilsallaghan*.—General health of district good and free from infectious disease.

BALROTHERY; *Lusk*.—Two deaths from tubercular disease, one of old standing, and the other of a child from Dublin who contracted the disease there and came here to die. Scarlatina of a mild form prevalent, but the cases are not many.

DUBLIN, SOUTH; *Donnybrook No. 1*.—District very healthy.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—Scarlatina and an epidemic of measles prevailed in the district during the quarter, but, fortunately, we had no deaths.

RATHDOWN; *Bray, No. 2*.—Sanitary arrangements throughout the district (which is altogether rural), with the exception of one village, are good. In this village a sewerage scheme is in course of construction; when completed will remedy any defects which may at present exist there.

Dublin County Borough.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary arrangements have been improved on a large scale during the past three months. A good many of the old dilapidated houses have been condemned and thrown down. The sewerage has been improved. The roads are not in a very good state, and would require sheets of stones oftener. There has been no serious epidemic.

Kildare County.

CELBRIDGE; *Celbridge, W*.—This district is healthy.

CELBRIDGE; *Maynooth*.—District very healthy.

EDENDERRY; *Carbury*.—Prevalence of influenza and bronchitis in children. One case of diphtheria, removed to fever hospital.

NAAS; *Ballymore Eustace*.—Influenza of a mild type during February and March. Four deaths registered over 70 years.

NAAS; *Clane and Timahoe, North*.—I registered a death during the quarter at the age of 101 years.

NAAS; *Robertstown and Kilmeage*.—Health and sanitary condition of district good.

Kilkenny County.

CARRICK-ON-SUIR; *Piltown*.—General health of district of a very high standard. No cases of infectious disease to record.

CASTLECOMER; *Castlecomer, W*.—The district is at present free from any epidemic.

KILKENNY; *Gowran*.—Sanitary arrangements are good.

KILKENNY; *Tiscoffin*.—Health of district good.

KILKENNY; *Tullaroan*.—Birth and death-rate low. Health of district good.

NEW ROSS; *Dysartmoon*.—There was an epidemic of scarlet fever in portion of this district in February, in consequence of which the schools had been closed, and since then no further case appeared. District otherwise healthy.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—District in a very healthy condition.

URLINGFORD; *Urlingford, W.*—Health of district good. No epidemics. Number of deaths much below the average of previous March quarters.

King's County.

BIRR; *Frankford*.—There was an outbreak of scarlatina in one part of the district, necessitating the closing of the schools.

MOUNTMELICK; *Clonygowan, No. 2*.—Vaccination small owing to bronchial attacks amongst children.

ROSCREA; *Roscrea, No. 2*.—The average age of the deaths registered during the quarter is over 71 years.

TULLAMORE; *Clara*.—Sanitary arrangements good as far as I see, being only a few months in district.

TULLAMORE; *Killoughy*.—Sanitary conditions fair.

TULLAMORE; *Phillipstown*.—District healthy.

TULLAMORE; *Tullamore, W.*—A fairly healthy quarter, considering the season. A mild outbreak of typhoid fever occurred, but has subsided.

Longford County.

BALLYMAHON; *Abbeyshrule*.—Of the twelve deaths registered seven were aged from 68 to 80 years.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalbee*.—The district is in fair sanitary condition.

GRANARD; *Granard, W.*—The district is in good sanitary condition, and free from contagion.

GRANARD; *Scrabby, No. 2*.—Health of the district fairly good. Four deaths from pulmonary tuberculosis have been recorded. Most of these were living in damp, insanitary dwellings.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 2*.—Pneumonia was very prevalent during the quarter—four of the deaths registered having occurred from that disease. Two deaths occurred from bronchitis.

DUNDALK; *Dromiskin*.—District in a healthy state.

Meath County.

ARDEE; *Callan, No. 2*.—District very healthy and free from all epidemics.

ARDEE; *Drumcondra*.—District free from all epidemic disease.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

DROGHEDA; *Stamullen*.—Health of district in a satisfactory state during quarter.

DUNSHAUGHLIN; *Killeen*.—Sanitary condition good. No epidemic diseases, but pneumonia prevalent during the past two months; about ten cases with one death. Phthisis record diminishing.

DUNSHAUGHLIN; *Ratoath, W.*—The sanitary condition of the district is good.

EDENDERRY; *Ballyboggan*.—Deaths occurred at the advanced ages of 95, 87, 85, 81, 80, 73, and 71. The cancer case refused operation.

KELLS; *Nobber*.—District is free from infectious diseases. Deaths are 4 less than in corresponding quarter of 1911, but double the number of 1910, when the number registered was only 7. Eleven of the deaths recorded range from 72 to 86 years, natural senile decay accounting for the majority of them.

NAVAN; *Painestown*.—Sanitary condition of district good. Catarrhal complaints prevalent during the quarter, but no other contagious or infectious epidemic.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Athboy*.—Nine cases of scarlatina during quarter, all of which recovered.

TRIM; *Innfield*.—The deaths of two men from pulmonary phthisis were registered during the quarter, aged 36 and 48 years respectively. Both lived in labourer's cottages, and were apparently in the best of health two years ago. In the case of the man, aged 36, a sister of his came home from service in Dublin and died of consumption some years ago.

TRIM; *Summerhill*.—There was a pretty sharp epidemic of influenza during the quarter, which, no doubt, had something to do in hastening the end of all the tubercular cases, and many of the others.

Queen's County.

ABBEYLEIX; *Ballinakill*.—District healthy.

ABBEYLEIX; *Ballyroan*.—I registered the death of a man at 104 years of age during the past quarter.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in district good. Whooping-cough prevalent in district during the quarter.

ATHY; *Stradbally*.—The sanitary condition of the district has been much improved. Only one death from tuberculosis occurred during the past quarter, and there is no other case of that disease at present under my observation in the district.

MOUNTMELICK; *Clonaslee*.—The sanitary arrangements in my district are good.

MOUNTMELICK; *Clonygowan, No. 1*.—Vaccinations small owing to influenza and bronchial attacks amongst the children.

MOUNTMELICK; Mountmellick, W.—The sanitary arrangements of this district are in good condition.

ROSCREA; Borris-in-Ossory.—The health of this district has been fair during the past quarter.

Westmeath County.

BALLYMAHON; Ballymore.—One death from tuberculosis registered.

MULLINGAR; Castletown Geoghegan.—The sanitary state of the district is good, and no epidemic prevalent during quarter.

MULLINGAR; Killucan.—The district is healthy and is at present free from infectious disease.

MULLINGAR; Mullingar, W.—Health of the district fairly good.

MULLINGAR; Milltown.—The *grippe* epidemic was very prevalent in the district during the months of January and February, and accounted for two deaths. Emigration—so alarming twelve months ago—is now almost nil. One death registered was certified general tuberculosis. One accidental death.

TULLAMORE; Kilbeggan.—The sanitary arrangements of district are satisfactory. No zymotic diseases during quarter.

Wexford County.

ENNISCORTHY; Killann.—Mild form of influenza prevalent during the quarter.

GOREY; Camolin.—In my opinion the sanitary arrangements in the district are all right.

NEW ROSS; Fethard, No. 1.—Sanitary condition of the district satisfactory.

NEW ROSS; Fethard, No. 2.—District healthy.

Wicklow County.

BALTINGLASS; Dunlavin.—A few cases of diphtheria during the quarter. No fresh case of tuberculosis.

BALTINGLASS; Kiltegan.—The number of deaths from cancer and tuberculosis are unusually large this quarter.

NAAS; Blessington.—The general health of district good. A mild type of influenza prevalent. Several persons died of old age and debility.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district is good.

RATHDOWN; Aughrim.—The district is healthy and sanitary. Public health good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan, W.—Health of district fair.

CORROFIN; Corrofin, W.—District unusually healthy until last week in March, when coughs and colds became very frequent, with some cases of broncho-pneumonia.

ENNIS; Crusheen.—Health of district good.

ENNIS; Newmarket.—The district during the quarter was in a very healthy state. There were two cases of enteric fever, the cause of which was impossible to discover; both, however, recovered.

ENNISTIMON; Ennistimon, W.—The sanitary arrangements are satisfactory. No epidemic in district.

ENNISTIMON; Roadford.—District healthy. Sanitary arrangements satisfactory. Quarter exceedingly rainy.

KILLADYSERT; Ballynacally, W.—Two cases of influenza died in the quarter.

KILLADYSERT; Labasheeda.—Health of the district continues good.

KILRUSH; Carrigaholt.—Except cases of influenza and bronchial affections, the health of district was good during past quarter.

KILRUSH; Kilmihil.—Sanitary arrangements fair.

KILRUSH; Kilrush, W.—The health of the district is satisfactory.

LIMERICK; Bridgetown.—District healthy.

LIMERICK; Coolacasey.—The district was very healthy during the quarter. There was no case of cancer registered.

SCARRIFF; Feakle.—District healthy.

SCARRIFF; Kilkishen.—Two deaths were registered, one at 92, and the other at 98 years. Most of the others were considerably over 70, and there were none under 60.

SCARRIFF; Mountshannon, W.—District continues in a healthy state.

SCARRIFF; Quin.—Of the deaths, 7 are uncertified; those deaths were all in old people, and in this part of the country the old individual is allowed to die without medical attendance. The health of the district is good.

Cork County and County Borough.

BANDON; Innishannon.—District free from infectious disease. Sanitation fair. Ages of uncertified cases: 7 days, 74 years, 84 years.

BANTRY; Bantry, W.—The sanitary condition of district is fairly good. One case of malignant disease in hospital.

BANTRY; Durrus and Kilcrohane.—Six of the deaths registered were aged 66, 73, 75, 81, 83 and 90 years. No cases of tuberculosis or cancer.

BANTRY; Glengarriff.—Acute rheumatoid arthritis was very prevalent in the district, the subjects being between 16 and 22 years of age. Bronchial catarrh, in a good many cases developed into broncho-pneumonia, attacked children three years and under: one or two deaths only occurred.

BANTRY; Kealkill.—District healthy and free from infectious diseases.

CASTLETOWN; Kilcatherine.—District healthy. No case of cancer.

CLONAKILTY; Rosscarbery.—Whooping-cough and epidemic jaundice have been prevalent in the district during the past quarter.

CORK; Blarney.—The case of cancer was epithelioma of lip.

CORK; Carrigaline, No. 2.—An epidemic of measles in the district.

DUNMANWAY; *Coolmountain*.—The general health of district is excellent.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district continues fairly good.

FERMOY; *Rathcormac*.—The health of district was exceptionally good during the quarter. The ages of the ten persons whose deaths were registered varied from 70 to 82 years.

KANTURK; *Milford*.—There were two cases of enteric fever this month. District otherwise healthy.

KILMALLOCK; *Charleville*.—The district is healthy. During last month there were six cases of scarlet fever. The last case was on the 25th March.

KINSALE; *Ballyfeard*.—Health of district satisfactory. Two deaths occurred at 71, one at 74, one at 78, and one at 90 years.

MACROOM; *Cannaway*.—Health of district good.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—Health of district satisfactory.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Rahan*.—District has been healthy during past quarter; one case of enteric fever.

MIDDLETON; *Walshtownmore East*.—The case of diphtheria registered occurred during the previous quarter.

MITCHELSTOWN; *Mitchelstown, No. 1, W.*—Influenza very general, also whooping-cough in western portion of district during the month of March.

Kerry County.

CAHERSIVEEN; *Caher, W.*—One death at the age of 102 years was registered during the quarter.

CAHERSIVEEN; *Emlagh*.—The sanitary arrangements are those common to most country districts. The health of the district is good. No case of infectious disease has occurred during the quarter, and, notwithstanding the inclemency of the weather, there were very few cases of serious chest trouble, there being only a few cases of pneumonia.

CAHERSIVEEN; *Glanbehy*.—No deaths from cancer for the quarter. District healthy.

CAHERSIVEEN; *Valencia*.—Births above and deaths below the average. District healthy during quarter.

DINGLE; *Anascaul*.—District healthy.

DINGLE; *Castlegregory*.—District healthy.

DINGLE; *Dingle, W.*—The last three months have been healthy, but for the last three weeks there have been some cases of influenza and bronchial affections.

DINGLE; *Ventry*.—The general health of the district is good.

KENMARE; *Kenmare, W.*—A few cases of diphtheria during the quarter.

KILLARNEY; *Coom*.—District healthy during past quarter.

KILLARNEY; *Killorglin*.—Occasional cases of typhoid fever keep cropping up.

LISTOWEL; *Ballyhorgan*.—Health of district good.

LISTOWEL; *Ballylongford*.—District healthy for quarter. No case of contagious disease.

LISTOWEL; *Listowel, W.*—A severe epidemic of typhus fever prevailed in urban and adjoining rural district during the months of January and February.

LISTOWEL; *Tarbert*.—I consider the district to be in good sanitary condition, and particularly free from tubercular disease.

TRALEE; *Brosna, No. 1*.—One death at the age of 100 was registered during the quarter.

TRALEE; *Castlemaine*.—Health of the district continues good.

TRALEE; *Kilgobban*.—District healthy.

Limerick County and County Borough.

CROOM; *Castletown*.—An unhealthy quarter. Scarletina appeared in one townland, but did not spread.

KILMALLOCK; *Bruff*.—The district is healthy. No infectious disease prevalent.

KILMALLOCK; *Bruree*.—There were many cases of bronchial catarrh, otherwise district healthy.

KILMALLOCK; *Hospital*.—District free from infectious fevers, and fairly healthy.

KILMALLOCK; *Kilfinnane*.—District very healthy.

KILMALLOCK; *Kilmallock, W.*—Sanitary arrangements good.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair. District healthy. Whooping-cough of a mild type prevalent.

LIMERICK; *Caherconlish*.—Sanitary arrangements fair. Of the deaths, two were of persons aged 80 and one over 100.

LIMERICK; *Clarina*.—Sanitary arrangements are such as could be expected in any rural district. Of the causes of death mentioned in the abstracts, phthisis is still prevalent.

LIMERICK; *Moroe*.—District generally in good sanitary condition. Birth-rate high. Death-rate low. No death from tuberculosis, or from cancer. A few cases of whooping-cough observed during past week.

LISTOWEL; *Glin*.—I attended a policeman who was bitten by a dog, but the dog was not rabid. I am glad to be able to state that my district was singularly free from infectious disease during the quarter just closed.

MITCHELSTOWN; *Galbally*.—A severe epidemic of influenza has prevailed during the month of March, with pneumonia following in many cases. I am now in attendance on ten cases of pneumonia.

MITCHELSTOWN; *Mitchelstown, No. 2*.—District healthy. No infectious disease.

NEWCASTLE; *Abbeyfeale*.—Sanitary conditions fairly good. District in a healthy state at present.

NEWCASTLE; *Ardagh*.—Of the deaths registered, the aggregate of ten of them is 818 years, or nearly 82 years each. The sanitary state of the district is pretty fair.

NEWCASTLE WEST; *Feenagh*.—The general health of the district is fairly good. There have been several cases of scarlatina in the district during the past few months.

RATHKEALE; Askeaton.—There were eight deaths registered of persons aged 65 years and upwards during the past quarter. One of these was stated to be 98 years. Another of these deaths was caused by cancer of the lower lip. One death was caused by tetanus in a boy aged seven years, who received a small cut in his leg, and which was neglected. He lived four days. I saw him for the first time about 12 hours before he died.

RATHKEALE; Pallaskenry.—Influenza very prevalent and much sickness therefrom.

RATHKEALE; Rathkeale, No. 1, W.—The deaths were principally due to senility and bronchitis. Eighteen of the 34 deaths occurred in the Union Hospital. Of those over 65 years, one was 96, five were 90, seven were between 80 and 90 years, and twelve between 70 and 80 years. There was no death of an infant under one year of age, and only two under 38 years of age—1½ and 2 years respectively. The district was particularly free from illness for the quarter. There was no zymotic disease nor any affections due to atmospheric influences.

TIPPERARY; Grean.—District healthy.

Tipperary N.R.

BORRISOKANE; Borrisokane, W.—Whooping-cough very prevalent in district. The death of a woman was registered during the quarter at the age of 106 years.

BORRISOKANE; CloghJordan.—Three cases of scarlatina, and one of diphtheria occurred in the district during the quarter. They were sent to the hospital. Otherwise the district is healthy.

BORRISOKANE; Terryglass.—District is healthy, and at present there is a scheme begun with a view to demolishing insanitary houses and building new cottages instead of them.

NENAGH; Nenagh, W.—Influenza prevailed during the last month or so.

NENAGH; Newport.—Coughs were very prevalent in district during the quarter. No case of typhoid, typhus or diphtheria reported.

NENAGH; Portroe.—District healthy. Sanitary arrangements good.

NENAGH; Silvermines.—Two deaths from pulmonary tuberculosis registered during quarter. Influenza very prevalent during March. Vaccination backward owing to influenza.

NENAGH; Toomyvara.—Three cases of enteric fever, and one case of diphtheria occurred during the quarter.

THURLES; Thurles, W.—Influenza of a mild type without complications prevalent during March. Three cases of pulmonary tuberculosis under treatment in infirmary, two from urban, one from rural district.

Tipperary, S.R.

CALLAN; Ballingarry.—Influenza of a severe type prevailed during the quarter.

CALLAN; Mullinahone.—Sanitary condition of district fairly good. No disease of a contagious kind prevalent. Two isolated cases of scarlatina occurred during the quarter; both recovered. No case of cancer. Two deaths from pulmonary phthisis.

CASHEL; Killenaule.—The district has been free from epidemic disease in last quarter, excepting a few rather mild cases of influenza.

CASHEL; Kilpatrick.—Whooping-cough prevalent.

CLOGHEEN; Caher.—Influenza was prevalent in the district during the past quarter.

CLOGHEEN; Clogheen, W.—District healthy and very free from epidemic diseases.

CLONMEL; Kilsheelan, No. 1.—One death from pulmonary tuberculosis.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; Emly.—Slight epidemic of diphtheria.

URLINGFORD; Kilcooly.—The district has been very healthy during past quarter. Sanitary arrangements good.

Waterford County and County Borough.

CARRICK-ON-SUIR; Rathgormuck.—The sanitary condition of the district is satisfactory.

CLONMEL; Ballymacarbry.—Health of district good. Two deaths registered at 76 and 82.

CLONMEL; Kilsheelan, No. 2.—District healthy.

DUNGARVAN; Dunganvan, W.—Some cases of pertussis in district during past quarter.

DUNGARVAN; Seskinan.—One death registered—age 95.

DUNGARVAN; Whitechurch.—Four cases of scarlet fever, two of enteric fever, and four of pulmonary tuberculosis during the quarter.

KILMACTHOMAS; Bunmahon.—Health of district exceptionally good. One case of scarlet fever during the quarter.

LISMORE; Ballyduff.—Sanitation and general health of the district very satisfactory.

LISMORE; Tallow.—District healthy.

WATERFORD; Kilmeadan.—Health of district continues very good. There are no infectious diseases; sanitary condition good.

WATERFORD; Waterford Urban, No. 1, W.—The health of the district has been good. There is almost complete absence of infectious disease. The housing of the poorer classes is being gradually improved.

WATERFORD; Woodstown.—The health of the district is good, and the general sanitary arrangements excellent.

YOUGHAL; Ardmore.—District healthy.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Crumlin.—During the month of March the most frequent cases of severe illness were from bronchitis and broncho-pneumonia in children, and lobar pneumonia in adults.

ANTRIM; Doagh.—The district was entirely free from infectious disease during the quarter, with the exception of influenza, which has been epidemic.

ANTRIM; Randalstown.—Three cases of enteric fever. One of scarlatina and one of erysipelas reported during the quarter. Influenza very prevalent.

ANTRIM; Templepatrick.—The sanitary arrangements of the district (with few exceptions) all good. Influenza and diseases of the respiratory organs very prevalent during the quarter.

BALLYCASTLE; Ballycastle, W.—Whooping cough, followed by bronchitis and broncho-pneumonia in a good many cases, has been prevalent in the district. There have also been several cases of scarlet fever of a severe kind; in one case death took place in 48 hours. Several cases of influenza, followed by pneumonia, have also occurred during the month of March.

BALLYCASTLE; Croagh.—Whooping cough was very prevalent in the district. Three deaths from complications such as broncho-pneumonia.

BALLYMENA; Ahoghill.—Health of district good; number of births decreasing.

BALLYMENA; Ballymena, W.—A few cases of scarlatina. A good many cases of influenza; otherwise public health satisfactory.

BALLYMENA; Broughshane.—There has been some scarlatina in the district, and two deaths from same.

BALLYMENA; Clogh.—During the quarter there have been a good many cases of scarlatina of a very mild type. There was only one death, which arose more from neglect after this disease; otherwise the district has been fairly healthy.

BALLYMENA; Galgorm.—District healthy. Four deaths, 90 years and upwards.

BALLYMENA; Glenwhirry.—Sanitary arrangements of district fair. No epidemics occurred during quarter. There was an isolated case of diphtheria, which proved fatal from heart failure. The necessary precautions having been taken, no further cases occurred.

BALLYMENA; Portglenone.—Health of the district is good.

BALLYMONEY; Bushmills.—A very severe and fatal form of whooping cough was epidemic in the district.

BALLYMONEY; Dirraw.—Influenza, with pneumonic complication, and chest cases, with severe paroxysmal cough, prevalent during quarter.

BALLYMONEY; Portrush.—Influenza has been prevalent during the quarter.

BELFAST; Belfast Rural, No. 3.—No deaths from cerebro-spinal fever.

BELFAST; Belfast Rural, No. 4.—The health of the district is exceptionally good. There have been some mild cases of influenza.

LARNE; Ballycarry.—Sanitary condition of district good. Pretty extensive outbreak of scarlet fever and diphtheria, mild type. Few deaths.

LARNE; Waterfoot.—Sanitary arrangements of this district are excellent.

LISBURN; Dunmurry.—The sanitary condition of this district good. No epidemic of any kind.

LISBURN; Glenavy.—There has been a very severe epidemic of whooping cough in lower lying part of district, now abating. One death of 100 years registered. Number of deaths below average.

Armagh County.

ARMAGH; Blackwatertown.—Whooping-cough has been prevalent. Four deaths have been registered due to it.

ARMAGH; Markethill.—There was one case of scarlet fever, which was removed to hospital, and the disease did not spread. One of the three patients who died from tuberculosis came into the district from Belfast.

ARMAGH; Richhill.—Whooping-cough, bronchitis, and pneumonia have been very prevalent this quarter.

ARMAGH; Tynan.—During the months of January and February there was an epidemic of whooping-cough of a very severe type, but from which there were no deaths.

LURGAN.—*Lurgan, No. 1, W.*—A very severe epidemic of influenza prevailed amongst children during the month of February, and started afresh the symptoms of whooping-cough in children who were only recovering from that disease.

LURGAN; Lurgan, No. 2.—This district is in a good healthy condition.

NEWRY; Mullaghglass.—I have registered six deaths from malignant disease and five from tubercular disease during quarter.

NEWRY; Poyntzpass.—One child, aged 1 year 5 months, died of tuberculous meningitis. Ages of seven totalled 462 years, or 66 averaged.

Belfast County Borough.

BELFAST; Belfast, Urban, No. 4, W.—No deaths from cerebro-spinal fever.

BELFAST; Belfast, Urban, No. 9.—No deaths from cerebro-spinal fever registered during the quarter.

BELFAST; Belfast, Urban, No. 11.—There have been a great many cases of whooping-cough and bronchitis in the district among young children.

BELFAST; Belfast, Urban, No. 13.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—Whooping-cough and broncho-pneumonia have been widely prevalent amongst the children of the district.

CAVAN; Killashandra.—No deaths from cancer registered during the quarter. One case of fractured skull caused by a fall from a tree. The branch of the Women's National Health Association is doing good work distributing leaflets on hygiene and visiting the people partly under my directions.

CAVAN; Stradone.—Whooping-cough prevalent in district.

COOTEHILL; Tullyvin.—Three-fourths of those whose deaths were registered during the period were over 65 years of age.

ENNISKILLEN; Holywell, No. 2.—The sanitary condition of the district is fairly good. Influenza was prevalent.

GRANARD; Scrabby, No. 1.—Health of the district fairly good until lately. At present influenza is prevalent. One death from diphtheria has occurred during the quarter. One death is recorded of a man who reached the great age of 107 years, and who up to his demise was in full possession of his faculties. A few dogs have been destroyed which were suspected of rabies.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—The sanitary conditions of district fairly good.

DONEGAL; Donegal, W.—Pneumonia prevalent during the quarter; district otherwise healthy.

DONEGAL; Dunkineely.—Death-rate unusually low; birth-rate exceptionally high, with, in the latter, a large majority of females. No epidemic disease except a few case of influenza, and no death from cancer or tuberculosis during quarter.

DONEGAL; Laghy.—Pneumonia has been rather prevalent during the quarter.

DONEGAL; Mountcharles.—There have been a lot of influenza cases and pneumonia in the district during the quarter. One death from diphtheria registered.

DONEGAL; Pettigoe.—District fairly healthy during quarter and free from any epidemic.

DUNFANAGHY; Crossroads.—District healthy.

DUNFANAGHY; Dunfanaghy, W.—There was an epidemic of mumps; many cases of bronchitis, and several of influenza with high temperature. Two deaths were the result of superficial accidental burns—ages $9\frac{1}{2}$ and $12\frac{1}{2}$ years. One child, aged 2 months, died from (probably) having been "overlain."

GLENTIES; Ardara.—District during quarter has been free from diseases. A death was registered of a woman 110 years of age. The building of waterworks for the supply of the village of Ardara has been completed.

GLENTIES; Doocharry.—District Healthy.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; Carndonagh, W.—Influenza very prevalent during the quarter.

INISHOWEN; Clonmany.—Chest troubles prevalent during the quarter.

INISHOWEN; Malin.—Influenza was prevalent. District fairly healthy.

INISHOWEN; Moville.—Whooping-cough prevalent in district.

LETTERKENNY; Church Hill.—District healthy.

LONDONDERRY; Burt.—One death of a woman registered as 100 years; her friends believe she was a little over it.

LONDONDERRY; Killea.—Of the 12 deaths registered during the quarter one was 102 and another 93 years. In both instances the age seemed authentic.

MILLFORD; Fanad.—District healthy for this season of year. One isolated case of diphtheria occurred during quarter. No other infectious diseases.

MILLFORD; Rosguill.—Six cases of diphtheria occurred during the quarter, from which there was one death before there was an opportunity of administering the anti-toxin, and one case of whooping-cough imported from Scotland; up till date no further cases. The health of the district otherwise satisfactory.

STRABANE; Raphoe.—Sanitary arrangements satisfactory. A number of cases of influenza and pneumonia during past quarter, but no deaths registered therefrom.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory. The majority of the deaths are at an advanced age.

STRANORLAR; Killygordon.—Births registered during quarter well above average. Of the 18 deaths six are over 80 and two are over 90. Eighteen cases of scarlatina during quarter, confined to three households, and one case of enteric fever. All were properly isolated and ran smooth courses. District generally healthy.

Down County.

BANBRIDGE; Ballyward.—The sanitary condition of the district is very satisfactory. No infectious diseases have occurred during the quarter. In the case of three infants who died (all private cases) no medical man was called, the cause of death was given as bronchitis.

BELFAST; Castlereagh, No. 1.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; Ballynahinch.—There have been numerous cases of influenza, with some of mumps, in the district during the quarter. Also one death certified as being from diphtheria.

DOWNPATRICK; Downpatrick, W.—There has been a good deal of scarlatina of a very mild type.

DOWNPATRICK; Killyleagh.—There is no epidemic in this district at present. There were several severe cases of pneumonia during the quarter. The death-rate has not been high, considering the season. I have registered the deaths of eight persons aged from 80 to 89, and eight from 70 to 79.

DOWNPATRICK; Portaferry.—Influenza very prevalent in February and March.

KILKEEL; Kilkeel, No. 2, W.—The cause of temperance is progressing.

KILKEEL; Rosstrevor.—This district has been remarkably free from disease during the past quarter. No epidemic of any kind nor even a sporadic case of infectious disease. In every respect the public health and sanitary condition of district is very satisfactory.

LISBURN; Annahilt.—The sanitary arrangements in the district are good.

LISBURN; Ballylesson.—There were two deaths registered during quarter from cerebro-spinal meningitis from Purdysburn Fever Hospital.

LISBURN; Drumbeg.—Influenza was very prevalent during the quarter, and was very fatal to infants and old people.

LISBURN; Hillsborough.—District very healthy. One death registered at 94 years and another at 103.

LISBURN; Saintfield.—General health of district good.

LURGAN; Moira.—An epidemic of pertussis has been with us for some time, but only one death has occurred so far, but there has been a large amount of complications. Pneumonia, too, has been prevalent and severe. The death-rate is higher than usual. Three cases of cancer. No hydrophobia or rabid dogs. I think the disease is even better stamped out in this island of ours than the smallpox.

LURGAN; Waringstown.—During the quarter there were fourteen cases of scarlet fever in the district, some cases of measles, and a good many cases of whooping-cough; however, no death was caused by any of them. Ten of the scarlet fever cases were removed to hospital, and disinfection carried out as thoroughly as possible.

NEWRY; *Donaghmore*.—The health of the district is good. There has been one case of scarlatina and one death from tubercular meningitis during the past quarter.

NEWRY; *Rathfriland*.—The sanitary condition of the district is good.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements very good. Influenza prevalent during quarter. The district is free from infectious disease.

NEWTOWNARDS; *Comber*.—Influenza has been very prevalent during February and March, very often with bronchitis and pneumonia as complications when neglected. Otherwise we have been fairly free from epidemics. Three cases of scarlatina all removed to hospital.

NEWTOWNARDS; *Donaghadee*.—General health of the district good. Sanitary condition not bad.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. Two cases of typhoid reported. No epidemic except influenza, and it is very prevalent at the present time. Of 34 deaths reported during the quarter 14 were over 65 years.

NEWTOWNARDS; *Kilmood*.—A very severe epidemic of influenza during March.

NEWTOWNARDS; *Newtownards, W.*—The main sewers are all down now and the sanitary authority is pressing the people to connect with these. Efforts are being made to have domestic scavenging better attended to.

Fermanagh County.

BALLYSHANNON; *Church Hill*.—Influenza very prevalent.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—No cases of infections occurred during quarter. Influenza and bronchitis were very prevalent during the later part of the quarter. Sanitation fairly satisfactory.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. Influenza is prevalent. No cancer.

IRVINESTOWN; *Clonelly*.—Public health of district during quarter very good.

IRVINESTOWN; *Ederney*.—Influenza, bronchitis, and congestion of the lungs prevalent during quarter.

IRVINESTOWN; *Irvinestown, W.*—Influenza of mild type prevalent.

LISNASKEA; *Derrylin*.—There have been several severe cases of influenza with pneumonia.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district improving. No deaths from infectious disease. The great majority of deaths were of persons aged 60 years and upwards.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District healthy.

COLERAINE; *Garvagh*.—The death-rate for the quarter has been far above the average, but 22 out of the 30 registered were 65 years and upwards. One registered at 101 years was well authenticated, and said to be even older. Another was 93. Influenza, with chest complications, was prevalent during last month. No other epidemic.

COLERAINE; *Kilrea*.—District healthy. Of the 35 deaths registered in the quarter nearly three-fourths were aged 65 years and upwards.

COLERAINE; *Portstewart*.—The general health has been very good during the quarter. There was no epidemic, and most of the deaths registered were of persons aged 65 years and upwards.

LIMAVADY; *Ballykelly*.—Of the 15 deaths 10 were above 70 years. Of these two were above 90 years. Of the two deaths under one year, one was certified as being from asthenia and the other probably was a case of overlaying though accidental.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Dungiven*.—Prevalence of influenza at the beginning of the quarter, followed by whooping-cough.

LIMAVADY; *Limavady, W.*—The health of the district during the quarter has been very good. Only two cases of scarlet fever.

LONDONDERRY; *Claudy*.—Severe epidemic of whooping-cough, accounting for four deaths. One death registered at age of 103 years, an age which was well authenticated.

LONDONDERRY; *Eglinton*.—Influenza prevalent during March. District otherwise healthy.

MAGHERAFELT; *Maghera*.—No deaths from infectious disease. Two deaths of centenarians registered.

MAGHERAFELT; *Moneymore*.—In the early part of quarter one case of diphtheria, cause not known; isolation; no spread of disease in second month. Two cases of scarlatina in second month, traceable to Day School; isolation; school closed for a month and disinfected; no other cases. A wave of severe whooping-cough passed over one portion of the district, causing one death. Influenza prevalent during past month.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in fair sanitary condition. Whooping-cough prevalent in portions of rural district in early part of quarter.

CARRICKMACROSS; *Donaghmoyne*.—One case of diphtheria occurred; source of infection impossible to trace, possibly from a neighbouring union. Whooping-cough prevalent in early part of quarter, but now has almost entirely disappeared.

CASTLEBLAYNEY; *Ballybay*.—Whooping-cough was prevalent during quarter, seven deaths occurring from it.

CASTLEBLAYNEY; *Castleblayney, W.*—Prevalence of whooping-cough, with numerous pulmonary sequelae. The inclemency of the season and want of fuel have entailed serious distress among the poor.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district is fair. Two cases of scarlatina and one case of diphtheria occurred during the quarter—mild cases.

MONAGHAN; *Castleshane*.—The district is sanitary. There has been an epidemic of influenza and considerable number of cases of pneumonia; also whooping-cough is prevalent.

MONAGHAN; *Emyvale*.—Whooping-cough and bronchitis very prevalent during quarter.

MONAGHAN; *Kilmore*.—A widespread epidemic of whooping-cough (pertussis) exists in the district. One death registered. Many cases of influenza.

MONAGHAN; *Monaghan, W.*—The number of deaths during the quarter is in excess of the corresponding quarter of 1911. There has been an epidemic of whooping-cough, resulting in seven deaths during the quarter.

MONAGHAN; *Scotstown.*—The sanitary condition and health of the district are satisfactory.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory at present. Influenza very prevalent during past month. No other infectious disease in district.

CASTLEDERG; *Drumquin.*—The sanitary arrangements in the district are satisfactory, which is totally exempt from any infectious disease.

CASTLEDERG; *Killeter.*—Influenza very prevalent in the district during quarter.

CLOGHER; *Aughnacloy.*—Influenza prevalent. District otherwise healthy.

CLOGHER; *Fivemiletown.*—There were a good many cases of influenza during second half of quarter.

COOKSTOWN; *Coagh.*—Seven deaths of children under one year registered. Three of these were prematurely born and two died from whooping-cough, which has been prevalent in this district for the past three months.

COOKSTOWN; *Cookstown, W.*—There was an epidemic of scarlet fever in the district; also some cases of diphtheria.

COOKSTOWN; *Pomeroy.*—Sanitary arrangements in some places not very satisfactory. We had a severe epidemic of whooping-cough and pneumonia, otherwise the health of the district is very good.

COOKSTOWN; *Stewartstown.*—There were two families affected with scarlatina. At present there is an epidemic of whooping-cough, otherwise the district has been very healthy. There are two births for each death.

DUNGANNON; *Benburb.*—Whooping-cough very prevalent.

DUNGANNON; *Caledon and Ballymagran.*—Four cases of scarlatina; three in a family of seven and one in another family; no extension of the disease. Two brothers died from tuberculosis this quarter; of a family of six, all, including father, have died of tuberculosis. The adoption of Part I., Tuberculosis Prevention (Ireland) Act, 1908, in the union would be an advantage. Whooping-cough is now prevalent.

DUNGANNON; *Clonavaddy.*—Sanitary condition of district fairly good.

DUNGANNON; *Coalisland.*—Whooping-cough epidemic is now almost over. Cases of influenza (many of them accompanied by tonsillitis) are numerous at present.

OMAGH; *Drumquin.*—The sanitary arrangements in the district are satisfactory. None of the diseases mentioned in the Abstract are at present prevalent.

OMAGH; *Fintona.*—The health of the district has in general been good during the past quarter, and, with the exception of a great many cases of catarrhal influenza, free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Gortin.*—Influenza very prevalent.

OMAGH; *Omagh, No. 1, W.*—Health of the district satisfactory, with exception of an epidemic of influenza. Housing of the working-classes improved. Regarding rural sanitary matters, the same apathy continues as in former reports. One death registered aged 104 years.

OMAGH; *Omagh, No. 2.*—This district is in good sanitary condition. There were a few isolated cases of enteric fever which were removed to hospital.

OMAGH; *Sixmilecross.*—The district is in very good sanitary condition this quarter; one case of enteric fever. We have had a severe epidemic of influenza.

STRABANE; *Plumb Bridge.*—Influenza and pneumonia were very prevalent during the quarter.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Kiltormer.*—The district is very healthy.

CLIFDEN; *Roundstone, No. 1.*—District very healthy.

GALWAY; *Galway, No. 3 (Arran).*—Health of district fairly good.

GALWAY; *Oranmore.*—The district at present is healthy.

GALWAY; *Spiddle.*—District continues very healthy.

GALWAY; *Turloughmore.*—Public health good.

GORT; *Ardrahan.*—The outstanding characteristic at present is the diminution in the incidence of cases of tuberculosis of lungs—the tubercular wave seems subsiding. There are, however, cases of chronic tuberculosis of bones (one case was that of an old age pensioner), or “cold” tuberculosis, with intermittent acute recrudescences when discharge occurs. Some of these cases ante-date for a very long period, in one case over fifty years; as a casual link in the chain of production this factor must be taken into account.

GORT; *Gort, W.*—The health of the district during the last quarter has been good.

GORT; *Kinvarra.*—An epidemic of bronchial catarrh among young children. The health of the district was otherwise good.

LOUGHREA; *Bullaun.*—There were six deaths registered at 66, 68, 75, 76, 80, and 81 years of age.

MOUNT BELLEW; *Killeroran.*—I had ten cases of acute polio-myelitis in my practice during the past half-year. Pulmonary tuberculosis is also prevalent at present.

OUGHTERARD; *Cloonbur, No. 1.*—Influenza very prevalent, principally with lung complications.

OUGHTERARD; *Lettermore.*—Influenza prevalent this quarter.

OUGHTERARD; *Oughterard, W.*—No deaths from cancer.

PORTUMNA; *Portumna, No. 1, W.*—The sanitary condition of the district is good.

TUAM; *Tuam, No. 1, W.*—Health of the district was good during the quarter, though influenza was fairly prevalent during month of March. Births and deaths up to the average.

TUAM; *Tuam, No. 2.*—Two cases of tuberculosis; two cases of cancer; one epithelioma of lip, which recurred after operation; and one tumour of stomach. District free from epidemic disease, except influenza, which was of a mild type.

Leitrim County.

BALLYSHANNON; *Kinlough.*—Of the 24 deaths registered 14 are over 65 years, six over 70, and seven over 80 years. One person reached the age of 88 years.

BAWNBOY; *Ballinamore.*—Influenza very prevalent.

CARRICK-ON-SHANNON; *Drumshanbo*.—Scarlet fever prevalent during the quarter in one division of the Drumshanbo Dispensary District.

MOHILL; *Carrigallen*.—The sanitary condition of the district was fairly good during the quarter. A pretty severe epidemic of influenza prevailed.

MOHILL; *Mohill, W.*—Influenza and pneumonia were prevalent in the district during the quarter. One person in the district lived to be 100 years.

MOHILL; *Rinn*.—The district, generally speaking, is healthy and free from epidemics.

MOHILL; *Rowan*.—Influenza was prevalent in the district during the outgoing quarter.

Mayo County.

BALLINA; *Ballina, W.*—Over 50 per cent. of the deaths registered during the quarter were not certified by a medical practitioner. Ten deaths from different forms of tuberculosis were registered, and three deaths from cancer. The laneways of the Urban District are not kept in a sanitary state. The erection recently of two public urinals by the Urban Council is a step, however, in the right direction.

BALLINA; *Crossmolina*.—District continues healthy. No infectious disease during quarter. Sanitary condition fair.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements good. There are still some houses that require whitewashing.

BALLINROBE; *Cong.*—The health of district fairly good.

BALLINROBE; *Hollymount*.—Deaths over and births under average. Bronchial and catarrhal affections were very prevalent, especially among the very young and the very old. Sanitary condition generally of this district has improved during the past year.

BELMULLET; *Binghamstown, W.*—District in a satisfactory state.

BELMULLET; *Knocknalower*.—During the past quarter two cases of enteric fever came under my notice. There was an epidemic of influenza, followed in many cases by pneumonia. One of the enteric patients has recovered, while the other is still undergoing treatment at the Belmullet Fever Hospital. The sanitary arrangements in the district are very defective, due to bad housing and the custom of keeping animals in the living apartments.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar, No. 1, W.*—One death was registered of a man aged 104 years, who retained the faculties of sight, hearing, and mind clear until two days previous to death.

CASTLEBAR; *Castlebar, No. 2*.—Three cases of scarlatina—one fatal—in same family.

CLAREMORRIS; *Ballindine*.—One death registered of a man aged 100 years.

CLAREMORRIS; *Ballyhaunis*.—Tuberculous, rheumatic, and respiratory affections have been abnormally prevalent during the quarter, and are, in my opinion, largely attributable to the abiding neglect of arterial drainage throughout the district. Great and progressive improvement is everywhere observable in the sanitary and general condition of the houses. There were three deaths from cancer (epithelioma).

CLAREMORRIS; *Claremorris, W.*—The health of the district is good. There is no epidemic disease.

KILLALA; *Killala, W.*—The health of the district during the quarter was satisfactory, and no infectious disease prevalent, with the exception of a severe form of gastritis, frequently accompanied by jaundice. The disease spread as an epidemic amongst children of school age, and some persons of advanced years also suffered.

SWINEFORD; *Swineford, W.*—There was one death from tubercular meningitis secondary to phthisis pulmonalis, and one death from laryngeal diphtheria. There were several cases of lobar pneumonia. Otherwise the district is healthy, free from epidemics, and in a good sanitary condition, notwithstanding the extreme poverty of some of the inhabitants.

WESTPORT; *Achill*.—Sanitary state will soon be much better as soon as manure is removed for crops, but is fair at present. General health good. No epidemic present.

WESTPORT; *Ballycroy*.—Weather extremely inclement during quarter. Influenza of a bronchitic type universal.

WESTPORT; *Islandeady*.—The sanitary arrangements of the district are good. There has been an epidemic of influenza frequently complicated by pneumonia.

WESTPORT; *Newport*.—One death from scarlatina and one from diphtheria registered; also three deaths from cancer. Vaccination very backward owing to bad weather and epidemic of influenza. Sanitation of town very bad.

WESTPORT; *Westport, W.*—A great deal of child sickness prevailed, presenting, I believe, an undescribed type of illness. It is infectious, accompanied by severe laryngitis and tracheitis, in addition to ordinary febrile symptoms.

Roscommon County.

ATHLONE; *Brideswell*.—Sanitation fair, but great difficulty experienced in getting people to comply with sanitation orders.

ATHLONE; *Kiltoom*.—The sanitary condition of district fairly satisfactory. The general health of people about the average. Some cases of measles occurring.

BOYLE; *Boyle, No. 1, W.*—Influenza was prevalent during the last month of the quarter.

BOYLE; *Keadew*.—Sanitary conditions improving. Bronchitis very prevalent among children during the quarter.

CARRICK-ON-SHANNON; *Aughrim*.—There was no case of infectious disease during the quarter, and, in fact, very little illness of any kind.

CASTLEREAGH; *Ballaghaderreen*.—There was a large amount of influenza in the district during the last quarter.

CASTLEREAGH; *Frenchpark*.—Influenza has been very prevalent during the quarter.

Sligo County.

DROMORE, WEST; *Easky, W.*—Health of district good. One death recorded at the age of 102 years.

SLIGO; *Ballymote*.—Influenza and colds very prevalent in district during last quarter. District otherwise healthy.

SLIGO; *Carney, No. 1*.—The sanitary conditions of the district are generally satisfactory. There has been a mild outbreak of scarlatina in the district; all have recovered.

SLIGO; *Collooney*.—A good many cases of scarlatina in district during the quarter. No deaths.

SLIGO; *Riverstown*.—Seven cases of scarlatina in two houses, and three cases of typhoid in one house, and one in another. There have been some cases of influenza during the quarter.

TOBERCERRY; *Aclare*.—The sanitary arrangements in the district are improving. No case of infectious disease occurred during quarter.

TOBERCERRY; *Coolaney*.—Sanitation satisfactory.

TOBERCERRY; *Tobercerry, W.*—The health of the district is pretty good.

1912.]
2nd Quarter.

[No. 194.

QUARTERLY RETURN
OF THE
MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

Price One Shilling.

Marriages:—JANUARY, FEBRUARY, MARCH, 1912.

Births and Deaths:—APRIL, MAY, JUNE, 1912.

During the quarter ended 30th June last, there were registered in the 828 Registrars' Districts in Ireland 26,546 births—a number equal to an annual birth-rate of 24·3 in every 1,000 of the estimated population*—and 18,602 deaths, representing an annual rate of 17·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 12,772 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 23·9 in every 1,000 of the estimated population, and the death-rate 12·7 per 1,000.

The birth-rate in Ireland for the quarter is 0·1 below the average rate for the corresponding quarter of the ten years, 1902–1911, and also 0·1 below the rate for the second quarter of 1911. The deaths are 73 under those registered in the corresponding quarter of 1911; the death-rate is 0·1 under the rate for that quarter, and 1·2 under the average for the second quarter of the ten years, 1902–1911.

Compared with those for the corresponding quarter of 1911, the returns of pauperism furnished by the Local Government Board show a decrease of 842 in the average number of Workhouse inmates on Saturdays during the quarter, but an increase of 755 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years, 1902–1911, the number of Workhouse inmates shows a decrease of 5,470, and the number of persons on out-door relief shows a decrease of 14,936, the total under both heads being 20·8 per cent. under the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·4 per cent.

* See page 138.

The annual marriage-rate (6·1 per 1,000 of the population) represented by the marriages registered during the first quarter of 1912, is 0·1 below the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st March, 1912, and by the BIRTHS and DEATHS registered in the Quarter ended 30th June, 1912.

* The rates for the total of Ireland and for the county boroughs of Dublin, Belfast; and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year, Census 1911 (unrevised figures); those for Antrim and Down according to the Census of 1901, and those for the provinces and remaining counties on the population according to the Census of 1911 (unrevised figures). See note (*) page 93.

† Exclusive of Belfast Co. Borough.

MARRIAGES.

The Marriages (6,654) registered in Ireland during the first quarter of 1912 are equivalent to an annual rate of 6·1 per 1,000 of the estimated population, being 0·5 below the rate for the corresponding quarter of 1911, and 0·1 below the average rate for the first quarter of the ten years 1902–1911. Of the total number of marriages, 5,378 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,276 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 6·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·5 per 1,000 of the members of all other religious persuasions. The rate under the former heading is equal to, and that under the latter heading 0·4 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1902–1911, and the average number for that period; also the number registered in the first quarter of 1912.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,546—13,571 boys and 12,975 girls—being equal to an annual ratio of 1 in every 41.2, or 24.3 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1902–11, was 26,797, equivalent to an annual rate of 24.4 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24.4 per 1,000 of the population according to the Census of 1911; Munster, 23.2; Ulster, 25.5; and Connaught, 22.4.

The highest county or county borough birth-rate* is 31.3 for Dublin county borough, and the lowest 18.8 for Dublin County. Of the intermediate rates the highest five are—Belfast county borough, 30.8; Londonderry county and county borough, 24.8; Mayo, 24.7; Limerick county and county borough, 24.6, and Kerry 24.5. The lowest five are—Roscommon, 19.5; Sligo, 19.9; King's, 20.7; Cavan, 20.9; and Longford, 21.0.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 18,602—9,223 males and 9,379 females—affording an annual ratio of 1 in every 58.8, or 17.0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1902–11, was 18.2 per 1,000.

The death-rate in Leinster was 19.5 per 1,000 of the population according to the Census of 1911; in Munster, 15.8; in Ulster, 17.6; and in Connaught, 14.5.

The county or county borough death-rates* range from 13.5 in Kildare to 24.5 in Dublin county borough. Between these rates the lowest five are—Kerry, 13.7; Galway, 13.7; Queen's, 14.1; Mayo, 14.4; and Clare, 14.6, and the highest five are—Armagh, 20.3; Monaghan, 19.0; Tyrone, 18.6; Londonderry county and county borough, 18.5; and King's, 17.9.

See note () on page 76.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1902–1911, and the average number for that period; also the number registered during the first and second quarters of the year 1912 :—

YEAR.	BIRTHS.					DEATHS.

Equivalent Annual Rate per 1,000 living :—										
Average, 1902–1911,	23·7	24·4	23·1	22·1	23·3	20·2	18·2	14·4	16·4	17·3
1912,	24·2	24·3	—	—	—	19·5	17·0	—	—	—

AGES.—Of the 18,602 deaths registered last quarter, 2,103, or 11·3 per cent., were of infants under one year of age; and 7,476 or 40·2 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 79·2 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 12·8 per cent. of the total deaths registered therein; in Munster, 10·4 per cent.; in Ulster, 11·9 per cent.; and in Connaught, 7·5 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 33·4 per cent.; in Munster, to 42·9 per cent.; in Ulster, to 40·5 per cent.; and in Connaught, to 50·8 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 903, and is equivalent to an annual rate of 0·83 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the June quarter of 1912, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1907–1911.

Name of Disease.	Number of Deaths in June quarter, 1912.	Average number of Deaths in June quarter of the 5 years, 1907–1911.
Enteric Fever,	56	65
Typhus,	10	18
Small-pox,	—	—
Measles,	182	207
Scarlet Fever,	74	34
Whooping-cough,	294	284
Diphtheria,	81	77

* See note (†) on page 83.

ENTERIC FEVER.—The deaths were 56 in number as compared with 65, the average for the corresponding quarter in the 5 years, 1907-1911. In each of the 3 preceding quarters deaths from enteric fever were 86, 99, and 64. The 56 deaths correspond to an annual rate of 0·05 per 1,000 of the population of Ireland estimated to the middle of the year 1912. The abstracts commencing on page 92 give the details of the deaths as regards the locality, registrars' districts, etc., in which these occur. Eight of the total deaths appertained to Dublin county borough.

TYPHUS.—Of 10 deaths from typhus, one belonged to Ballina union, one to Ballymahon, one to Borrisokane, one to Cootehill, one to Macroom, one to Monaghan, one to Sligo, 2 to Tuam, and one to Waterford. The average number of deaths from typhus in the corresponding quarter of the 5 years 1907-1911 is 18 for the whole of Ireland.

SMALL-POX.—There was no record of death from small-pox during the period under notice.

MEASLES.—Altogether 182 deaths from measles were registered; this figure is below the average, 207, and corresponds to an annual rate of 0·17 per 1,000. In the preceding 3 quarters, deaths from measles numbered 55, 75, and 97 respectively. It may be seen in Abstract I. that of the total deaths, 148 belonged to Dublin county borough and 20 to the county of Dublin.

SCARLET FEVER.—The number of fatalities from scarlet fever was 74, the average being 34; the former figure is equivalent to an annual rate of 0·07 per 1,000. In the 3 quarters immediately preceding, deaths from scarlet fever were respectively 47, 100, and 65. Of the total deaths 16 appertained to Dublin county borough, and among others there were 6 deaths in Lisburn union, 5 in Middleton, and 4 in Galway union.

WHOOPING-COUGH.—Deaths from whooping-cough decreased to 294 from 353 in the quarter preceding, in which the number had increased from 149 in the December quarter of 1911. The deaths are over the average (284) and equal to an annual rate of 0·27 per 1,000.

There were 57 deaths in Leinster, of which 18 belonged to Dublin county borough; there were 29 in Munster, of this number 15 were in Cork county and county borough, and 11 belonged to Limerick county and county borough; there were 206 deaths in Ulster, ranging from 7 deaths in Cavan to 74 in Belfast county borough. There was no death from whooping-cough registered in Fermanagh.

There were only 2 deaths from whooping-cough reported from the whole of the province of Connaught, one in Belmullet and one in Westport union.

DIPHTHERIA.—In the September quarter of 1911 there were 76 deaths from diphtheria; the figure rose to 97 in the following period and again to 105 in the March quarter of the present year, declining to 81, equalling a rate of 0·07 per 1,000 in the quarter under notice, the average being 77. Of 36 deaths registered for Leinster, 13 belonged to county Dublin and 16 to the city of Dublin; there were 14 deaths in Munster; of 26 deaths in Ulster, 9 belonged to the county of Down. There were only 5 deaths from diphtheria reported from the province of Connaught.

DIARRHOEAL DISEASES.—In the aggregate, deaths from diarrhoeal diseases numbered 206, as compared with 209 in the quarter preceding; the former includes 6 deaths from dysentery, 165 deaths from diarrhoea and *enteritis* of children under 2 years old, and 35 deaths from diarrhoeal diseases of persons over 2 years of age.

TUBERCULOSIS.—As returned by the Registrars, deaths from all forms of tuberculosis numbered 2,664, as compared with 2,675 returned in the corresponding period of 1911. the deaths during the quarter under notice represent a rate of 2·44 per 1,000 of the estimated population.

The following notes on the status of the country with reference to public health and tuberculosis, as kindly furnished by the respective Registrars, are here presented.

South Dublin ; Crumlin.—“ I find the nurse provided for the district by the Women’s National Health Association the greatest help in every way.”

Granard ; Scrabby, No. 2.—“ Health of the district good, and free from infectious disease. Although some deaths from tuberculosis occurred during the January quarter, no further cases of this disease have since come under my notice. People are wonderfully improved in the matter of cleanliness, and are becoming keenly alive to the necessity of admitting fresh air into their homes.”

Trim ; Summerhill.—“ Four out of the twelve deaths having been caused by tuberculosis is not a favourable report to have to make.”

Limerick ; Bridgetown.—I would recommend that the Tuberculosis Notification Act be enforced in the district.”

Limerick ; Caherconlish.—“ Two cases of phthisis, both uncertified, one a returned American.”

Limerick ; Limerick, No. 3.—“ Five deaths from pulmonary tuberculosis and two deaths from other forms of tuberculous disease.”

Callan ; Mullinahone.—“ One death registered from pulmonary tuberculosis, I believe the last member of a family all of whom died of it.”

Ballycastle ; Cushendall.—“ Sanitary arrangements excellent. No infectious disease of any kind. Not a case of tuberculous disease of any form in the district.”

Enniskillen ; Holywell, No. 2.—“ The sanitary condition of the district is fairly good as regards drainage. Lighting and flooring of most houses are defective. I would recommend much larger windows to open from the top, and the earthen floors, which are uneven, damp, and filthy, to be replaced by concrete, which is cheap and easily cleaned. This would, I believe, tend to promote the health of families.”

Londonderry ; Burt.—“ A dismantled fort on Inch Island with good modern buildings would make a sanatorium.”

Lisburn ; Saintfield.—“ Tuberculous cases increasing, three deaths out of seven being from this cause.”

Newtownards ; Newtownards.—“ No notifications have been received by me during the quarter under the Notification of Infectious Diseases Act. Eleven cases were notified under the Tuberculosis Prevention (Ireland) Act. The general health of the district has been good. We have had the reservoir covered so as to protect the water supply from the action of the sun. It was finished only at the beginning of June. There therefore was no time to collect a reserve supply for dry weather. The wet weather however, has, relieved the situation. I have every hope that the general health of the people will now improve owing to the good water supply and also to our new system of sewers. The sanitary authority is urging the people to connect their drains with these new sewers. Some domestic scavenging has been done by the sanitary authority, which is, I am glad to say alive keenly to the necessity for sanitary reforms.”

Irvinestown ; Irvinestown.—“ Two deaths registered from pulmonary tuberculosis ; of these one returned from America suffering from the disease, the other has a family history of tuberculosis, and mother and sister died within past two years, one pulmonary tuberculosis, the other tuberculous meningitis.”

Claremorris ; Ballyhaunis.—“ Sanitation still progressive. As regards the exceptional prevalence of rheumatic and tuberculous diseases, I don't expect much improvement whilst arterial drainage remains neglected, constituting an abiding menace to the health and prosperity of the inhabitants.”

Castlereagh ; Loughglinn.—“ The unusually wet winter has much increased the number of chest affections, especially that of pulmonary tuberculosis. The four cases were among the well-to-do, so that the climate evidently played a greater part than privation and want of air.”

CANCER.—845 deaths from cancer were returned as compared with 779 in the corresponding period of the year 1911 ; the former number is equal to an annual rate of 0·77 per 1,000.

VIOLENCE.—This title includes deaths from accident, negligence, homicide and suicide ; these numbered 188 as compared with 221 in the June quarter of the year preceding.

The Registrars, in their Notes, report the presence of the following diseases :—

Measles in 11 districts, scarlet fever in 34, whooping-cough in 41, diphtheria in 13, enteric fever in 11, influenza in 19, mumps in 4, typhus in 6, German measles in 3, and chicken-pox in 2 districts. [See Appendix to this Report commencing on page 139.]

INQUESTS.—There were 382 inquests reported to the Registrars during the quarter ; this number being equal to 1 in every 49 of the total deaths registered.

In Leinster there was 1 inquest to every 42 deaths registered, in Munster 1 to 62, in Ulster 1 to 41, and in Connaught 1 to 130.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 18,602 deaths registered, 3,769, or 20·3 per cent., occurred in public institutions. In Leinster the percentage was 28·9, in Munster 23·4, in Ulster 14·2, and in Connaught 12·3.

UNCERTIFIED DEATHS.—According to the returns, 4,338 of the 18,602 deaths which were registered during the quarter were uncertified, being over 23 per cent. of the total. In Leinster the percentage was 16, in Munster 26, in Ulster 19, and in Connaught the uncertified deaths were 50 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1912, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Percentage of Total Deaths.	Number in every 100,000 of the Population.

(a) Including one death from cerebro-spinal meningitis.

(a) Including one death from *cerebro-spinal meningitis*.
(b) Including the deaths of 5 persons from scarlet fever, 4 from diphtheria, one from enteric fever, and one from tuberculous disease, admitted from the City of Belfast to the hospital for infectious diseases at Purdysburn, in the Registrar's District of Ballylesson, and Union of Lisburn, and the death of one person from *cerebro-spinal meningitis* registered in Belfast.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, and diarrhoeal diseases.

‡ In the cases of the Dublin Registration Area, Belfast and the urban districts containing a population of over 10,000 in 1901, the population given is according to the Census of 1911 (unrevised figures), and in the other urban districts according to the Census of 1901; the rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1912.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1912, there were 26,587 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th June last was 12,772 (6,841 males and 5,931 females), being 1,878 less than in the corresponding quarter of the year 1911, and 2,323 below the average number for the second quarter of the ten years 1902–1911.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May and June in 1911 and 1912 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1911.	1912.	In-crease.	De-crease.	1911.	1912.	In-crease.	De-crease.	1911.	1912.	In-crease.	De-crease.
April, ..	4,065	2,929	—	1,136	3,281	2,754	—	527	7,346	5,683	—	1,663
May, ..	2,862	2,617	—	245	2,260	2,103	—	157	5,122	4,720	—	402
June, ..	1,298	1,295	—	3	884	1,074	190	—	2,182	2,369	187	—
TOTAL,	8,225	6,841	—	1,384	6,425	5,931	—	494	14,650	12,772	—	1,878

* Including 9,196 emigrants to the United States of America, viz. :—4,524 in the month of April, 3,338 in May, and 1,334 in June. Of 8,489 steerage passengers, 2,933 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $6\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1911 the average price was $6d.$, and in the corresponding quarter of 1902 it was $5\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 15s. 0d. per cwt. For the corresponding quarter of the year 1911 the average price was 14s. 0d., and for the second quarter of 1902 the average price was 14s. 8d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. 4d. to 4s. 5d. In the second quarter of 1911 the average prices were 4s. 3d. to 5s. 0d., and the prices for the corresponding quarter of 1902 were 2s. 7d. to 3s. 7d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 64s. 6d. to 69s. 6d. per cwt. In the corresponding quarter of 1911 the average prices were from 58s. 6d. to 62s. 6d., and in the second quarter of 1902 they were from 58s. 0d. to 63s. 0d.

The price (including cartage) of Whitehaven coal in the City of Dublin from 17th April to the end of the quarter ranged from 24s. to 27s. per ton nett. Owing to the coal strike, no fixed prices were current in the earlier part of the quarter.

The highest price of Consols at the Dublin Stock Exchange for the quarter was $78\frac{1}{4}$ and the lowest $75\frac{1}{8}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter was 4 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1912 was 37,184, or 842 below the average for the corresponding period in 1911.

The average weekly number of persons receiving out-door relief during the quarter was 40,355, being 755 above the average for the second quarter of 1911.

Of the persons receiving in-door relief during the second quarter of 1912, an average number of 1,655 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1911 the average weekly number was 1,640.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1912, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									No. of PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			Out-door.			
	(a)	(b)							In-door.	Ordinary relief.	By means of works devised for the relief of distress.	Total Out-door.

(a) Messrs. Bolands, Limited.
(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.
NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the second

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1907 to 1912, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 88).

The mean height of the barometer during the second quarter of 1912 was 29·979 inches, being 0·192 above the average for the corresponding quarter of the five years 1907–1911; the highest reading (30·501 inches) was on the 14th April, at 9 A.M., wind W.S.W., and the lowest (29·378 inches) on the 4th June, at 9 A.M., wind W.S.W.

The mean temperature of the air during the quarter was 50·8°, being 1·0° above the average for the second quarter of the 5 years 1907–1911.

The maximum temperature of the air during the quarter was 68·4° and the minimum 27·0°. The maximum heat in sun was 125·0°.

Rain or snow fell on 45 days during the quarter. The rain-fall measured 5·660 inches, being 1·177 inches below the average for the second quarter of the five years 1907–1911. The greatest monthly rainfall was in June, when 3·395 inches were registered.

The wind blew on 29 days from W., on 13 days from E., on 8 days from S., on 7 days from N., on 7 days from S.W., on 2 days from N.E., on one day from S.E., on one day from N.W., and the air was calm on 23 days at 9 A.M.

April.—The mean height of the barometer during this month was 30·187 inches; the highest reading (30·501 inches) was on the 14th, at 9 A.M., wind W.S.W.; and the lowest (29·618 inches) on the 8th, at 9 A.M., wind W.S.W. The mean temperature of the air was 46·5°, the maximum registered was 62·9°, and the minimum 27·0°. The 6th was the warmest day, and the 17th the coldest night. The mean of the dry bulb was 47·1°, and of the wet bulb, 44·8°. The maximum heat in the sun was 110·1°, and the minimum on the grass 25·6°. The total amount of sunshine recorded was 179·5 hours, the greatest daily amount being 12·6 hours on the 23rd. The minimum on the grass was below 30° on 13 nights. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·4. Rain or snow fell on 6 days. The rain-fall measured 1·080 inches; the greatest amount in 24 hours was 0·680 inch on the 21st.

May.—The mean height of the barometer during this month was 29·975 inches; the highest reading (30·399 inches) was on the 25th, at 9 A.M., wind N.N.W., and the lowest (29·558 inches) on the 15th, at 9 P.M., wind W. The mean temperature of the air was 51·5°, the maximum registered was 68·2°, and the minimum 31·0°. The 27th was the warmest day, and the 25th the coldest night. The mean of the dry bulb was 51·6°, and of the wet bulb 48·9°. The maximum heat in sun was 122·0°, and the minimum on the grass 25·6°. The total amount of sunshine recorded was 158·9 hours, the greatest daily amount being 14·5 hours on the 25th. The minimum on the grass was below 30° on 5 nights. The maximum ozone was 0·6; the minimum 0·0, and the mean 0·3. Rain or snow fell on 16 days. The rain-fall measured 1·185 inches; the greatest amount in 24 hours was 0·480 inch on the 19th.

June.—The mean height of the barometer during this month was 29·774 inches, the highest reading (30·037 inches) was on the 26th at 9 P.M., wind W., and the lowest (29·378 inches) on the 4th, at 9 A.M., wind W.S.W. The mean temperature of the air was 54·4°; the maximum registered was 68·4°, and the minimum 37·8°. The 25th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 55·2°, and of the wet bulb 52·7°. The maximum heat in sun was 125·0°, and the minimum on the grass 33·0°. The total amount of sunshine recorded was 140·3 hours, the greatest daily amount being 11·9 hours on the 1st. On no night was the minimum on the grass below 30°. The maximum ozone was 0·6, the minimum 0·1, and the mean 0·4. Rain or snow fell on 23 days. The rain-fall measured 3·395 inches; the greatest amount in 24 hours was 0·360 inch on the 9th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.

In compiling the following Table (pp. 90-91*a*), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South, the former being represented by eight stations and the latter by nineteen.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

STATION.	OBSERVER.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point	Do.
Markree Castle,	J. R. Armstrong, for Captain Cooper.
Donaghadee,	Meteorological Office.
Armagh, The Observatory,	J. L. E. Dreyer, PH.D.
Belfast, Queen's College,	John Wylie, B.A.
Dunfanaghy,	J. J. MacGrath, Esq., M.D.
Newtownforbes,	J. A. Boyle, Esq.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Dublin (Trinity College),	C. D. Clark, Esq.
Dublin, Phoenix Park,	Lt.-Col. C. C. J. Pery, R.E.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, PH.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Limerick, Mungret College,	Rev. W. O'Leary, S.J.
Dublin, Glasnevin,	Sir F. W. Moore, M.R.I.A.
Kingstown,	J. S. Vaughan, Esq., LL.D.
Clongowes Wood College,	Rev. C. J. Byrne, S.J.
Mountmellick,	W. A. Robinson, Esq.
Newcastle, County Wicklow,	C. D. Hanan, Esq., M.B.
Kilkenny,	E. Sutton, Esq.
Cahir,	R. W. Smith, Esq.
Wexford,	C. Bain, Esq.
Foynes,	J. J. Alcorn.
Ballinacurra,	J. H. Bennett, Esq.

NOTES ON THE STATISTICAL TABLES.

The letters *a* and *p* indicate whether the readings of the maximum and minimum thermometers are taken at the hours of morning or evening observations.

Barometer.—The correction for **latitude** has been applied to all the values. The values at sea-level have been corrected for diurnal variation by using the average difference for the month between the mean of the combination of hours shown and the true mean for the 24 hourly observations at the observatories.

Rainfall.—The amounts are those for the 24 hours commenced at the time of morning observation.

Hygrometer.—At certain stations the vapour pressure and the relative humidity are the results obtained from the daily values. These are entered in clarendon type. At other stations the calculations are made from the monthly means of the dry and wet bulb readings.

Weather Phenomena.—The number of days of **Precipitation, Snow, Hail, Thunderstorm, Fog, Ground Frost, and Gale**, are counted irrespective of the hours at which the phenomena occur. Except in the cases of rainfall (see above) and ground frost the day is the civil day. A day is reckoned as a day of "**clear sky**," if the mean of the estimates of the "amount of cloud" at the fixed hours of observation is **less** than 2, and as an "**overcast**" day if the mean is **greater** than 8. A night is counted as a "Night of Ground Frost" if the minimum on the grass has sunk to 30° or less.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia, Dublin (Phoenix Park), and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The normal averages used for stations are—Pressure, Temperature, and Rainfall for the 35 years 1871-1905; Bright Sunshine for the 25 years 1881-1905. The values are published in Appendix III. to the Weekly Weather Report for 1906. Monthly averages of pressure at telegraphic reporting stations for the epoch 7 a.m. are published in Appendix I. to the Daily Weather Report. These averages for the 35 years, 1871-1905, have been corrected for diurnal variation and the values in the column "difference from the normal" have been obtained by using these corrected averages with the results for Pressure at Sea Level.

Valencia.—The figures quoted in the second line assigned to this observatory in the columns for Barometer and Mean Temperature are the true daily means computed from the hourly tabulations of the traces of the photographic recording instruments.

¶ **Mean Values for Districts.**—The stations used in the Weekly Weather Report for the computation of "district values" of rainfall and temperature are distinguished by the sign ¶, those used for the computation of "district values of bright sunshine" by the sign §. The monthly mean values for districts given in this Report for maximum, minimum, and mean temperature, duration of bright sunshine, number of rain days, and amount of rainfall, are computed from the data for these "representative" stations. The mean temperature for districts is computed in the manner shown in the preface to volumes of the Weekly Weather Report. The monthly mean values for districts for "amount of cloud" are computed from the data for all stations. The extreme values of the various elements in each district are printed in distinctive type. The averages for districts with which the current values are compared are for the 25 years 1881-1905, as in the case of the corresponding values published in the Weekly Weather Report. The "district values" for Earth Temperature are obtained from the data for all stations in Tables A and B. The averages are for 5 years 1907-1911.]

(a) See note (c), page 30.
* The Registrars' Districts (828 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 103 and 104 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 1st April, 1912 to 29th June, 1912. With the exception of 124 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

Exclusive of 13 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.
I. PROVINCE OF LEINSTER—continued.

The Deaths registered during the Quarter are stated by the Registrars to include																						
Deaths:		Births:	Population in Statute Acres. 1901.	Registrars' Districts:	Deaths from														Inquest Cases.	Deaths in Public Institutions.	Number of Un-certified Deaths.	Number of successful Vaccinations in the Quarter ending 30th June, 1912.
Averages in the Quarters ending 30th June in the 10 years, 1902-1911.	Registered in the Quarter ending 30th June, 1912.				Deaths of																	
No.					Persons aged 65 years and upwards.	Infants under 1 year of age.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.	Diarrhoea and Enteritis of Children under 2 years of age.	Diarrhoea, 2 years of age and upwards.	Violence.

NOTE.—This table has been constructed for the years 1838 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1912.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—An epidemic of whooping-cough occurred in the Hacketstown portion of the district; four deaths registered from the disease.

CARLOW; *Bagenalstown*.—The district is healthy.

CARLOW; *Borris*.—Sanitary arrangements in the district good.

CARLOW; *Fenagh and Myshall*.—Seven out of the nine deaths registered were of persons over seventy. Two were registered at ninety. One case of scarlet fever occurred in the district during the quarter.

CARLOW; *Leighlinbridge*.—June very wet; thunderstorms frequent; cold at night; hailstorms prevalent in local showers. Health of district good. The child who died of tuberculosis was delicate since birth. The disease was hereditary.

NEW ROSS; *St. Mullins*.—Sanitary arrangements in the district good.

Dublin County.

BALROTHERY; *Kilsallaghan*.—The health of district was good during past quarter and free from infectious diseases.

CELBRIDGE; *Rathcoole*.—Some cases of whooping-cough, mild form.

SOUTH DUBLIN; *Clondalkin*.—There was a large outbreak of measles, the infection spreading rapidly through the schools. There were three deaths; two from convulsions, and one from bronchopneumonia. There was also one case of diphtheria which was sent to hospital and is now doing well. The general health of the district otherwise is good.

SOUTH DUBLIN; *Crumlin*.—The condition of the district from the point of view of health and sanitation calls for no special comment. I find the nurse provided for the district by the Women's National Health Association the greatest help in every way.

RATHDOWN; *Blackrock and Stillorgan No. 2*.—Scarlatina and measles in the district during quarter.

Dublin County Borough.

DUBLIN NORTH; *North City No. 2*.—Health of this district very good except for scattered cases of scarlatina.

SOUTH DUBLIN; *New Kilmainham*.—The sanitary condition of the district is very much improved. A good many insanitary houses have been destroyed and the drainage very much improved.

Kildare County.

ATHY; *Castledermot*.—Influenza prevalent in May. District otherwise very healthy.

CELBRIDGE; *Celbridge W.*—District very healthy.

CELBRIDGE; *Kilcock*.—One of the children (aged 8 years) who died from measles was also suffering from pulmonary tuberculosis (2 months).

CELBRIDGE; *Maynooth*.—District very healthy.

EDENDERRY; *Carbury*.—A few cases of measles, and a great many cases of German measles during June.

NAAS; *Ballymore Eustace*.—The death-rate for the quarter was low. Two cases of scarlatina occurred; they were immediately removed to hospital and usual precautions taken.

NAAS; *Naas and Carragh, W.*—A few cases of scarlatina (of a mild type) in the rural district.

Kilkenny County.

CALLAN; *Callan, W.*—No cancer. Two deaths were registered from tuberculosis.

CARRICK-ON-SUIR; *Pilltown*.—The health of district up to usual standard which is very good.

CASTLECOMER; *Ballyragget*.—General health of district good, and free from infectious disease.

CASTLECOMER; *Castlecomer, W.*—The district is in a healthy state.

KILKENNY; *Freshford.*—The health of the people has been remarkably good during the quarter.

KILKENNY; *Gowran.*—Sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin.*—Health of this district very good.

KILKENNY; *Tullaroan.*—Health of the district continues good.

NEW ROSS; *Dysartmoon.*—The sanitary arrangements in this district are in a satisfactory condition, and it is at present free from any infectious disease.

THOMASTOWN; *Inistioge.*—Three deaths from phthisis were registered during the quarter; otherwise the district is fairly healthy.

THOMASTOWN; *Knocktopher.*—District in a very healthy condition.

URLINGFORD; *Balleen.*—Health of the people remarkably good.

URLINGFORD; *Urlingford, W.*—Health of the district good. No epidemics, except eight cases of enteric fever which were treated in Fever Hospital and did not spread further.

King's County.

BIRR; *Banagher.*—The sanitary arrangements of the district are satisfactory. Of the 14 deaths registered the aggregate age of 8 of them is 630 years, or over 78 years each. Of the uncertified deaths, all were over 70 years old.

BIRR; *Birr, W.*—There is some increase in the number of cases of tuberculosis; otherwise the health of the district is good.

BIRR; *Killyon.*—Health of district good.

BIRR; *Kinnitty.*—Epidemic of scarlatina in last month of quarter in one portion of district. Schools disinfected and closed. One death, not yet registered. Health of district otherwise fair.

MOUNTMELICK; *Clonygowan, No. 2.*—District healthy.

ROSCREA; *Roscrea No. 2.*—Two cases of scarlatina occurred in the district during the quarter. District otherwise healthy.

ROSCREA; *Shinrone.*—One death from pulmonary tuberculosis, patient sent from Liverpool in a dying condition. District healthy. The largest number of births registered for over 20 years.

TULLAMORE; *Clara.*—District in good sanitary condition.

TULLAMORE; *Killoughy.*—Tuberculous disease is not prevalent in this district.

TULLAMORE; *Philipstown.*—District healthy; three of the eleven deaths registered were at the advanced ages of 100, 85, and 84 years.

Longford County.

BALLYMAHON; *Abbeyshrule.*—Of the 22 deaths registered nine were aged from 70 to 86, and one 100 years.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinallee.*—The district is in a fair sanitary condition and free from contagious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Scrabby, No. 2.*—Health of the district good and free from infectious disease. Although some deaths from tuberculosis occurred during the January quarter, no further cases of this disease have since come under my notice. People are wonderfully improved in the matter of cleanliness, and are becoming keenly alive to the necessity of admitting fresh air into their homes.

Louth County.

ARDEE; *Castlebellingham.*—District very healthy.

ARDEE; *Collon, No. 1.*—District healthy.

ARDEE; *Dunleer.*—District healthy.

DUNDALK; *Dromiskin.*—District in healthy state.

Meath County.

DROGHEDA; *St. Mary's.*—The sanitary state of the district is good.

DUNSHAUGHLIN; *Killeen.*—Sanitary condition improving. Pertussis and chicken-pox very prevalent. Pulmonary tuberculosis becoming much less. Lobar pneumonia occurred in an epidemic form and accounted for 3 deaths. One case of acute septicaemia treated successfully by two injections of 20 cc. antistreptococci serum.

DUNSHAUGHLIN; *Rathoath.*—District is in good sanitary condition.

EDENDERRY; *Ballyboggan.*—Some cases of German measles during quarter.

KELLS; *Moynalty.*—The district has been free of zymotic diseases during the quarter.

KELLS; *Nobber.*—Health of district good. Deaths registered are 50 per cent. less than the average for corresponding quarters of the past 8 years. Fine longevity, as 6 of the 8 deaths recorded average 74·8 years, a plain proof of the observance of sanitation.

NAVAN; *Painestown.*—Influenza of severe type prevalent during quarter. Diphtheria occurred in one house. A case of typhoid fever in a school-girl occurred without its origin having been traced.

OLDCASTLE; *Oldcastle, W.*—The sewerage of the town of Oldcastle is very defective.

TRIM; *Summerhill.*—Four out of the twelve deaths having been caused by tuberculosis is not a favourable report to have to make.

Queen's County.

ABBEYLEIX; *Ballinakill.*—District healthy.

ABBEYLEIX; *Rathdowney.*—The sanitary arrangements in district are good. Health of district good during past quarter.

MOUNTMELICK; *Clonaslee.*—The sanitary arrangements in my district are good.

MOUNTMELICK; *Clonygowan*, No. 1.—District healthy.

MOUNTMELICK; *Mountrath*.—District healthy.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—District in very good sanitary condition

BALLYMAHON; *Ballymore*.—Health of the district good. No pulmonary tuberculosis.

MULLINGAR; *Ballynacarrigy*.—There has been an abnormally high birth-rate for the months of April and May.

MULLINGAR; *Castletown Geoghegan*.—One case of scarlatina occurred in the district. The case was sent to hospital and place thoroughly disinfected. I saw no other case.

MULLINGAR; *Killucan*.—There were nine cases of scarlatina during the month of April. All the cases recovered and the disease was confined to three houses in a small area; so it made isolation easy and it ran its course without spreading.

MULLINGAR; *Milltown*.—There were two deaths from tuberculosis during the quarter—one from pulmonary tuberculosis, and one from tuberculous meningitis at 42 years, and 7 years respectively. There was one death from cancer.

MULLINGAR; *Mullingar*, W.—Health of district good.

MULLINGAR; *Multyfarnham*.—Sanitary state of district good.

TULLAMORE; *Kilbeggan*.—Sanitary arrangements quite satisfactory. No zymotic diseases during quarter, but few cases of tuberculosis have been noticed and of these all were pulmonary, one acute in type.

Wexford County.

GOREY; *Camolin*.—Sanitary arrangements perfect.

NEW ROSS; *Fethard*, No. 1.—The sanitary condition of the district continues satisfactory.

NEW ROSS; *Fethard*, No. 2.—District healthy.

WEXFORD; *Bannow*.—The sanitary condition of the district is fairly satisfactory.

Wicklow County.

BALTINGLASS; *Baltinglass*, No. 1, W.—Several cases of influenza during the quarter.

BALTINGLASS; *Dunlavin*.—A healthy quarter.

BALTINGLASS; *Kiltegan*.—I beg to report there was during the quarter one death from diphtheria in this village, phthisis and cancer also claiming a victim each in other parts of district.

NAAS; *Blessington*.—Bronchitis prevalent during the quarter; otherwise the district very healthy.

RATHDOWN; *Bray* No. 1.—Births and deaths about the average.

RATHDOWN; *Delgany*.—Health of the district good.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Aughrim*.—Sanitary arrangements etc., satisfactory.

RATHDRUM; *Newcastle*.—District healthy. Whooping-cough and German measles (both of a mild type) were prevalent during past two months.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan*, W.—Health of district continues good.

CORROFIN; *Corrofin*, W.—District on the whole was healthy and very free from zymotic diseases.

ENNIS; *Crusheen*.—Health of district good.

ENNIS; *Newmarket*.—The health of the district generally was satisfactory. Whooping-cough of a mild type prevailed.

ENNISTIMON; *Roadford*.—District in a very good sanitary condition. No contagious disease.

KILLADYSERT; *Ballynacally*, W.—A death registered at 104 years.

KILLADYSERT; *Labasheeda*.—Health of the district continues good.

KILRUSH; *Carrigaholt*.—Health of district very good.

KILRUSH; *Kilkee*.—Sanitary state of district fairly good.

KILRUSH; *Kilrush*, W.—The health of the district is reported "good" by Medical Officer.

LIMERICK; *Bridgetown*.—There were four deaths registered from pulmonary tuberculosis. I would recommend that the Tuberculosis Notification Act be enforced in the district.

LIMERICK; *Coolacasey*.—The district was very healthy during the quarter. One case of cancer has been registered.

SCARRIFF; *Feakle*.—Health of district good.

SCARRIFF; *Mountshannon*, W.—District continues in a healthy state.

SCARRIFF; *Quin*.—The sanitary condition of district fair. No epidemic of any kind in district.

Cork County and County Borough.

BANDON; *Inishannon*.—District healthy. One of the deaths from phthisis occurred over a year back, but was registered only recently on Registrar General's authority.

BANDON; *Kilbrittain*.—District very healthy.

BANTRY; *Bantry*, W.—The sanitary condition of district is fairly good. One case of carcinoma.

BANTRY; *Durrus and Kilcrohane*.—District healthy. Sanitary arrangements fairly good. One case of tuberculosis registered (general). No case of cancer. Three of total deaths registered were 86, 80, and 74 years.

BANTRY; *Glengarriff*.—District healthy. There were a few cases of jaundice in children, the source of origin I could not very well ascertain.

BANTRY; *Kealkill*.—Sanitary condition of district good. No infectious diseases.

CASTLETOWN; *Kilcatherine*.—District healthy. No case of cancer.

CLONAKILTY; *Clonakilty*.—There were a few cases of fever (supposed typhus) in urban district sent to hospital, premises disinfected (in May), no further spread of disease. Whooping-cough prevalent during quarter, two deaths.

CLONAKILTY; *Rosscarbery*.—Whooping-cough was prevalent in the district during the quarter.

CLONAKILTY; *Timoleague*.—There was an epidemic of whooping-cough during the last month of quarter in district. I also saw a few cases of chicken-pox.

CORK; *Carrigaline No. 1*.—The district is as usual very healthy.

CORK; *Dripsey*.—The sanitary condition of the district is fairly good. There are some cases of mumps.

CORK; *Whitechurch*.—District healthy.

DUNMANWAY; *Coolmountain*.—The general health of the district is good. There has been no case of infectious disease. Birth-rate high, and number of deaths small.

DUNMANWAY; *Dunmanway, W*.—The sanitary condition of the district continues satisfactory. One death was certified as being due to "cancer of the stomach" and one to "laryngeal tuberculosis."

FERMOY; *Rathcormack*.—Of the deaths from tuberculosis one case was imported into the district about one month before the death occurred.

KANTURK; *Milford*.—Four cases of enteric fever were reported during quarter. The district is otherwise healthy.

KILMALLOCK; *Charleville*.—The district is very healthy.

KINSALE; *Ballyjeard*.—Health of district good. Four cases of pleuro-pneumonia treated. Five deaths registered at 70 years and upwards. One death at 5 months occurred from pneumonia.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—Sanitary condition of district satisfactory.

MALLOW; *Kilshannig*.—District healthy.

MALLOW; *Rahan*.—District healthy. One case of enteric fever.

MIDDLETON; *Aghada*.—There are at least seven cases of tuberculous disease of respiratory organs in my district at the present moment. Direct infection may have been a causative factor in two cases, but in the others disease was evidently due to lowering of constitutional resistance.

MITCHELSTOWN; *Kildorrery*.—During the past quarter there was an epidemic of whooping-cough in this district. In many cases the attack was severe, especially when complicated with pulmonary affections.

MITCHELSTOWN; *Mitchelstown, No. 1, W*.—Several cases of whooping-cough continued from last quarter in western portion of district. The disease has now reached Mitchelstown, about a dozen cases having occurred already there. Pneumonia and broncho-pneumonia were very prevalent in May.

SKIBBEREEN; *Dromdaleague*.—District healthy. Of the 19 deaths registered during the quarter, 9 were over 80 years of age.

SKIBBEREEN; *Unionhall*.—District healthy.

SKULL; *Goleen*.—There has been no case of hydrophobia in this district for years.

SKULL; *Skull, W*.—Number of deaths below the average. No epidemic during the past quarter. District healthy. Sanitary arrangements good.

Kerry County.

CAHERSIVEEN; *Caher, W*.—District healthy.

CAHERSIVEEN; *Darrynane*.—The sanitary condition of district is fairly satisfactory with the exception of the sewerage in the village of Waterville, which is really in a deplorable condition; a decimating outbreak of enteric fever is imminent unless something is done to remedy it.

CAHERSIVEEN; *Emlagh*.—The sanitary arrangements are about the average found in country districts. No case of infectious disease has occurred during the quarter.

CAHERSIVEEN; *Glanbehy*.—Sanitary state of district good.

CAHERSIVEEN; *Valencia*.—Nine of the deaths recorded range from 71 to 84 years. This is above the average.

DINGLE; *Anascaul*.—District healthy.

DINGLE; *Castlegregory*.—District healthy.

DINGLE; *Dingle, W*.—District healthy.

DINGLE; *Ventry*.—The health of the locality has been good, and the sanitary conditions are improved.

KILLARNEY; *Coom*.—District healthy during past quarter with exception of one case of scarlet fever.

KILLARNEY; *Killorglin*.—District healthy at present. There have been some isolated cases of enteric fever during the quarter.

KILLARNEY; *Malahiffe*.—The sanitary state of the district is good.

LISTOWEL; *Ballyhorgan*.—The district is in a good sanitary condition. There has been no epidemic during quarter ending 30th June, 1912.

LISTOWEL; *Ballylongford*.—District healthy for quarter. Village sewers badly needed—frequently reported on. No death from consumption.

LISTOWEL; *Listowel, W*.—District healthy and free from contagious or infectious disease.

LISTOWEL; *Tarbert*.—I consider that the health of the district is on the whole comparatively satisfactory.

TRALEE; *Brosna, No. 1*.—District healthy.

TRALEE; *Kilgobban*.—District healthy.

Limerick County and County Borough.

CROOM; *Castletown*.—Quarter healthy. Two cases of scarlatina.

KILMALLOCK; *Bruff*.—The sanitary arrangements are fairly good. No infectious disease for quarter. District healthy.

KILMALLOCK; *Bruree*.—Had two cases of scarlatina. Otherwise district healthy.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy. One case of tetanus occurring on tenth day after injury to head—a large contused wound. The case seemed hopeless for about 14 days after first appearance of symptoms, but antitetanus serum was freely used, and the patient (a boy of 12 years) is now practically convalescent.

KILMALLOCK; *Kilmallock, W*.—No outbreak of zymotic disease. Sanitary conditions fairly satisfactory.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair. District very healthy.

LIMERICK; *Caherconlish*.—Health of district good. Two cases of phthisis, both uncertified, one a returned American.

LIMERICK; *Clarina*.—The district is in a rather sanitary condition.

LIMERICK; *Limerick, No. 3*.—Sanitary arrangements and health of district good. No zymotic disease, except a rather mild form of pertussis during quarter. Five deaths from pulmonary tuberculosis and two from other forms of tuberculous disease.

LIMERICK; *Moroe*.—General sanitary condition of district good. People healthy. No deaths from tuberculosis, nor from cancer. Of the comparatively small number of deaths registered (13), one was at 98, one at 87, one at 82, one at 80, one at 75, and one at 73.

LISTOWEL; *Glin*.—I am glad to say the Glin district during the quarter ending 30th June has enjoyed perfect immunity from infectious diseases.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy.

MITCHELSTOWN; *Mitchelstown, No. 2*.—Sanitation satisfactory, and the district is very healthy.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair. A few cases of scarlatina at end of quarter.

NEWCASTLE; *Feenagh*.—The sanitary arrangements in the district are fairly good.

RATHKEALE; *Askeaton*.—The health of the district was very good during the past quarter. Of the deaths registered, one was of an old man 78 years of age caused by gangrene of his left foot.

RATHKEALE; *Pallaskenry*.—A healthy quarter.

RATHKEALE; *Rathkeale, No. 1, W*.—The district has been very healthy for the past quarter, and the sanitary condition in most respects very satisfactory. Of the 14 deaths registered 9 belonged to the district proper—5 deaths took place in the Union Hospital. Five of the 14 were over 65 years. Two infants died of tetanus neonatorum at the age of 8 days and 14 days respectively. There was an epidemic of whooping-cough, but no deaths. There was no other infectious disease in the district. Better food and less exposure to hard and toilsome work is favourable to a healthy condition, and lessened mortality.

RATHKEALE; *Rathkeale, No. 2*.—My district was in a very healthy condition, and free from all contagious diseases during the quarter ended 30th June, 1912.

TIPPERARY; *Grean*.—Several cases of measles occurred during the quarter.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W*.—An outbreak of typhus fever occurred in this district during quarter. Fifteen persons, members of three families, were attacked. One person, the first attacked, died. The epidemic is now abated. There was one death from whooping-cough, which was also prevalent in district.

BORRISOKANE; *CloghJordan*.—The health of the district is good.

BORRISOKANE; *Terryglass*.—District healthy, except for whooping-cough, which was very prevalent.

NENAGH; *Nenagh, W*.—District healthy.

NENAGH; *Newport*.—District at present is in a very healthy condition.

NENAGH; *Portroe*.—District in a healthy condition. Sanitary arrangements good.

NENAGH; *Silvermines*.—District healthy.

NENAGH; *Toomyvara*.—One case of diphtheria, and two cases of enteric fever occurred during the quarter.

THURLES; *Holycross*.—Sanitary state of district good.

THURLES; *Moyne*.—District healthy.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district for the quarter ended has been very good.

CALLAN; *Mullinahone*.—Sanitary condition of district fair; district in general healthy. Mostly all the deaths registered during quarter were old people, their ages ranging from 68 years to 88 years. One death registered from pulmonary tuberculosis, I believe the last member of a family all of whom died of it. No case of cancer that I know of.

CARRICK - ON - SUIR; *Garrangibbon*.—No unusual circumstances. District healthy.

CASHEL; *Killenarule*.—An outbreak of diphtheria confined to two houses occurred in May, with two deaths. Last case about 20th May. There has been no further spread of disease.

CASHEL; *Kilpatrick*.—Whooping-cough prevalent first month of quarter.

CLOGHEEN; *Caher*.—The sanitary state of the district is good. No cases of an epidemic character occurred during the past quarter.

CLOGHEEN; *Clogheen, W*.—District free from epidemic disease

CLONMEL; *Kilsheelan*, No. 1.—One death from pulmonary tuberculosis. One death from cancer.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District healthy.

URLINGFORD; *Kilcooly*.—The district has been very healthy during past quarter.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—One case of scarlet fever has come under my notice during the past quarter, but which was of a very mild type. The sanitary condition of the district is satisfactory.

CLONMEL; *Ballymacarbry*.—Sanitary arrangements good.

CLONMEL; *Kilsheelan*, No. 2.—One death from pulmonary tuberculosis.

DUNGARVAN; *Dungarvan*, W.—District healthy during past quarter.

LISMORE; *Ballyduff*.—Sanitation, and general health of the district very satisfactory.

LISMORE; *Tallow*.—District healthy.

WATERFORD; *Kilmeadan*.—Health of district very good. Slight outbreak of whooping-cough of very mild nature.

WATERFORD; *Waterford Urban*, No. 1. W.—The sanitary condition of the district is gradually improving. There is almost complete absence of acute infectious disease.

WATERFORD; *Woodstown*.—The health of the district is good.

YOUGHAL; *Ardmore*.—District healthy.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—No epidemic of any kind this last quarter. Death-rate low.

ANTRIM; *Doagh*.—District almost entirely free from infectious disease during the quarter.

ANTRIM; *Randalstown*.—No disease of an epidemic nature.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good.

BALLYCASTLE; *Ballycastle*, W.—The district is healthy at present.

BALLYCASTLE; *Croagh*.—Whooping-cough was the only epidemic; several deaths of young children from this cause.

BALLYCASTLE; *Cushendall*.—Sanitary arrangements excellent. No infectious disease of any kind. Not a case of tuberculous disease of any form in the district.

BALLYMENA; *Ahoghill*.—District healthy; no cases of zymotic disease.

BALLYMENA; *Ballymena*, W.—Scarlatina apparently gone; instead, a number of cases of measles and whooping-cough have appeared. A much smaller number of deaths registered during the quarter than usual.

BALLYMENA; *Clogh*.—District fairly healthy. One death from scarlatina. Sanitary arrangements fair.

BALLYMENA; *Galgorm*.—Death-rate low. No zymotic disease in the district.

BALLYMENA; *Glenwhirry*.—Public health good. A few cases of measles of a mild type have occurred.

BALLYMENA; *Portglenone*.—Influenza was prevalent during the quarter.

BALLYMENA; *Toome*.—Health of the district very satisfactory.

BALLYMONEY; *Dirraw*.—Sanitary arrangements of district satisfactory, and no epidemic or infectious diseases to report.

BALLYMONEY; *Portrush*.—Average death age for quarter—74 years.

BELFAST; *Belfast Rural*, No. 3.—No deaths from cerebro-spinal fever occurred during the quarter.

BELFAST; *Belfast Rural*, No. 4.—The health of the district is very satisfactory. During the quarter four cases of scarlatina were notified; also two of diphtheria, but there was nothing of the nature of an epidemic.

LARNE; *Ballycarry*.—Sanitary condition of district fairly good; now free from epidemic diseases.

LARNE; *Waterfoot*.—Sanitary arrangements very good; no infectious diseases.

LISBURN; *Dunmurry*.—The sanitary condition of this district very good; no epidemic of any kind.

LISBURN; *Glenavy*.—No epidemic; whooping-cough which was so prevalent in last quarter has now disappeared. Health of district good.

Armagh County.

ARMAGH; *Loughgall*.—District during the quarter healthy.

ARMAGH; *Markethill*.—There were two cases of typhoid fever during the quarter. Otherwise the district has been very healthy.

ARMAGH; *Rich Hill*.—There was a birth of triplets registered during this quarter, but unfortunately the three children died within a few weeks. The death registered from acute miliary tuberculosis was that of a man who had had pleurisy some months ago. There are no cases of tuberculosis in the district at present as far as I know.

ARMAGH; *Tynan*.—The health of the district very satisfactory during the past quarter.

LURGAN; *Lurgan*, No. 2.—This district is in a very healthy condition, with few marriages, few births, and not many deaths. It is also free from any infectious disease.

NEWRY; *Forkhill*.—Vaccination postponed owing to the prevalence of scarlatina.

NEWRY; *Meigh*.—Whooping-cough prevalent.

NEWRY; *Mullaghglass*.—There has been a widespread epidemic of whooping-cough all over my district "of a mild form." There were four cases of scarlatina in the village of Bessbrook. The school was closed, and patients removed to hospital. Up to present no further extension of this trouble since 12th of June.

Belfast County Borough.

BELFAST; *Belfast Urban*, No. 4, W.—No deaths from cerebro-spinal fever.

BELFAST; *Belfast Urban*, No. 5.—No outbreak of any infectious diseases.

BELFAST; *Belfast Urban*, No. 9.—No deaths from cerebro-spinal fever occurred during the quarter.

BELFAST; *Belfast Urban*, No. 11.—The health of the district has been good.

BELFAST; *Belfast Urban*, No. 13.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; *Bailieborough*, W.—Whooping-cough and bronchitis were prevalent amongst the children during the quarter.

BAWNBOY; *Swanlinbar*.—Sanitation is rapidly improving. Tuberculous disease in various forms is fairly common.

CAVAN; *Beltrubet*.—The district is fairly healthy.

CAVAN; *Killashandra*.—No death from cancer or tuberculosis registered during the quarter. The deaths of 7 persons over 65 years were registered during the quarter. One case found drowned. One death was registered at 100 years. District healthy.

COOTEHILL; *Tullyvin*.—The sanitary arrangements in the district are very fair. Whooping-cough was rather prevalent during quarter.

ENNISKILLEN; *Holywell*, No. 2.—The sanitary condition of the district is fairly good as regards drainage. Lighting and flooring of most houses are defective. I would recommend much larger windows to open from the top, and the earthen floors, which are uneven, damp, and filthy, to be replaced by concrete, which is cheap and easily cleaned. This would, I believe, tend to promote the health of families.

GRANARD; *Scrabby*, No. 1.—Sanitary arrangements of this district good. No cases of infectious nature have occurred during the quarter. Of the six deaths recorded five are old age pensioners. Comparatively few cases of illness. Tuberculosis appears to be absent, probably in a great measure due to improved sanitation.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—Whooping-cough prevalent in the district.

Donegal County.

BALLYSHANNON; *Ballintra*.—The sanitary arrangements of district fairly good, but water supply very bad.

DONEGAL; *Donegal*, W.—A few cases of scarlatina have occurred during the quarter; immediately removed to fever hospital, so no general epidemic.

DONEGAL; *Dunkineely*.—No epidemic disease during quarter, except one suspicious case of scarlatina—very mild symptoms.

DONEGAL; *Laghy*.—District healthy.

DONEGAL; *Mountcharles*.—There has been a number of cases of pneumonia and influenza in the district during the quarter. District otherwise healthy.

DONEGAL; *Petticoe*.—Influenza prevalent during quarter.

DUNFANAGHY; *Crossroads*.—District free from any epidemic during the quarter.

DUNFANAGHY; *Dunfanaghy*, W.—Mumps was prevalent at the beginning of the quarter. Whooping-cough arrived during the last few weeks.

GLENTIES; *Ardara*.—There were two cases of scarlatina. They were isolated, and no further cases appeared. District otherwise healthy.

GLENTIES; *Carrick*.—District is healthy.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Dunglow*, No. 2.—Scarlatina has now left the west side of Annamore, and moved to the north and east. The fishermen indulge in the pernicious practice of casting large numbers of unsaleable fish on the foreshore, where they are left to decompose to the detriment of the public health. Dogs after feeding on these putrid fish are played with by the children. Visitors complain bitterly of both the sights and odours.

GLENTIES; *Killybegs*.—District healthy during quarter.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Carndonagh*, W.—Whooping-cough very prevalent in the district.

INISHOWEN; *Clonmany*.—All vaccinations postponed on account of an epidemic of measles in the district.

INISHOWEN; *Malin*.—Measles prevalent. District otherwise healthy.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; *Church Hill*.—District healthy; no epidemic.

LONDONDERRY; *Burt*.—A dismantled fort on Inch Island with good modern buildings would make a sanatorium.

LONDONDERRY; *Kilderry*.—In one division of this district pertussis has been very prevalent during the quarter; no deaths.

MILLFORD; *Fanad*.—Health of district good. One isolated case of very mild diphtheria occurred; also one case of scarlatina, both of which were removed to hospital; there was no spread of either disease.

MILLFORD; *Rathmullan*.—Six cases of scarlatina occurred during the quarter causing one death.

MILLFORD; *Rosquill*.—High mortality amongst the old people. Eleven aged 65 and upwards, and of these the average age would exceed 82 years. Whooping-cough prevalent during present quarter, from which there are 3 deaths, two fourteen days old, and one 1½ years; the latter uncertified. District otherwise healthy.

STRABANE; *Raphoe*.—No infectious diseases in the district during past quarter, except influenza; sanitary arrangements satisfactory.

STRANORLAR; *Cloghan*.—A number of deaths registered are at an advanced age.

STRANORLAR; *Killygordon*.—Within the quarter there was a fresh outbreak of whooping-cough of an unusually severe type, which in a great number of cases assumed an early broncho-pneumonic form, and was responsible for death of 6 infants under 12 months.

Down County.

BANBRIDGE; *Ballyncard*.—Of the 28 deaths 7 were over 80 years of age. A slight outbreak of scarlet fever occurred. There were no deaths from the disease, and the outbreak was quickly checked. The sanitation remains satisfactory.

BELFAST; *Castlereagh, No. 1*.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—Mumps has been very prevalent in the district during the last two months of the quarter.

DOWNPATRICK; *Clough*.—Influenza with pulmonary complications was prevalent.

DOWNPATRICK; *Downpatrick, W*.—Five deaths attributed to influenza.

DOWNPATRICK; *Portaferry*.—Some cases of whooping-cough occurred, one of which died. Health of district very good.

KILKEEL; *Kilkeel, No. 2, W*.—District very healthy.

KILKEEL; *Rosstrevor*.—Sanitary arrangements of district quite satisfactory. At present there prevails a slight epidemic of whooping-cough of a moderate character.

LISBURN; *Annahilt*.—The sanitary condition of the district is good.

LISBURN; *Ballylesson*.—No deaths from cerebro-spinal meningitis.

LISBURN; *Hillsborough*.—Some mumps in the locality. District otherwise free from any epidemic.

LISBURN; *Saintfield*.—General health of district good. Tuberculous cases increasing, three deaths out of seven being from this cause. One of the seven deaths was at the age of 84 years; another due to excitement in a quarrel. Births greatly in excess of deaths—about 3 to 1.

LURGAN; *Moir*.—Births and deaths exactly balance this quarter. Two deaths from cancer of the stomach. An epidemic of pertussis is nearly past, and an outbreak of scarlatina has, I hope, been subdued. No deaths have occurred from the latter cause.

LURGAN; *Waringstown*.—During the quarter there were 15 cases of scarlet fever. All were removed to hospital, but one which was well isolated. The births registered showed a considerable increase. There were only two deaths not certified.

NEWRY; *Donaghmore*.—There has been a large number of cases of influenza and whooping-cough during the quarter. One case of diphtheria has been notified, and there has also been a death from tuberculous meningitis. The sanitary condition of district is fair.

NEWRY; *Rathfriland*.—Sanitary condition of this district is much improved.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements very good. Public health very good. Number of deaths were of persons well advanced in years.

NEWTOWNARDS; *Comber*.—We have been very free from epidemics for the past quarter, except influenza, which has been of a more severe type than usual. The sanitary arrangements of the district are very good.

NEWTOWNARDS; *Donaghadee*.—District health good.

NEWTOWNARDS; *Newtownards, W*.—No notifications have been received by me during the quarter under the Notification of Infectious Diseases Act. Eleven cases were notified under the Tuberculosis Prevention (Ireland) Act. The general health of the district has been good. We have had the reservoir covered so as to protect the water supply from the action of the sun. It was finished only at the beginning of June. There, therefore, was no time to collect a reserve supply for dry weather. The wet weather, however, has relieved the situation. I have every hope that the general health of the people will now improve owing to the good water supply, and also to our new system of sewers. The sanitary authority is urging the people to connect their drains with these new sewers. Some domestic scavenging has been done by the sanitary authority, which is, I am glad to say, alive keenly to the necessity for sanitary reforms.

Fermanagh County.

ENNISKILLEN; *Enniskillen, W*.—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Two deaths occurred from diphtheria. Another case which was at once removed to hospital, recovered. No further spread of the disease. Sanitary conditions of district fairly satisfactory.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. There have been no deaths during the quarter.

IRVINESTOWN; *Clonelly*.—Influenza, bronchitis, and pleurisy prevalent during quarter.

IRVINESTOWN; *Ederney*.—District is at present healthy.

IRVINESTOWN; *Irvinestown, W*.—Two deaths registered from pulmonary tuberculosis; of these one returned from America suffering from the disease. The other has a family history of tuberculosis, and mother and sister died within the past two years—one pulmonary tuberculosis, and the other tuberculous meningitis.

LISNASKEA; *Derrylin*.—Influenza and pneumonia caused a considerable amount of sickness in the district during the quarter. No other epidemic.

LISNASKEA; *Lisnaskea, W*.—Sanitary state of district improving. No outbreak of infectious disease during quarter.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District is very healthy.

COLERAINE; *Garvagh*.—One mild case of scarlatina during past quarter, but did not spread. Otherwise district healthy.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—There have been no epidemics, but a few isolated cases of influenza, measles, and whooping-cough I have seen. The health of the district has been satisfactory.

LIMAVADY; *Ballykelly*.—Health of the district particularly good. No case of infectious disease in the whole district.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Dungiven*.—Whooping-cough and influenza both prevalent in the district during the quarter.

LIMAVADY; *Limavady, W.*—The sanitary arrangements in the district are fairly good. No cases of infectious disease notified during the quarter.

LONDONDERRY; *Eglinton*.—District free from infectious disease.

MAGHERAFELT; *Maghera*.—Uncertified cases mostly of very old people.

MAGHERAFELT; *Moneymore*.—There is a high death-rate of old people over 65; no fatality from any disease considered infectious. Two cases of scarlatina occurred in one house, cause unknown; isolated; no spread of disease. District healthy at present.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in fair sanitary condition.

CARRICKMACROSS; *Donaghmoyne*.—District remarkably healthy. Nine deaths registered must be a record; last year 27; previous year, 21.

CARRICKMACROSS; *Raferagh*.—There has been what may be practically called an epidemic of pneumonia in the district during past quarter.

CASTLEBLAYNEY; *Ballybay*.—No deaths from tuberculous disease were registered. The number of deaths certified was above the average.

COOTEHILL; *Dawsonsgrove*.—The sanitary state of the district is fair.

MONAGHAN; *Castleshane*.—The district is sanitary; there is no epidemic of any kind.

MONAGHAN; *Emyvale*.—District fairly healthy during quarter; no epidemics.

MONAGHAN; *Kilmore*.—A wide-spread epidemic of whooping-cough with pneumonia and bronchitis and complications resulting in seven deaths; some influenza. One case of typhus fever; cause unknown.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements in the district are unsatisfactory.

MONAGHAN; *Scotstown*.—There has been an epidemic of whooping-cough in the district for the past three months. Otherwise the health of the district is satisfactory.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory; no epidemics of any kind. One case of diphtheria, recovered under serum treatment.

CASTLEDERG; *Drumquin*.—The sanitary arrangements in the district are satisfactory, with a total absence of any infectious disease.

CASTLEDERG; *Killeter*.—State of district healthy.

CLOGHER; *Ballygawley*.—A few cases of whooping-cough; no deaths. Of eleven deaths—one 86; one 84; two 80. Sanitary condition fair.

CLOGHER; *Fivemiletown*.—The health of the district was fairly good during the quarter.

COOKSTOWN; *Pomeroy*.—Two cases of scarlet fever occurred in the district. Infection difficult to trace, but probably came from a neighbouring district. Health of inhabitants generally good. Sanitary arrangements in town not very satisfactory, but are improving.

COOKSTOWN; *Stewartstown*.—There has been a very severe epidemic of whooping-cough during quarter, causing five deaths. Otherwise district healthy.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—A few sporadic cases of whooping-cough during current quarter, complicated in one case by convulsions (Mors). It did not become epidemic. Health of district generally good.

DUNGANNON; *Clonavaddy*.—District in fair sanitary condition.

DUNGANNON; *Coal Island*.—District healthy during past quarter; occasional cases of whooping-cough in Newmills portion of district.

OMAGH; *Fintona*.—The health of the district has in general been good during the past quarter, and free from epidemic diseases. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—Influenza was prevalent during beginning of quarter, with meningeal and chest complications.

OMAGH; *Omagh, No. 1, W.*—Health of district good. Sanitary conditions—Urban, fairly satisfactory; Rural, general apathy in matters sanitary, *i.e.*, cess-pools, manure heaps, contiguous to dwellings and county roads. Out-houses, byres, &c., not regularly cleansed nor limewashed. Many dwellings badly lighted and ventilated; defective drainage.

OMAGH; *Omagh, No. 2*.—District healthy.

OMAGH; *Sixmilecross*.—The district is in very good sanitary condition at present; we had one case of diphtheria, and one of enteric fever.

STRABANE; *Plumbridge*.—One death registered at age of 101 years.

IV. PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin*.—Sanitation satisfactory.

CLIFDEN; *Roundstone, No. 1*.—District healthy.

GALWAY; *Galway, No. 3 (Arran)*.—District very healthy at present.

GALWAY; *Oranmore*.—The district continues healthy.

GALWAY; *Spiddle*.—Health of district continues satisfactory.

GALWAY; *Turloughmore*.—Health of district good.

GORT; *Gort, W.*—The general health of the district has been very good. There has been one case of typhus, which recovered.

GORT; *Kinvarra*.—The health of the district is good.

LOUGHREA; *Bullaun*.—There were two deaths registered, one at 92 and one at 94 years of age.

MOUNT BELLEW; *Mount Bellew, W.*—Health of district very good. No fever. Sanitation fair.

OUGHTERARD; *Cloonbur, No. 1*.—A case of a person aged 102 years has been registered, and from enquiry made the deceased was quite that age.

OUGHTERARD; *Lettermore*.—Health of district presently good.

OUGHTERARD; *Oughterard, W.*—No deaths from cancer.

PORTUMNA; *Eyrecourt*.—The district is in a healthy condition.

PORTUMNA; *Portumna, No. 1, W.*—District is in a good sanitary condition.

TUAM; *Tuam, No. 1, W.*—There were two cases of typhus fever during the quarter; one fatal, and the other is still under treatment in hospital. Otherwise the district was healthy during the quarter.

TUAM; *Tuam, No. 2*.—One death from diphtheria, and one from tuberculosis. District on the whole healthy during quarter.

Leitrim County.

BALLYSHANNON; Kinelough.—Deaths above the average. One death from cancer; one from tuberculosis. Eight over 80 years, nine over 70 years. Pneumonia prevalent during the quarter; four deaths occurring from it.

MOHILL; Carrigallen.—The health and sanitary condition of the district have been good during the quarter. No epidemic.

MOHILL; Mohill, W.—The sanitary condition of the district fairly satisfactory. Influenza and pneumonia were prevalent in the district during the quarter.

MOHILL; Rinn.—The district is in a healthy condition, free from epidemic.

MOHILL; Rowan.—No complaints regarding the sanitary condition of the district.

Mayo County.

BALLINA; Ballina, W.—Health of the district good; no epidemic during the quarter.

BALLINA; Crossmolina.—District continues healthy, free from infectious disease. Sanitary condition fair.

BALLINROBE; Ballinrobe.—Health of district remains good.

BALLINROBE; Cappaghduff.—Sanitation good. No infectious disease in district.

BALLINROBE; Cong.—Health of district good.

BALLINROBE; Hollymount.—Births over and deaths about the average.

BELMULLET; Binghamstown, W.—District fairly satisfactory.

BELMULLET; Knocknalower.—The district has been without any contagious disease for the past quarter.

CASTLEBAR; Castlebar, No. 1, W.—District in a healthy condition.

CASTLEBAR; Castlebar, No. 2.—District sanitation showing improvement.

CLAREMORRIS; Ballindine.—District in good sanitary condition.

CLAREMORRIS; Ballyhaunis.—Health of district good. No zymotics or cancer. Sanitation still progressive. As regards the exceptional prevalence of rheumatic and tuberculous diseases, I don't expect much improvement whilst arterial drainage remains neglected, constituting an abiding menace to the health and prosperity of the inhabitants.

KILLALA; Killala, W.—The sanitary state of the district is fairly good. A severe form of gastritis frequently accompanied with jaundice was prevalent amongst school children during the months of April and May.

SWINEFORD; Swineford, W.—There were no epidemics during past quarter. The health of the district remains good, but the local authority should take more active steps in dealing with sanitary reports. The death was registered of a young man at 19 years who was killed by lightning.

WESTPORT; Achill.—General health and sanitary state good. No epidemic present.

WESTPORT; Ballycroy.—Two deaths from cancer (one stomach, one œsophagus).

WESTPORT; Islandeady.—The sanitary arrangements of district are normal. No outbreak of infectious disease has occurred.

WESTPORT; Louisburgh.—Sanitary condition of district good as is also general health of district. No cases of infectious disease occurred during quarter. Two deaths registered from cancer, one of which died after operation.

WESTPORT; Newport.—Two deaths from pulmonary tuberculosis and one death from puerperal fever registered. Epidemic of influenza and whooping-cough during quarter. Sanitary condition of town very backward.

Roscommon County.

ATHLONE; Kiltoom.—The sanitary condition of district good. The health also good, as shown by the very low death-rate registered.

BOYLE; Boyle, No. 1, W.—There were a few cases of scarlet fever with one death in the Union hospital. The district was healthy during past quarter.

BOYLE; Keadew.—Scarlet fever has broken out in this district during the last month of the quarter. Two deaths registered 90 years.

CARRICK-ON-SHANNON; Aughrim.—The condition of the district during the quarter has been satisfactory.

CASTLEREAGH; Loughglinn.—The unusually wet winter has much increased the number of chest affections, especially that of pulmonary tuberculosis. The four cases were among the well-to-do, so that the climate evidently played a greater part than privation and want of air. There has been no case of cancer.

STROKESTOWN; Roosky.—Six deaths from different forms of tuberculosis were registered. No case of cancer this time. Twelve of the deaths were of persons aged 65 years and upwards.

Sligo County.

BOYLE; Gurteen.—District healthy. Sanitary condition of district improving.

DROMORE WEST; Castleconor.—There has nothing been done towards the drainage of the town of Enniscrone, although several cases of epidemic diseases have occurred.

DROMORE WEST; Easky, W.—Health of district very good. No case of infectious disease during quarter. One death registered at 97 years.

SLIGO; Ballymote.—District very healthy during last quarter. No zymotic diseases.

SLIGO; Carney, No. 1.—The sanitary condition of the district is, on the whole, good. Six members of one family contracted typhus fever; two died.

SLIGO; Carney, No. 2.—The sanitary arrangements of the district are good, and the district is in a healthy condition.

SLIGO; Collooney.—One case of typhoid. Several cases of scarlatina during quarter.

SLIGO; Riverstown.—District healthy.

TOBERCURREY; Aclare.—The sanitary arrangements of the district are improving. An outbreak of enteric occurred in three houses in the district some time ago, but recently no new cases have come under my notice.

TOBERCURREY; Coolaney.—Sanitation satisfactory.

TOBERCURREY; Tobercurrey, W.—The sanitary state of the district is fairly good. There is an epidemic of typhoid in the district. The water supply to the town has been found the probable cause.

1912.]
3rd Quarter.

[No. 195.]

QUARTERLY RETURN
OF THE
MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

Price One Shilling.

Marriages:—APRIL, MAY, JUNE, 1912.

Births and Deaths:—JULY, AUGUST, SEPTEMBER, 1912.

During the quarter ended 30th September last, there were registered in the 828 Registrars' Districts in Ireland 24,416 births—a number equal to an annual birth-rate of 22·3 in every 1,000 of the estimated population*—and 14,942 deaths, representing an annual rate of 13·6 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 8,030 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·0 in every 1,000 of the estimated population, and the death-rate 11·1 per 1,000.

The birth-rate in Ireland for the quarter is 0·8 below the average rate for the corresponding quarter of the ten years, 1902–1911, and also 0·9 below the rate for the third quarter of 1911. The deaths are 1,048 under those registered in the corresponding quarter of 1911 ; the death-rate is 1·0 under the rate for that quarter, and 0·8 under the average for the third quarter of the ten years, 1902–1911.

Compared with those for the corresponding quarter of 1911, the returns of pauperism furnished by the Local Government Board show a decrease of 872 in the average number of Workhouse inmates on Saturdays during the quarter, but an increase of 591 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years, 1902–1911, the number of Workhouse inmates shows a decrease of 5,324, and the number of persons on out-door relief shows a decrease of 14,446, the total under both heads being 20·8 per cent. under the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·3 per cent.

* See page 212.

The annual marriage-rate (5·1 per 1,000 of the population) represented by the marriages registered during the first quarter of 1912, is 0·3 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 30th June, 1912, and by the BIRTHS and DEATHS registered in the Quarter ended 30th September, 1912.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

See note (*) page 167.

MARRIAGES.

The Marriages (5,624) registered in Ireland during the second quarter of 1912 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of 1911, and 0·3 above the average rate for the second quarter of the ten years 1902–1911. Of the total number of marriages, 3,900 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,724 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·0 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·4 above, and that under the latter heading 0·1 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1902–1911, and the average number for that period; also the number registered in the first and second quarters of 1912.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 24,416—12,574 boys and 11,842 girls—being equal to an annual ratio of 1 in every 44·9, or 22·3 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1902–11, was 25,367, equivalent to an annual rate of 23·1 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 22·9 per 1,000 of the population according to the Census of 1911; Munster, 21·8; Ulster, 22·6; and Connaught, 20·7.

The highest county or county borough birth-rate* is 30·8 for Dublin county borough, and the lowest 16·9 for Dublin County. Of the intermediate rates the highest five are—Belfast county borough, 26·6; Limerick county and county borough, 24·7; Louth, 24·0; Waterford county and county borough, 22·9, and Down 22·5. The lowest five are—Longford, 17·3; Clare, 17·4; Roscommon, 17·6; Leitrim, 17·9; and Cavan, 18·3.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 14,942—7,628 males and 7,314 females—affording an annual ratio of 1 in every 73·4, or 13·6 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1902–11, was 14·4 per 1,000.

The death-rate in Leinster was 14·9 per 1,000 of the population according to the Census of 1911; in Munster, 12·9; in Ulster, 13·6; and in Connaught, 12·1.

The county or county borough death-rates* range from 10·0 in Leitrim to 18·7 in Dublin county borough. Between these rates the lowest five are—Cavan, 10·1; Kerry, 10·5; Tipperary, N.R., 10·9; Clare, 11·7, and Roscommon, 11·9; and the highest five are—Westmeath, 16·7; Armagh, 16·2; Carlow, 15·3; Monaghan, 15·0; and Tyrone, 15·0.

See note () on page 150.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1902–1911, and the average number for that period; also the number registered during the first second and third quarters of the year 1912 :—

AGES.—Of the 14,942 deaths registered last quarter, 1,755, or 11·7 per cent., were of infants under one year of age ; and 6,030 or 40·4 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 71·9 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 13·8 per cent. of the total deaths registered therein ; in Munster, 11·8 per cent. ; in Ulster, 11·3 per cent. ; and in Connaught, 8·2 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 34·8 per cent. ; in Munster, to 43·0 per cent. ; in Ulster, to 39·5 per cent. ; and in Connaught, to 51·0 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 796, and is equivalent to an annual rate of 0·73 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the September quarter of 1912, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1907–1911.

Name of Disease.	Number of Deaths in Sept. quarter, 1912.	Average number of Deaths in Sept. quarter of the 5 years, 1907–1911.
Enteric Fever,	40	74
Typhus,	4	10
Small-pox,	—	—
Measles,	105	114
Scarlet Fever,	78	31
Whooping-cough,	199	180
Diphtheria,	70	71

* See note (†) on page 157.

ENTERIC FEVER.—During the quarter 40 deaths from enteric fever were registered, representing an annual rate of 0·04 per 1,000 of the population estimated to the middle of 1912. The average number of deaths for the corresponding quarter of the 5 years, 1907—11, was 74, and the number in each of the 3 quarters immediately preceding that under notice was 99, 64, and 56, respectively. Of the 40 deaths registered during the quarter ended 30th September, 7 belonged to Dublin county borough, 4 to Belfast county borough, 3 to each of the Superintendent Registrars' districts of Loughrea and Tullamore, and in each of the Superintendent Registrar's districts of Cork, Omagh and Sligo, 2 deaths were registered.

TYPHUS.—Four deaths from this cause were registered during the period under notice, the average for the corresponding period of the previous 5 years being 10, while the numbers in the December, March and June quarters preceding were 9, 14 and 10 respectively. The 4 deaths registered during the quarter under review occurred in the following unions:—in Cootehill, 2 deaths; in Kilkenny, one death, and in Middleton, one death.

SMALL-POX.—No death from this disease was registered during the quarter, nor was the presence of the disease notified from any Registrar's district.

MEASLES.—The 105 deaths from this cause, equivalent to an annual rate of 0·10 per 1,000 of the estimated population, is below the average (114) for the corresponding quarter of the previous 5 years. In the December, March and June quarters preceding, 75, 97, and 182 deaths from measles were registered. Of the 105 deaths registered during the quarter, 52 belonged to Dublin county borough, 13 to Belfast county borough, 7 to Limerick union, and 6 to Rathdrum union.

SCARLET FEVER.—There were 78 deaths registered from this cause, representing an annual rate of 0·07 per 1,000 of the population. The average number of deaths in the corresponding period of the preceding 5 years was 31, and the numbers registered in the December, March and June quarters were 100, 65, and 74, respectively. Of the 78 deaths during the period under notice, 14 belonged to Dublin county borough, 8 to Belfast county borough, and 11 were registered in the Superintendent Registrar's district of Lisburn, 10 being deaths of residents of Belfast occurring in Purdysburn Fever Hospital, Ballylesson.

WHOOPING-COUGH.—In the December, March and June quarters preceding, deaths from whooping-cough were respectively 149, 353, and 294 in number. In the quarter under notice, 199 deaths from this cause were registered, equivalent to an annual rate of 0·18 per 1,000 of the estimated population. The average number of deaths for the corresponding period of the 5 years, 1907—11, was 180. Of the total registered during the quarter ending 30th September, 18 belonged to Dublin county borough, and 13 to Belfast county borough, and in the following Superintendent Registrars' districts 5 or more deaths occurred, in Clonakilty, 7 deaths; in Clones, 5 deaths; in Limerick, 18 deaths; in Newry, 18 deaths; and in Rathdrum, 16 deaths.

DIPHTHERIA.—During the quarter 70 deaths from diphtheria were registered, a number equivalent to an annual rate of 0·06 per 1,000 of the estimated population. The average number for the corresponding period of the 5 years, 1907—11, was 71, and the numbers registered in the December, March and June quarters preceding that under review were 97, 105, and 81, respectively. Of the total registered for the quarter ended 30th September, 1912, 17 belonged to Dublin county borough, 4 deaths were registered in the Superintendent Registrar's district of Galway, 3 in Larne union, 9 in Lisburn union (all being deaths of residents of Belfast occurring in Purdysburn Fever Hospital), and 3 in Swineford union.

DIARRHOEAL DISEASES.—The deaths of 254 children under 2 years of age were returned as having been caused by diarrhoea or *enteritis*. In the corresponding quarter of 1911 such deaths were 1,293 in number. During the quarter under notice the deaths of 40 persons 2 years of age and upwards were returned as having been caused by diarrhoea or *enteritis*, and there were 6 deaths from dysentery.

TUBERCULOUS DISEASE.—There were 2,007 deaths registered from all forms of tuberculous disease, a number equivalent to an annual rate of 1·83 per 1,000 of the estimated population in the middle of 1912.

The following notes regarding tuberculous disease, public health, or emigration have been selected from those courteously furnished by the Registrars and which appear at the end of this Report :—

Balrothery ; Lusk.—“I am glad to state all forms of tuberculous disease are decidedly becoming more rare. I have always encouraged the people to improve the sanitary conditions of their dwellings, and it is most gratifying to see the numerous new and good houses built within the last few years in the district, especially in the villages of Rush and Lusk. The District Council have also provided a large number of labourers' cottages, and the public health now attains a high standard.”

Dublin South ; Crumlin.—“I must testify to the efficacy of the work done by the Branch of the Womens' National Health Association in the district. The branch is most active in helping to combat disease and is splendidly officiated.”

Drogheda ; Drogheda No. 2.—“More than half the deaths registered during the quarter resulted from tuberculous disease, which, I am afraid, is on the increase in this district.”

Mullingar ; Milltown.—“The sanitary arrangements are fairly well looked after, and satisfactory. Emigration, that appeared to be on the decline for upwards of twelve months previously, revived during the quarter, unquestionably on account of the ‘American letter.’ In every case in his district the medical officer can bear clear testimony to this letter with the passage ticket and money, as the sole cause of this apparently hopeless evil. There were no deaths from tuberculosis or cancer.”

Cahersiveen ; Emlagh.—“Unfortunately the number of deaths from tuberculosis is unusually high. This I attribute in part to the continuously inclement weather which aggravated the disease, and compelled phthisical patients to remain indoors, and very often in ill-ventilated houses.”

Limerick ; Caherconlish.—“Health of district good. I sent two cases of tuberculosis to the Sanatorium in Wicklow some time ago. They are both home now ; one was very advanced. They are both very much improved.”

Rathkeale ; Rathkeale No. 1.—“There were three deaths from tuberculosis, one was a returned American. I am of opinion the latter cases are responsible for a great increase in the spread of the disease at present.”

Newtownards ; Newtownards.—“I think the improved sanitary conditions under which the people now live are beginning to show in the death rate. I do not remember ever having so few deaths in any quarter. Last year we had in this quarter 73 deaths, and of these 23 were urban cases of enteritis in children under 2 years of age. We have had no enteritis this year. Of course the weather had a good deal to do with this, but the fact that the urban sanitary authority, during May, June, and July, employed men, and did a great deal of domestic scavenging, must not be lost sight of.”

Enniskillen ; Holywell No. 1.—“A custom exists in this district which is most dangerous to health. In every case of illness amongst the peasantry (except fevers, which they shun) the neighbours flock to see the sick person, and if the patient be a male and a smoker, some friend lights his pipe and hands it to him to smoke. That infected pipe is then passed from mouth to mouth round the assembly. I have known of pulmonary tuberculosis to be contracted by this pernicious habit.”

Clifden ; Roundstone No. 2.—“There has been a marked decrease in the number of deaths of infants since one of Lady Dudley's nurses became resident in the district. Two deaths from tuberculosis. The number of deaths from this disease in this district is decreasing.”

Swineford ; Kiltamagh.—“I am treating two cases of pulmonary tuberculosis in young men, harvesters, who contracted the disease in England. In both cases these poor fellows were put to sleep in stables in the sweaty clothes which they had worn during the day.”

Dromore West ; Easky.—“Glad to notice that the people are improving their houses ; better floors and better ventilation.”

CANCER.—There were 832 deaths returned under this heading during the quarter, a number equivalent to an annual rate of 0·76 per 1,000 of the estimated population. In the corresponding quarter of last year, 833 deaths from cancer were recorded.

VIOLENCE.—The deaths returned as having been caused by violence, whether accidental, homicidal, or suicidal, were 223 in number.

The Registrars, in their Notes, report the presence of the following diseases :—

Measles in 13 districts, scarlet fever in 44, whooping-cough in 25, diphtheria in 18, enteric fever in 17, influenza in 2, croup in one, typhus in 2, cerebro spinal fever in one, and chicken-pox in one district. [See Appendix to this Report commencing on page 139.]

INQUESTS.—There were 370 inquests reported to the Registrars during the quarter ; this number being equal to 1 in every 40 of the total deaths registered.

In Leinster there was 1 inquest to every 44 deaths registered, in Munster 1 to 40, in Ulster 1 to 33, and in Connaught 1 to 81.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 14,942 deaths registered, 3,275, or 21·9 per cent., occurred in public institutions. In Leinster the percentage was 29·1, in Munster 25·0, in Ulster 16·3, and in Connaught 15·7.

UNCERTIFIED DEATHS.—According to the returns, 3,360 of the 14,942 deaths which were registered during the quarter were uncertified, being over 22 per cent. of the total. In Leinster the percentage was 17, in Munster 26, in Ulster 17, and in Connaught the uncertified deaths were 45 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1912, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1912, there were 20,459 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th September last was 8,030 (3,872 males and 4,158 females), being 1,007 more than in the corresponding quarter of the year 1911, but 862 below the average number for the third quarter of the ten years 1902-1911.

* Including 5,510 emigrants to the United States of America, viz. :—949 in the month of July, 1,503 in August, and 3,058 in September. Of 5,000 steerage passengers, 1,566 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6½*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1911 the average price was 6*d.*, and in the corresponding quarter of 1902 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 16*s.* 0*d.* per cwt. For the corresponding quarter of the year 1911 the average price was 13*s.* 6*d.*, and for the third quarter of 1902 the average price was 15*s.* 1*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 4*d.* to 3*s.* 9*d.* In the third quarter of 1911 the average prices were 3*s.* 0*d.* to 3*s.* 5*d.*, and the prices for the corresponding quarter of 1902 were 3*s.* 1*d.* to 4*s.* 0*d.*

The price (including cartage) of Whitehaven coal in the City of Dublin during the quarter was 24*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 76¾ and the lowest 73⅞.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland stood at 4 per cent. from the 1st June to 29th August, and from the latter date till the end of the quarter at 4½ per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1912 was 35,412, or 872 below the average for the corresponding period in 1911.

The average weekly number of persons receiving out-door relief during the quarter was 39,698, being 591 above the average for the third quarter of 1911.

Of the persons receiving in-door relief during the third quarter of 1912, an average number of 1,646 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1911 the average weekly number was 1,641.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1912, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.
(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ¼d. per 4-lb. loaf lower.
NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the third

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1907 to 1912, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 162).

The mean height of the barometer during the third quarter of 1912 was 29·966 inches, being 0·134 above the average for the corresponding quarter of the five years 1907–1911; the highest reading (30·505 inches) was on the 19th September, at 9 A.M., wind E., and the lowest (29·285 inches) on the 30th September, at 9 P.M., wind calm.

The mean temperature of the air during the quarter was 53·7°, being 3·2° below the average for the third quarter of the 5 years 1907–1911.

The maximum temperature of the air during the quarter was 74·0° and the minimum 33·0°. The maximum heat in sun was 126·0°.

Rain or snow fell on 48 days during the quarter. The rain-fall measured 9·180 inches, being 3·145 inches above the average for the third quarter of the five years 1907–1911. The greatest monthly rainfall was in August, when 5·480 inches were registered.

The wind blew on 30 days from W., on 13 days from E., on 8 days from N., on 5 days from N.E., on 5 days from S.W., on 4 days from S.E., on 3 days from S., on 2 days from N.W., and the air was calm on 22 days at 9 A.M.

July.—The mean height of the barometer during this month was 29·970 inches; the highest reading (30·299 inches) was on the 5th, at 9 A.M., air calm; and the lowest (29·331 inches) on the 29th, at 9 P.M., wind W.S.W. The mean temperature of the air was 57·1°, the maximum registered was 74·0°, and the minimum 41·8°. The 20th was the warmest day, and the 9th the coldest night. The mean of the dry bulb was 56·6°, and of the wet bulb, 54·0°. The maximum heat in the sun was 126·0°, and the minimum on the grass 36·5°. The total amount of sunshine recorded was 130·0 hours, the greatest daily amount being 13·3 hours on the 15th. The minimum on the grass was not below 30° on any night. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·4. Rain or snow fell on 16 days. The rain-fall measured 3·275 inches; the greatest amount in 24 hours was 0·730 inch on the 23rd.

August.—The mean height of the barometer during this month was 29·732 inches; the highest reading (30·147 inches) was on the 31st, at 9 A.M., wind W.S.W., and the lowest (29·361 inches) on the 29th, at 9 A.M., wind S.W. The mean temperature of the air was 52·9°, the maximum registered was 65·9°, and the minimum 33·0°. The 30th was the warmest day, and the 12th the coldest night. The mean of the dry bulb was 53·4°, and of the wet bulb 51·4°. The maximum heat in sun was 115·0°, and the minimum on the grass 30·2°. The total amount of sunshine recorded was 67·2 hours, the greatest daily amount being 7·6 hours on the 5th. The minimum on the grass was not below 30° on any night. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·3. Rain or snow fell on 25 days. The rain-fall measured 5·480 inches; the greatest amount in 24 hours was 1·390 inches on the 4th.

September.—The mean height of the barometer during this month was 30·197 inches, the highest reading (30·505 inches) was on the 19th at 9 A.M., wind E., and the lowest (29·285 inches) on the 30th, at 9 P.M., air calm. The mean temperature of the air was 51·2°; the maximum registered was 68·3°, and the minimum 34·3°. The 12th was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 51·3°, and of the wet bulb 48·8°. The maximum heat in sun was 116·3°, and the minimum on the grass 28·0°. The total amount of sunshine recorded was 100·7 hours, the greatest daily amount being 12·0 hours on the 21st. The minimum on the grass was below 30° on 2 nights. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·2. Rain or snow fell on 7 days. The rain-fall measured 0·425 inch; the greatest amount in 24 hours was 0·190 inch on the 28th.

METEOROLOGY.

[*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*]

During this quarter the weather in Ireland was less exceptionally wet than in Great Britain, the amount of rainfall, as compared with the normal, being far less heavy. The temperature of the period was, however, almost continuously below the average, the deficiency being especially large at the end of July and throughout the earlier half of August. In the latter month and in September the absence of seasonable warmth was remarkable, only three instances occurring of a mid-day temperature as high as 70°. In addition to its abnormal coolness August was in all but the extreme southern parts of the country very cloudy and wet. Early in September a marked improvement occurred, and in many places no rain fell for at least three weeks, Wexford reporting an absolute drought lasting for 24 days, Donaghadee one of 25 days, and Newcastle (Co. Wicklow) one of 27 days.

July opened with cloudy changeable weather, and a rather low temperature. On the 10th a heavy fall of rain occurred in Wales, and on the following day the South of Ireland was similarly affected, the measurements being as large as 1·7 inch at Waterford and 1·3 inch at Wexford. Towards the middle of the month the weather improved materially, and on the 15th or 16th the highest temperatures of the whole summer were recorded, the thermometer rising to 75° and upwards over the southern portions of the country generally and reaching 79° at Waterford and Ballinacurra. The warmth was, however, of short duration. After the 19th the weather broke up completely, and for the remainder of the month it was thundery and unsettled, with exceedingly heavy falls of rain in Ireland and the neighbouring parts of Great Britain between the 26th and 28th.

August was extremely cool and unsettled. At no time did the thermometer reach 70° in any part of the country, and in many places it did not reach 65°, the maximum for the month at Cahirciveen being no higher than 61°. On some days the thermometer over a large area failed to rise much above 55°, and on the 4th the maximum reading at Clongowes Wood was as low as 51°. Rain was of frequent occurrence. At a large number of stations there were at least 27 days with a measurable quantity, and at Clongowes Wood rain fell every day. Bright sunshine was very deficient, many places recording a mean daily duration of less than 3 hours, or less than 20 per cent. of the possible amount. At Dublin (Phoenix Park) the total duration for the month did not exceed 41 per cent. of the average. Observers in various parts of the country noticed that in the rare intervals of fine weather the sky seldom assumed its ordinary blue tint, but appeared to be covered with a hazy film producing "grey whiteness of the unclouded sky, and extreme weakness of all sunshine."

September was also characterised by a striking absence of mid-day warmth. Very few places experienced a shade reading as high as 70°, but that level was just reached on the 3rd at Dublin (Trinity College), while on the 16th the thermometer at Killarney rose to 72°. On several days it rose very little above 55°, and at Malin Head on the 9th it did not get beyond 50°. Sharp ground frosts occurred in many districts on the night of the 23rd. A few showery days at the commencement of the month were followed by a long drought, and in the second and third weeks the duration of bright sunshine was (for the first time since the close of July) in excess of the average. The concluding week was less settled, but no heavy rains occurred excepting on the 25th and 26th, when the extreme south-west coast experienced a considerable dampness, amounting at Cahirciveen and Valencia Island to as much as 2·7 in. At many places in the west and south the total rainfall for the month amounted to less than 20 per cent. of the average, at Killarney to only 10 per cent., and at Waterford to only 8 per cent.

Mean Temperature.—The mean temperature of the quarter was about $2\frac{1}{2}^{\circ}$ below the average, and was lower than at any corresponding time of the year since the Meteorological Office record commenced in 1878. The highest readings were observed on July 15th or 16th, when the thermometer exceeded 75° at many southern stations and reached 78° at Cahir and Killarney and 79° at Waterford and Ballinacurra. The only other occasions upon which the thermometer rose to anything like a seasonable level were August 16th, 18th, and September 3rd and 16th. On the first occasion no station registered a shade reading as high as 70° , but on September 3rd that level was attained at Dublin, while on the 16th a reading of 72° was recorded at Killarney. The lowest temperatures occurred on September 24th or 25th, when the thermometer fell below 35° in many part of the country, and reached 31° at Limerick. A reading as low as 33° was recorded at Markree Castle on August 3rd and at Dublin (Phoenix Park) on August 12th.

Rainfall.—Over the northern half of the country the rainfall was deficient both as regards frequency and amount, the total for the quarter being 6 per cent. below the average. In the southern half the number of rain-days was slightly above the normal, and the total amount showed an excess of 5 per cent. The heaviest individual falls occurred on the following dates:—July 11th, 21st, 26th to 28th and 31st, and August 4th and 22nd. On July 27th as much as 1·9 inch was registered at Lisburn; and 1·6 inch at Belfast; and on the following day 1·9 inch at Malin Head and 1·8 inch at Dunfanaghy. On August 4th 2·2 inches were recorded at Donaghadee, 1·7 inch at Kingstown, and 1·6 inch at Glasnevin, and on August 22nd 2·3 inches fell at Mount Callan (Co. Clare), 1·8 inch at Broadford, and 1·6 inch at Foyes.

Bright Sunshine was very deficient throughout nearly the whole of July and August, but was fairly abundant in September. For the quarter, as a whole, the duration in the northern half of the country amounted to only 88 per cent., and in the southern half to only 79 per cent. of the average. In the latter region the total amount was smaller than in any corresponding quarter since 1894.

ABSTRACTS I., II., III., IV.

MARRIAGES Registered during the Quarter ending 30th June, 1912, in PROVINCES, COUNTIES,* and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th September, 1912; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS,† INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 30th September, 1912, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

PROVINCES and COUNTIES.	Area in Statute Acres.	Popula- tion in 1911.	Marriages.		Births.		Deaths. NOTE.—This table has been constructed for the years 1838 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851 ; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1912.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW; *Bagenalstown*.—Seven deaths were registered during the quarter at ages ranging, respectively, between 59 and 94 years. The district is healthy.

CARLOW; *Clonegall*.—The district is remarkably free from all forms of tuberculous disease.

CARLOW; *Fennagh and Myshall*.—The three cases of tuberculosis were of long duration, two of them being returned from hospital. The district was fairly healthy.

CARLOW; *Leighlinbridge*.—Health of district good; case of tuberculosis came from Dublin. District free from zymotic disease.

NEW ROSS; *St. Mullins*.—Lobar pneumonia was particularly prevalent this quarter, with a mortality much higher than the average. Whooping-cough and measles are also very prevalent.

Dublin County.

BALROTHERY; *Kilsallaghan*.—The health of district has been good during the past quarter. One death registered from pulmonary tuberculosis.

BALROTHERY; *Lusk*.—Whooping-cough and measles were very prevalent during the quarter. I am glad to state all forms of tuberculous disease are decidedly becoming more rare. I have always encouraged the people to improve the sanitary conditions of their dwellings, and it is most gratifying to see the numerous new and good houses built within the last few years in the district, especially in the villages of Rush and Lusk. The District Council have also provided a large number of labourers' cottages, and the public health now attains a high standard.

DUBLIN, SOUTH; *Clondalkin*.—A few cases of scarlatina occurred during the month of August. The infection was mild. The health of the district is otherwise satisfactory.

DUBLIN, SOUTH; *Crumlin*.—There were four deaths from pulmonary tuberculosis; three were old standing cases, which the fourth was one of acute pneumonic phthisis. I must testify to the efficacy of the work done by the Branch of the Women's National Health Association in the district. The branch is most active in helping to combat disease, and is splendidly officiated.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District healthy during quarter.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 2*.—This district is perfectly free at present from infectious and contagious diseases. Insanitary houses are being demolished.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary condition of my district is now very good. I have had no serious outbreak of any disease. I have had one suspected case of cerebro-spinal meningitis.

Kildare County.

ATHY; *Castledermot*.—District healthy.

BALTINGLASS; *Baltinglass, No. 2*.—No infectious disease prevalent in the district.

CELBRIDGE; *Celbridge, W*.—This district is healthy.

CELBRIDGE; *Maynooth*.—District exceptionally healthy.

EDENDERRY; *Carbury*.—Measles prevalent in early part of quarter.

NAAS; *Ballymore Eustace*.—Whooping-cough is prevalent in a part of the district; otherwise the district is healthy.

NAAS; *Naas and Carragh, W*.—No prevailing disease.

NAAS; *Robertstown and Kilmeage*.—Whooping-cough of a severe type prevalent during last quarter.

Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Pilltown*.—General health of the district of a high standard.

CASTLECOMER; *Ballyragget*.—General health of district good, and free from infectious disease.

CASTLECOMER; *Castlecomer, W.*—Deaths about the average.

KILKENNY; *Tullaroan*.—Health of district very good.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—District is in a very healthy condition.

URLINGFORD; *Urlingford, W.*—Health of district good. No epidemics. Three cases of a mild form of scarlet fever from another district treated successfully in Fever Hospital.

King's County.

BIRR; *Banagher*.—Sanitary arrangements satisfactory. Four of the nine deaths registered were of persons over 71 years old.

BIRR; *Birr, W.*—There has been one case of scarlatina in the district.

BIRR; *Killyon*.—The health of this district is very good.

BIRR; *Kinnitty*.—Influenza epidemic prevalent. Scarlatina epidemic, one death.

MOUNTMELICK; *Clonygowan, No. 2*.—District very healthy.

ROSCREA; *Roscrea, No. 2*.—Slight outbreak of scarlatina; otherwise the district is healthy.

TULLAMORE; *Clara*.—There were several cases of broncho-pneumonia in children. During month of September, one fatal case, a child six weeks old.

TULLAMORE; *Philipstown*.—Sanitary arrangements fairly good. Measles very prevalent in district at present; no deaths.

Longford County.

BALLYMAHON; *Abbeysrule*.—District healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee*.—The district is healthy and free from contagious disease.

GRANARD; *Granard, W.*—There is an epidemic of supposed gastric fever in the rural district. The cases were all admitted to Fever Hospital; one proved fatal.

GRANARD; *Scrabby, No. 2*.—District healthy. Most of the deaths recorded are of old people. One death from pneumonia. No cases of pulmonary tuberculosis.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy; only two deaths registered during the quarter.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 2*.—More than half the deaths registered during the quarter resulted from tuberculous disease, which, I am afraid, is on the increase in this district.

DUNDALK; *Dromiskin*.—District healthy.

DUNDALK; *Dundalk, W.*—The district has been healthy during the quarter, but lately some cases of diphtheria have occurred, and we may have another epidemic of the disease. A Local Government Board inquiry regarding a new scheme for additional labourers' cottages (urban) is being held, with a view chiefly to providing accommodation for families which at present live in areas which have been condemned. Of course this, when carried through, will improve the town. The electric lighting is in full swing and giving the greatest satisfaction.

Meath County.

ARDEE; *Collon, No. 2*.—District free from all zymotic disease.

ARDEE; *Drumcondra*.—District is in a healthy state.

DROGHEDA; *St. Mary's*.—The sanitary state of the district is good.

DROGHEDA; *Stamullen*.—District free from infectious diseases during quarter.

DUNSHAUGHLIN; *Killeen*.—Sanitary condition healthy. Pertussis very prevalent, accounting for three deaths.

KELLS; *Nobber*.—Chin-cough existed in two remote parts of the district; two deaths occurred through same, mere infants. It did not spread, however. Otherwise, the health of the district is eminently satisfactory.

NAVAN; *Painestown*.—District in fair sanitary condition. No epidemic disease.

OLDCASTLE; *Oldcastle, W.*—The district is at present in a fairly satisfactory condition.

TRIM; *Summerhill*.—Four of the nine persons over 65 years died of cancer: two of the stomach, one of the liver, and one an epithelioma of leg. Of the tuberculous cases, one was a pulmonary case in an old man of seventy-nine, in whom it was diagnosed 20 years ago, and whose wife also died of it. The second case was a case of gastric ulcer, who developed phthisis, of which her mother died. The third was a very long-standing case of tuberculosis of the ankle joint.

Queen's County.

ABBEYLEIX; *Ballinakill*.—District very healthy.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in the district are good.

MOUNTMELICK; *Clonaslee*.—The sanitary arrangements in my district are good.

MOUNTMELICK; *Clonygowan, No. 1*.—District very healthy.

MOUNTMELICK; *Mountmellick W.*—Sanitary arrangements in fair condition.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; Glassan.—District very healthy. Five cases of tuberculosis were under treatment during quarter.

BALLYMAHON; Ballymore.—Sanitary condition of district satisfactory. One death was due to pulmonary tuberculosis, the disease having been contracted in Scotland.

GRANARD; Finnea, No. 1.—The sanitary arrangements good.

MULLINGAR; Castletown Geoghegan.—The sanitary condition satisfactory.

MULLINGAR; Killucan.—The district is healthy.

MULLINGAR; Milltown.—Chest affections were prevalent during the quarter, and two deaths were registered from pneumonia; but the number of deaths are not above the average for the past ten years. The sanitary arrangements are fairly well looked after, and satisfactory. Emigration, that appeared to be on the decline for upwards of twelve months previously, revived during the quarter, unquestionably on account of the "American letter." In every case in his district the medical officer can bear clear testimony to this letter, with the passage ticket and money, as the sole cause of this apparently hopeless evil. There were no deaths from tuberculosis or cancer.

MULLINGAR; Mullingar W.—Health of district good.

Wexford County.

GOREY; Camolin.—The sanitary condition of the district is good.

GOREY; Killenagh and Wells.—Health of district is satisfactory.

NEW ROSS; Fethard, No. 1.—The sanitary condition of the district is satisfactory.

WEXFORD; Bannow.—The sanitary condition of the district is satisfactory.

WEXFORD; Broadway.—A few cases of "enteric" in portion of the district, otherwise district healthy.

WEXFORD; Crossabeg.—District healthy.

Wicklow County.

BALTINGLASS; Baltinglass, No. 1. W.—No infectious disease prevalent in this district. One death from diphtheria in the Workhouse here. The case came in from another district in the Union.

BALTINGLASS; Dunlavin.—There was an epidemic of infective jaundice.

BALTINGLASS; Kiltegan.—Health of district good.

NAAS; Blessington.—The health of the district is generally good. The death of an old man was registered at 91 years.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDRUM; Annamoe.—District healthy during quarter.

RATHDRUM; Aughrim. Sanitary arrangements satisfactory.

RATHDRUM; Newcastle.—Health of district good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan W.—Health of district good.

COROFIN; Corofin W.—District very healthy during quarter.

ENNIS; Crusheen.—Health of district good.

ENNIS; Newmarket.—The health of the district has been satisfactory, and the sanitary arrangements have been carefully attended to. Two cases of cancer have been registered.

ENNISTIMON; Roadford.—The district is in a very healthy condition. Sanitary arrangements very good. Houses much better kept and lime-washed twice a year.

KILLADYSERT; Ballynacally W.—Health of district good. Sanitary arrangements fair.

KILLADYSERT; Labasheeda.—Health of district continues good.

KILRUSH; Carrigaholt.—Health of district continues very good.

KILRUSH; Craggahnock.—Sanitary condition of district good.

KILRUSH; Kilkee.—The sanitary state of the district fair.

KILRUSH; Kilrush W.—Health of rural district good. Whooping-cough prevalent in urban area.

LIMERICK; Bridgetown.—District healthy.

LIMERICK; Coolacasey.—The district was very healthy during the quarter.

SCARRIFF; Feakle.—Health of district good.

SCARRIFF; Mountshannon W.—District continues in a healthy state.

SCARRIFF; Quin.—The district is free from any sort of epidemic. The sanitary condition of the district good.

Cork County and County Borough.

BANDON; Innishannon.—District healthy; uncertified death, age 82 years.

BANTRY; Bantry W.—The sanitary condition of district is fairly good. One case of cancer certified.

BANTRY; Durrus and Kilcrohane.—District very healthy, no sickness of any sort. Of the five deaths registered four were of persons aged 88, 85, 76, and 73 years. No cases of tuberculosis.

BANTRY; Glengariff.—The district is very healthy; no epidemic during the quarter ended.

BANTRY; Kealkill.—Health and sanitary condition of district good.

CASTLETOWN; Kilcatherine.—District healthy.

CORK; Carrigaline, No. 1.—District very healthy.

CORK; Cork Rural, No. 1., W.—Sanitary conditions of the district are very much improved, and many new cottages are being built. All tuberculous cases died in Cork District Hospital.

CORK; Dripsey.—There was one case of scarlet fever, and one of diphtheria, during the quarter. The latter died; the case was very advanced when I saw it. The sanitary condition of district fairly good.

CORK; *Queenstown, No. 2.*—A few cases of scarlatina.

CORK; *Whitechurch.*—A good many cases of tonsillitis during last month; two cases of scarlet fever which have been sent to hospital.

DUNMANWAY; *Coolmountain.*—The district continues to be exceedingly healthy, except for a slight outbreak of diphtheria, which was confined to one family, of which four children were stricken; one died, and three that were removed to hospital, I am glad to say, recovered.

DUNMANWAY; *Dunmanway W.*—The sanitary arrangements in the district are fairly good. There were four deaths registered as being due to pulmonary tuberculosis. Of these more than one death occurred more than twelve months ago, and, apparently, was not a result of disease contracted in the district. In another case the deceased had only just returned from England. There was one case of cancer. Twelve deaths occurred of persons over 65 years of age.

FERMOY; *Kilworth.*—Whooping-cough prevalent.

KANTURK; *Milford.*—The district is healthy.

KILMALLOCK; *Charleville.*—The district is healthy.

KINSALE; *Ballyfeard.*—Health of district during quarter has been good.

KINSALE; *Kinsale W.*—The enteric fever case occurred in the military barracks. There were no cases of enteric in the district outside the barracks.

MALLOW; *Ballyclogh.*—District healthy.

MALLOW; *Buttevant.*—District in a healthy and sanitary condition.

MALLOW; *Rahan.*—District healthy during past quarter; no infectious disease.

MIDDLETON; *Aghada.*—District healthy. The deaths registered were due to consumption, old age, and accident; unavoidable causes to a great extent.

MIDDLETON; *Middleton, No. 2.*—The health of the district has been good during the quarter.

MIDDLETON; *Walshtownmore East.*—One death registered of a man aged 108 years; from enquiries I have made I believe he was that age.

MITCHELSTOWN; *Mitchelstown, No. 1, W.*—Whooping-cough was very general throughout the district, also catarrhal jaundice, which, with the exception of two cases, was confined to children under fourteen years.

SKIBBEREEN; *Dromdaleague.*—Whooping-cough prevalent in the district.

SKULL; *Goleen.*—District in a very good sanitary condition.

SKULL; *Skull W.*—Three deaths from tuberculous disease; no other infectious disease in the district during the quarter. Sanitary condition good. There were five uncertified deaths, one at 88, one at 85, two at 84, and one at 77 years.

Kerry County.

CAHERSIVEEN; *Caher W.*—The district is healthy.

CAHERSIVEEN; *Emlagh.*—District healthy. I have again to record that no case of infectious

disease has occurred. Unfortunately the number of deaths from tuberculosis is unusually high. This I attribute in part to the continuously inclement weather, which aggravated the disease, and compelled phthisical patients to remain indoors; and very often in ill-ventilated houses. No case of cancer.

CAHERSIVEEN; *Glanbehy.*—One woman died of cancer of breast. District healthy.

CAHERSIVEEN; *Valencia.*—District healthy.

DINGLE; *Castlegregory.*—District healthy. One death registered at the age of 103 years.

DINGLE; *Dingle W.*—District healthy.

DINGLE; *Ventry.*—District healthy.

KENMARE; *Kenmare W.*—District healthy.

KENMARE; *Tuosist.*—District in good sanitary condition. No epidemic of any sort.

KILLARNEY; *Coom.*—District healthy during past quarter.

KILLARNEY; *Killarney, No. 1, W.*—Some cases of scarlatina in district; vaccination postponed in consequence.

KILLARNEY; *Killorglin.*—District has been healthy during the quarter. Slight improvement in sanitary arrangements.

KILLARNEY; *Molahiffe.*—The sanitary state of the district is good; one case of enteric fever, imported from another district.

LISTOWEL; *Ballyduff.*—Five deaths from tuberculous disease were registered during the quarter. There were two deaths from diphtheria, the first that occurred in the district for years past. One had no medical attendant, and the other was dying before I saw him. Another brother got the disease, but anti-diphtheritic serum was injected in time, and so his life was saved.

LISTOWEL; *Ballyhorgan.*—The district is in a good sanitary condition.

LISTOWEL; *Ballylongford.*—District very healthy for quarter; low death-rate; cases of consumption less frequent, thanks to modern remedies.

LISTOWEL; *Listowel W.*—District exceptionally healthy; death-rate considerably reduced.

LISTOWEL; *Tarbert.*—I consider the health of the district satisfactory on the whole.

TRALEE; *Brosna, No. 1.*—One death registered at 100 years. District healthy.

TRALEE; *Tralee No. 1, W.*—Vaccination was not performed owing to the existence of scarlatina amongst children in the district.

Limerick County and County Borough.

CROOM; *Castletown.*—No case of zymotic disease.

KILMALLOCK; *Bruff.*—The district is particularly healthy. No case of infectious disease for the quarter. The sanitary condition of the district is good.

KILMALLOCK; *Bruree.*—The healthiest quarter for years past.

KILMALLOCK; *Kilfinnane.*—District very healthy.

KILMALLOCK; *Kilmallock W.*—District healthy. No epidemic disease.

KILMALLOCK; *Hospital*.—District healthy.

LIMERICK; *Annacotty*.—Sanitary arrangements good. District very healthy.

LIMERICK; *Caherconlish*.—Health of district good. I sent two cases of tuberculosis to the sanatorium in Wicklow some time ago. They are both home now; one was very advanced. They are both very much improved.

LIMERICK; *Clarina*.—The sanitary arrangements in the district are in a rather satisfactory condition. The district is entirely free from fever.

LIMERICK; *Limerick, No. 2*.—An epidemic of whooping-cough, followed by one of measles, prevailed during the quarter.

LIMERICK; *Limerick, No. 3*.—Health of district fairly good. Pertussis prevalent during last quarter, and half of this. A few cases of scarlatina, but no deaths registered from it. A severe and general epidemic of measles, varied in character, often like German measles. District otherwise in a fairly good and healthy condition; and the sanitary arrangements satisfactory.

LIMERICK; *Moroe*.—District generally healthy. One case of croup in a child 1½ years, during quarter. An outbreak of measles at present, of a mild type without complications, so far.

LISTOWEL; *Glin*.—There was one case of measles in district during the quarter; otherwise the public health was satisfactory.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy.

MITCHELSTOWN; *Mitchelstown, No. 2*.—District very healthy.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair. Scarlatina of a mild type, except in those cases in which death occurred, in the district during quarter.

NEWCASTLE; *Feenagh*.—The general health of the district is good.

RATHKEALE; *Askeaton*.—During the past quarter the district was very healthy. One death was caused by pulmonary tuberculosis, and another by meningitis, caused by tubercle.

RATHKEALE; *Pallaskenry*.—Some cases of scarlatina, otherwise a healthy quarter.

RATHKEALE; *Rathkeale, No. 1, W*.—There was a severe epidemic of bronchitis among the children, but only one fatal case. There were three deaths from tuberculosis, not yet registered; one was a returned American. I am of opinion the latter cases are responsible for a great increase in the spread of the disease at present.

RATHKEALE; *Rathkeale, No. 2*.—My district was in a very healthy condition, and free from all contagious diseases.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W*.—The epidemic of typhus fever, which visited this district during last quarter and beginning of current quarter, has entirely disappeared.

BORRISOKANE; *CloghJordan*.—District healthy.

BORRISOKANE; *Terryglass*.—The district generally is very healthy. There is no fever, &c., among any of the inhabitants, and the houses, as a rule, are kept very clean and neat.

NENAGH; *Nenagh, W*.—District healthy.

NENAGH; *Newport*.—No case of infectious disease occurred in this district during the quarter.

NENAGH; *Portroe*.—District in a healthy condition.

NENAGH; *Silvermines*.—One death from pulmonary tuberculosis registered.

NENAGH; *Toomyvara*.—There was one case of scarlet fever during the quarter.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district for the quarter ended has been very good.

CALLAN; *Mullinahone*.—Condition of district very healthy. There were no epidemic or contagious diseases during quarter. Sanitary condition fairly good. There were two deaths caused by tuberculosis during quarter, namely, one of tuberculous meningitis, and another of tuberculous laryngitis. No case of cancer.

CARRICK-ON-SUIR; *Garrangibbon*.—With the exception of one case of scarlatina, the district is free from infectious disease. The child was removed immediately to hospital.

CASHEL; *Killenaule*.—The health of the district during past quarter has been very satisfactory.

CLOGHEEN; *Caher*.—One case of whooping-cough occurred in the district during the past quarter. No other cases of same up to the present; otherwise the district is in a healthy state.

CLOGHEEN; *Clogheen, W*.—No epidemic diseases. District free from serious illness of any kind.

CLONMEL; *Kilsheelan, No. 1*.—Two cases of scarlet fever.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District very healthy.

URLINGFORD; *Kilcooly*.—The district has been healthy during past quarter, with the exception of three cases of scarlatina that were removed to hospital. Sanitary arrangements good, and fairly carried out.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—There have been three cases of scarlatina during the past quarter. The sanitary condition of the district is satisfactory.

CLONMEL; *Ballymacarbry*.—Sanitary condition good; one case of scarlatina. One death registered as 80, and one as 86 years.

DUNGARVAN; *Dungarvan, W*.—District healthy during past quarter.

KILMACTHOMAS; *Bunmahon*.—Five cases of scarlet fever at end of quarter; patients sent to hospital; district otherwise healthy.

LISMORE; *Ballyduff*.—Vaccination, sanitation and general health of district very satisfactory.

LISMORE; *Tallow*.—Health of the district continues satisfactory.

WATERFORD; *Kilmeadan*.—Health of district good. An unusual prevalence of bronchitis and rheumatic affections due, doubtless, to the damp, unseasonable weather during the months of July and August.

WATERFORD; Waterford, Urban, No. 1, W.—The health of the district during the past quarter has good. No deaths registered from infective fevers. The sanitary condition of the district is gradually being improved. During the past month, September, there has been a widespread epidemic amongst young children of feverishness with cough, the latter appears of tracheal origin, and the duration has been about 10–14 days. A few young infants have succumbed.

WATERFORD; Woodstown.—A case of cerebro-spinal fever occurred in Passage East, and was removed to the Fever Hospital, and proved fatal. The general health of the district is good.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Doagh.—The district has been, practically, free from infectious disease during the quarter.

ANTRIM; Randalstown.—Two cases of typhoid fever reported for the month of July. No fresh cases and no deaths therefrom. District at present free from infectious disease.

ANTRIM; Templepatrick.—The sanitary arrangements of the district, with few exceptions, are good, and the health of the public exceptionally good.

BALLYCASTLE; Ballycastle, W.—District healthy.

BALLYCASTLE; Croagh.—District very healthy; death-rate low.

BALLYCASTLE; Cushendall.—Sanitary arrangements of district very good. Not one case of infectious disease during the quarter, nor is there a case of any form of tuberculous disease in the district. Average age of the five deaths is 73.

BALLYMENA; Ballymena, W.—Whooping-cough prevalent during the quarter, causing 16 deaths, chiefly from broncho-pneumonia. There have been a good many cases of measles as well, with three deaths as a result.

BALLYMENA; Broughshane.—One death of a woman in her 101st year. Health of district good, with the exception of some cases of whooping-cough.

BALLYMENA; Clogh.—District very healthy. Sanitary arrangements fairly good.

BALLYMENA; Galgorm.—District healthy. Death-rate very low.

BALLYMENA; Glenwhirry.—Whooping-cough prevalent; district otherwise healthy.

BALLYMENA; Portglenone.—Measles epidemic; no deaths. Health of the district good.

BALLYMENA; Toome.—Health of the district good.

BALLYMONEY; Dirraw.—Health of district most satisfactory. Sanitary arrangements good.

BELFAST; Belfast Rural, No. 3.—No deaths from cerebro-spinal fever have occurred during the quarter.

BELFAST; Belfast Rural, No. 4.—The good health of the district has been well maintained during the quarter. Whooping-cough of a mild type was prevalent, but there were few complications and no fatalities.

LARNE; Waterfoot.—Sanitary arrangements very good.

LISBURN; Dunmurry.—The sanitary condition of this district very good. No epidemic of any kind.

LISBURN; Glenavy.—Health of district good; no epidemic during quarter.

Armagh County.

ARMAGH; Loughgall.—There were six cases of diphtheria during the quarter, one of which died. Three were removed to hospital, and three treated at their own homes. Otherwise the district is healthy.

ARMAGH; Markethill.—Two cases of typhoid fever were reported, and one of diphtheria; otherwise the district has been very healthy.

ARMAGH; Rich Hill.—District healthy.

ARMAGH; Tynan.—The health of this district very satisfactory.

CASTLEBLAYNEY; Newtownhamilton, No. 1.—Measles and scarlet fever epidemic.

LURGAN; Lurgan, No. 1, W.—General health of district very good, with the exception of a few sporadic cases of scarlet fever; no zymotic disease.

LURGAN; Lurgan, No. 2.—The district is in a good sanitary condition.

NEWRY; Forkill.—No vaccinations performed in the early part of quarter owing to the prevalence of scarlatina.

NEWRY; Poyntz Pass.—District very healthy.

Belfast County Borough.

BELFAST; Belfast Urban, No. 4., W.—No deaths from cerebro-spinal fever.

BELFAST; Belfast Urban, No. 5.—No outbreak of any infectious diseases during quarter.

BELFAST; Belfast Urban, No. 9.—No deaths from cerebro-spinal fever have occurred during the quarter.

BELFAST; Belfast Urban, No. 11.—The health of the district during the quarter has been good, there being a marked absence of the usual "summer diarrhoea." Pneumonia has been prevalent.

BELFAST; Belfast Urban, No. 13.—No deaths from cerebro-spinal menengitis.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—District in a healthy condition.

CAVAN; Belturbet.—Belturbet urban and rural districts in a healthy state. Influenza, whooping-cough, and chicken-pox prevalent during quarter.

CAVAN; Killashandra.—No deaths from cancer or tuberculosis. District healthy.

COOTEHILL; Tullyvin.—Whooping-cough was prevalent during quarter.

ENNISKILLEN; Holywell, No. 2.—The sanitary condition of the district is fairly good.

GRANARD; Finnea, No. 2.—The sanitary arrangements are good.

GRANARD; *Scrabby*, No. 1.—Health of the district good. Only three deaths have been recorded. One death from pulmonary tuberculosis, deceased being a shoemaker about 55 years of age.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—Sanitation fairly good.

DONEGAL; *Donegal*, W.—A few cases of scarlatina of a mild type, and two cases of diphtheria occurred during the quarter. These were removed to Fever Hospital, and no fresh cases have appeared since the end of August.

DONEGAL; *Dunkineely*.—District healthy. A few cases of scarlatina of mild type occurred during quarter, but did not spread beyond the two families in which it appeared.

DONEGAL; *Mountcharles*.—District healthy.

DONEGAL; *Pettigoe*.—There was one case of enteric fever during the quarter; otherwise the district has been healthy.

DUNFANAGHY; *Crossroads*.—District free from any epidemic during quarter.

DUNFANAGHY; *Dunfanaghy*, W.—Whooping-cough prevalent in part of district.

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Carrick*.—District healthy.

GLENTIES; *Doocharry*.—District healthy.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Carndonagh*, W.—District very healthy.

INISHOWEN; *Clonmany*.—Vaccination all postponed in one very large portion of district owing to a severe epidemic of measles.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—District healthy at present.

LETTERKENNY; *Church Hill*.—District healthy. No epidemic.

MILLFORD; *Fanad*.—Health of district good.

MILLFORD; *Rathmullan*.—Two cases of enteric fever occurred during the quarter.

STRABANE; *Raphoe*.—District fairly healthy. No zymotic disease during past quarter.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. The majority of the deaths were at an advanced age.

STRANORLAR; *Killygordon*.—District healthy during quarter. Sanitation very satisfactory.

Down County.

BANBRIDGE; *Ballyward*.—A slight outbreak of scarlet fever occurred in a portion of the district adjoining Rathfryland. This was quickly checked. Eleven of the sixteen deaths were over 65; the majority of these over 75. Of the remaining five deaths, tuberculosis claimed two, and malignant disease one. The sanitary condition is satisfactory.

BELFAST; *Castlereagh*, No. 1.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—There have been some cases of scarlet fever in district during last month of quarter. Number of deaths registered very low in comparison with births.

DOWNPATRICK; *Killyleagh*.—The public health has been good. The death-rate lower than usual. No epidemics.

DOWNPATRICK; *Portaferry*.—Sanitary condition of district is good. District is free from infectious diseases.

KILKEEL; *Kilkeel*, No. 2, W.—Health of district very good.

KILKEEL; *Rosstrevor*.—Sanitary condition of district very satisfactory. Slight epidemic of whooping-cough, no deaths therefrom.

LISBURN; *Annahilt*.—The sanitary condition of the district is good.

LISBURN; *Ballylesson*.—District healthy.

LISBURN; *Drumbeg*.—Births about the average. Deaths lowest on record for this district.

LISBURN; *Hillsborough*.—There were several cases of scarlatina and two of diphtheria during the quarter, otherwise district particularly healthy.

LISBURN; *Saintfield*.—Nine out of twelve deaths registered were of people of 70 years and upwards. Slight outbreak of scarlet fever.

LURGAN; *Moir*.—The epidemic of whooping-cough has almost entirely left the district, save a few cases at the extreme eastern corner. Scarlatina has, however, appeared, but with no deaths so far. The three cases of cancer include one case of sarcoma operated on, and rapidly recurrent. There is a remarkably low death-rate this quarter; just half the births.

LURGAN; *Waringstown*.—During the quarter there were 15 cases of scarlet fever, and one case of diphtheria. Ten of these were removed to hospital, and six were kept at home, and isolated. The type has been mild, and there has been no death; otherwise the district has been healthy, and the death-rate low.

NEWRY; *Donaghmore*.—District remarkably free from sickness during past quarter.

NEWRY; *Rathfryland*.—The sanitary condition of this district is good.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. General health good. No epidemics.

NEWTOWNARDS; *Comber*.—Health of district very good. No epidemic. One family had diphtheria; only case of epidemic disease arising in the district. Sanitation, on the whole, very good.

NEWTOWNARDS; *Donaghadee*.—Health of the district good.

NEWTOWNARDS; *Kilmood*.—Only two deaths in district between the age of 17 days and 61 years. Health of district excellent.

NEWTOWNARDS; *Newtownards*, W.—I think the improved sanitary conditions under which the people now live are beginning to show in the death-rate. I do not remember ever having so few deaths in any quarter. Last year we had in this quarter 73 deaths, and of these 23 were urban cases of enteritis in children under 2 years of age. We have had no enteritis this year. Of course, the weather had a good deal to do with this, but the fact that the Urban Sanitary authority, during May, June and July, employed men, and did a great deal of domestic scavenging must not be lost sight of.

Fermanagh County.

ENNISKILLEN; *Enniskillen, W.*—Sanitary condition fairly good.

ENNISKILLEN; *Florencecourt.*—The sanitary state of the district is fairly satisfactory. Two cases of diphtheria occurred in the second month of quarter, removed to Fever Hospital; disinfecting precautions taken; no further spread of disease.

ENNISKILLEN; *Holywell, No. 1.*—The sanitary condition of the district is fairly good. A custom exists in this district which is most dangerous to health. In every case of illness amongst the peasantry (except fevers which they shun) the neighbours flock to see the sick person, and if the patient be a male and a smoker some friend lights his pipe, and hands it to him to smoke. That infected pipe is then passed from mouth to mouth round the assembly. I have known of pulmonary tuberculosis to be contracted by this pernicious habit.

ENNISKILLEN; *Lisbellaw.*—Health of district very good. Two cases of scarlet fever during quarter.

IRVINESTOWN; *Clonelly.*—District healthy during the quarter.

IRVINESTOWN; *Ederney.*—District at present healthy.

IRVINESTOWN; *Irvinestown, W.*—An outbreak of scarlatina of severe type causing one death occurred in September. Otherwise health of district good. One death registered at 105 years; certificate of this woman's baptism obtained for old-age pension officer.

LISNASKEA; *Derrylin.*—Two cases of scarlatina reported; no other epidemics.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. One death occurred from scarlet fever, and one from diphtheria in Fever Hospital. Majority of deaths were of persons aged 60 years and upwards.

Londonderry County and County Borough.

COLERAINE; *Aghadowey.*—A serious amount of erysipelas and septic poisoning of wounds in district during quarter, thought to be due to long periods in the summer during which there was no sunshine.

COLERAINE; *Garvagh.*—No epidemic during quarter. District particularly healthy.

COLERAINE; *Kilrea.*—District healthy. There were two cases of scarlatina in the same family during the latter part of the quarter—both are convalescent—and at present there is no other outbreak of this disease.

COLERAINE; *Portstewart.*—District very healthy.

LIMAVADY; *Bellarena.*—District healthy; free from epidemic illness.

LIMAVADY; *Limavady, W.*—No infectious diseases.

LONDONDERRY; *Claudy.*—District healthy; no epidemic disease.

MAGHERAFELT; *Maghera.*—District very healthy.

MAGHERAFELT; *Moneymore.*—One case of typhoid fever occurred at beginning of August; cause could not be traced; isolated and disinfectants used; no other cases. With this exception, district has been free from infectious disease.

Monaghan County.

CARRICKMACROSS; *Donaghmoyne.*—District at present in a very healthy state.

CASTLEBLAYNEY; *Castleblayney, W.*—The health of the district has been good during the quarter, and there are no cases of infectious disease, so far as I am aware.

CLONES; *Clones, W.*—A good deal of whooping-cough of a severe type during the early part of the quarter, and there were several deaths of young children from this cause.

COOTEHILL; *Dawsongrove.*—The sanitary condition of the district is fair. Four cases of scarlet fever occurred during the quarter.

MONAGHAN; *Castleshane.*—The district is healthy. There is no epidemic of any sort.

MONAGHAN; *Emyvale.*—Health of district good. No epidemics.

MONAGHAN; *Kilmore.*—District healthy. No epidemic.

MONAGHAN; *Scotstown.*—The sanitary condition of the district is satisfactory.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district very satisfactory. No epidemics of any kind.

CASTLEDERG; *Drumquin.*—The sanitary arrangements in the district are satisfactory. None of the infectious diseases were prevalent, with the exception of three cases of scarlatina which have all recovered, and there has been no further spread of the disease.

CASTLEDERG; *Killeter.*—State of district healthy.

CLOGHER; *Aughnacloy.*—District generally healthy.

CLOGHER; *Clogher, W.*—The district has been pretty healthy during the quarter.

CLOGHER; *Fivemiletown.*—The health of the district was pretty good during the quarter.

COOKSTOWN; *Coagh.*—District very healthy. Only five deaths registered during the quarter; the lowest number on record.

COOKSTOWN; *Pomeroy.*—Health of the district is very good.

COOKSTOWN; *Stewartstown.*—District at present exceedingly healthy.

DUNGANNON; *Benburb.*—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran.*—Health of district good. Two cases of diphtheria, of sisters, both recovering. Only five deaths registered, each of whom attained an average of over 72 years. No cases of tubercle or carcinoma.

DUNGANNON; *Coal Island.*—A healthy quarter.

OMAGH; *Drumquin.*—The sanitary arrangements of the district are fairly good. There has been no epidemic. A severe form of purulent ophthalmia has been pretty common amongst children.

OMAGH; *Fintona.*—The health of the district has in general been good during the past quarter and with the exception of one supposed case of diphtheria, free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—There were no deaths from, and almost a total absence of intestinal trouble amongst children during the quarter.

OMAGH; *Omagh, No. 1, W.*—Health of district good. Two deaths from enteric fever, and one death from diphtheria from outside district; died in Infectious Hospital.

OMAGH; *Omagh, No. 2.*—District healthy for the past three months, with the exception of two cases of enteric fever, which were removed to hospital.

OMAGH; *Sirmilecross*.—Death-rate very small this quarter. However, we have had six cases of typhoid fever which have been removed to hospital. The sanitary arrangements are very satisfactory.

IV. PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin*.—Sanitation good.

CLIFDEN; *Roundstone, No. 1.*—District healthy.

CLIFDEN; *Roundstone, No. 2.*—There has been a marked decrease in the number of deaths of infants since one of Lady Dudley's nurses became resident in the district. Two deaths from tuberculosis. The number of deaths from this disease in this district is decreasing.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—The sanitary condition of the district is good.

GALWAY; *Oranmore*.—The district continues healthy.

GALWAY; *Spiddle*.—Some cases of typhus fever; all removed to hospital (Galway) where two of them died. District otherwise healthy.

GLENNAMADDY; *Glennamaddy, W.*—Four deaths were registered as having been caused by cancer, and there were ten deaths of persons aged 65 and upwards.

GORT; *Kinvarra*.—The health of the district is good.

GORT; *Gort, W.*—The health of the district during the quarter has been good.

LOUGHREA; *Athenry*.—I find that people are very slow to register deaths, whereas births are invariably registered without compulsion.

LOUGHREA; *Bullaun*.—One of the eight deaths was at the age of 78 years.

LOUGHREA; *Loughrea, W.*—District more than exceptionally healthy.

MOUNT BELLEW; *Mount Bellew, W.*—Sanitary condition of district fair.

OUGHTERARD; *Cloonbur, No. 1.*—Health of the district very good.

OUGHTERARD; *Lettermore*.—I consider the district presently to be in a fairly healthy condition, but the housing accommodation, and sanitary arrangements are bad. Pulmonary tuberculosis rather common; to my knowledge there is only one case of fever in the district.

PORTUMNA; *Eyrecourt*.—The district is in a healthy condition.

PORTUMNA; *Portumna, No. 1, W.*—I believe the district is free from infectious disease, and that the sanitary arrangements are good.

TUAM; *Tuam, No. 1, W.*—Health good during quarter. There were a few cases of bronchitis which proved fatal. Sanitary condition of district improving.

TUAM; *Tuam, No. 2.*—One death from diphtheria. Two deaths from pulmonary tuberculosis; both young men who had been for a time in a Sanatorium, and one had returned from the United States of America suffering from the disease.

Leitrim County.

BALLYSHANNON; *Kinlough*.—Deaths and births below the average. Number of deaths registered fifteen; one at the age of 105 years; two at 90, and four at 80 years and upwards.

BAWNBOY; *Ballinamore*.—Sanitary condition of district good.

CARRICK-ON-SHANNON; *Drumshambo*.—District in fairly good sanitary condition.

MANORHAMILTON; *Drumkeeran*.—The sanitary condition of the district is good.

MANORHAMILTON; *Manorhamilton, W.*—Eight cases of enteric fever and four of scarlatina occurred.

MOHILL; *Carrigallen*.—The health and sanitation of the district were fairly good during the quarter. One death of a child was attributed to diphtheria; no medical attendant.

MOHILL; *Mohill, W.*—Sanitary arrangements fairly good.

MOHILL; *Rinn*.—There were some cases of scarlet fever in portion of the district; prompt removal to hospital and the infection did not spread.

MOHILL; *Rowan*.—Sanitary arrangements in district good.

Mayo County.

BALLINA; *Ballina, W.*—A slight outbreak of measles and scarlet fever occurred during the quarter. One death registered from the former. Twelve deaths registered from different forms of tuberculosis, and two deaths from cancer. Two cases of pulmonary phthisis, brother and sister living together, died within 5 months of each other, ages 25 and 26 years, and duration of illness eight and nine months respectively; no previous cases of this disease in the family.

BALLINA; *Crossmolina*.—District continues in fair sanitary condition.

BALLINROBE; *Ballinrobe, W.*—Sanitary condition of district good.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements fair. No infectious diseases. Health of district very good.

BALLINROBE; *Cong*.—The health of district good. Of the deaths registered, one man had reached the age of 100 years.

BALLINROBE; *Hollymount*.—There were some cases of a very mild form of scarlatina through the district; they were promptly isolated, and removed to the Union Hospital. The general health of the people was good during the quarter.

BELMULLET; *Binghamstown, W.*—District in a healthy state.

BELMULLET; *Knocknalower.*—There is no contagious disease existing in my district at present. A great number of the people of my district keep their cattle in their dwellinghouses under the plea of poverty, and this, in my opinion, is responsible for the contagious diseases at times prevalent here.

CASTLEBAR; *Balla.*—District healthy.

CASTLEBAR; *Castlebar, No. 1, W.*—Health of district particularly good. A marked improvement in the sanitary condition throughout the district is evident.

CASTLEBAR; *Castlebar, No. 2.*—District free from infectious disease. Tuberculosis very prevalent.

CLAREMORRIS; *Ballyhaunis.*—Health of district good. No zymotics. The typhoid fever case was from the Ballindine district of this Union. One fatal case of carcinoma of neck. Sanitation progressive.

CLAREMORRIS; *Claremorris, W.*—There has been no outbreak of infectious disease during the quarter.

KILLALA; *Killala, W.*—The health of the district has been satisfactory during the quarter. Six children from different parts of the district were reported to be suffering from jaundice. The illness was not severe or prolonged in any of the cases.

SWINEFORD; *Foxford.*—Health of district excellent.

SWINEFORD; *Kiltamagh.*—I am treating two cases of pulmonary tuberculosis in young men, harvesters, who contracted the disease in England. In both cases these poor fellows were put to sleep in stables in the sweaty clothes which they had worn during the day.

SWINEFORD; *Swineford, W.*—There were no epidemics during past quarter, with the exception of a few cases of whooping-cough. The district is in a fairly sanitary condition.

WESTPORT; *Achill.*—District very healthy; sanitary state good.

WESTPORT; *Islandeady.*—The district is in a very healthy condition.

WESTPORT; *Louisburgh.*—The general sanitary condition of district good. No case of infectious disease occurred during quarter. General health of district very good during same period.

WESTPORT; *Newport.*—Sanitary condition of town very backward, but some slight improvements have been made since last quarter. Slight outbreak of enteric fever in one portion of district, due to bad condition of sanitation. Three deaths from tuberculosis, and two from whooping-cough registered.

Roscommon County.

ATHLONE; *Kiltoom.*—Sanitary condition of district good. One case of general tuberculosis, also of recurring cancer.

BOYLE; *Boyle, No. 1, W.*—There were two cases of enteric fever, and one of scarlet fever during the last month of the quarter, and one death from scarlet fever, which was not attended by me, in a remote corner of the district in August. The district was fairly healthy during the past quarter.

CARRICK-ON-SHANNON; *Aughrim.*—There were two cases of scarlatina of a mild type. There is a regrettable increase in the number of deaths due to cancer, all of the stomach, and all occurring in males between the ages of sixty and seventy years.

CASTLEREAGH; *Ballaghadereen.*—There has been very little illness during the quarter, and the sanitary condition of the district is improving every other day.

CASTLEREAGH; *Loughglinn.*—The health of the district continues to improve. The unusually wet summer caused a number of pulmonary and rheumatic complaints. The houses of the poor are much improved. There has been no death from cancer.

ROSCOMMON; *Roscommon, W.*—Health of district good.

STROKESTOWN; *Roosky.*—Three deaths from tuberculosis of lungs. Five over 70 years, five over 80 years, and one a few months over 95 years were registered.

Sligo County.

BOYLE; *Gurteen.*—District healthy.

DROMORE, WEST; *Castleconor.*—The health of the district is good, with the exception of Enniscrone Town, where there was one case of enteric fever sent to Sligo Fever Hospital, and one case treated in the town during the quarter.

DROMORE, WEST; *Easkey, W.*—Health of district very good. Sanitation progressive. Very few deaths registered, considering the very wet months of the quarter. No deaths of young children registered. Glad to notice that the people are improving their houses; better floors and better ventilation.

DROMORE, WEST; *Skreen.*—The sanitation of the district is fair. There has been no epidemic disease.

SLIGO; *Ballymote.*—No complaints about sanitary arrangements. District healthy. No zymotic diseases.

SLIGO; *Carney, No. 1.*—Sanitary condition of district good.

SLIGO; *Carney, No. 2.*—General health and sanitary arrangements of district are good. No epidemic present.

SLIGO; *Riverstown.*—District healthy and free from infectious disease.

TOBERCURRY; *Aclare.*—The sanitary arrangements of the district are improving steadily. The general health of the district fairly good.

TOBERCURRY; *Coolaney.*—Health of district excellent.

1912.]
4th Quarter.

Price One Shilling.

Marriages:—JULY, AUGUST, SEPTEMBER, 1912. **Births and Deaths:—**OCTOBER, NOVEMBER, DECEMBER, 1912.

During the quarter ended 31st December last, there were registered in the 829 Registrars' Districts in Ireland 23,496 births—a number equal to an annual birth-rate of 21·4 in every 1,000 of the estimated population*—and 17,366 deaths, representing an annual rate of 15·8 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,875 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 23·3 in every 1,000 of the estimated population, and the death-rate 13·7 per 1,000.

The birth-rate in Ireland for the quarter is 0·6 below the average rate for the corresponding quarter of the ten years, 1902–1911, and also 0·4 below the rate for the fourth quarter of 1911. The deaths are 361 above those registered in the corresponding quarter of 1911; the death-rate is 0·3 above the rate for that quarter, but 0·6 under the average for the fourth quarter of the ten years, 1902–1911.

In comparison with those for the corresponding quarter of 1911, the returns of pauperism furnished by the Local Government Board show a decrease of 1,000 in the average number of Workhouse inmates on Saturdays during the quarter, but an increase of 761 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years, 1902–1911, the number of Workhouse inmates shows a decrease of 5,533, and the number of persons on out-door relief shows a decrease of 14,281, the total under both heads being 20·4 per cent. under the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·3 per cent.

* See page 288.

The annual marriage-rate (5·2 per 1,000 of the population) represented by the marriages registered during the third quarter of 1912, is 0·3 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 30th September, 1912, and by the BIRTHS and DEATHS registered in the Quarter ended 31st December, 1912.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year ; those for the provinces and remaining counties on the population according to the Census of 1911.

See note (*) page 243.

MARRIAGES.

The Marriages (5,682) registered in Ireland during the third quarter of 1912 are equivalent to an annual rate of 5·2 per 1,000 of the estimated population, being 0·4 above the rate for the corresponding quarter of 1911, and 0·3 above the average rate for the third quarter of the ten years 1902–1911. Of the total number of marriages, 3,740 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,942 under the 7 and 8 Vic., cap. 81 ; the former number being equal to an annual rate of 4·6 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·8 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·3 above, and that under the latter heading 0·2 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1902–1911, and the average number for that period; also the number registered in the first, second, and third quarters of 1912.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 23,496—12,006 boys and 11,490 girls—being equal to an annual ratio of 1 in every 46.7, or 21.4 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1902–11, was 24,243, equivalent to an annual rate of 22.0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 21.1 per 1,000 of the population according to the Census of 1911; Munster, 20.9; Ulster, 22.2; and Connaught, 20.8.

The highest county or county borough birth-rate* is 28.5 for Dublin county borough, and the lowest 14.5 for Dublin County. Of the intermediate rates the highest five are—Belfast county borough, 26.1; Mayo, 23.8; Kildare, 22.5; Antrim, 22.4, and Tipperary, North Riding, 22.3. The lowest five are—Roscommon, 16.9; Meath, 18.0; Westmeath, 18.1; Leitrim, 18.1, and King's, 18.2.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 17,366—8,620 males and 8,746 females—affording an annual ratio of 1 in every 63.1, or 15.8 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1902–11, was 16.4 per 1,000.

The death-rate in Leinster was 17.0 per 1,000 of the population according to the Census of 1911; in Munster, 15.2; in Ulster, 16.6; and in Connaught, 12.6.

The county or county borough death-rates* range from 11.0 in Kerry to 21.5 in Dublin county borough. Between these rates the lowest five are—Mayo, 11.7; Clare, 12.0; Roscommon, 12.4; Galway, 12.6, and Leitrim, 13.2; and the highest five are—Limerick county and county borough, 21.3; Waterford county and county borough, 18.6; Belfast county borough, 18.5; Kilkenny, 17.9, and Armagh, 17.6.

See note () on page 224.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1902–1911, and the average number for that period ; also the number registered during each quarter of the year 1912 :—

BIRTHS.						DEATHS.				
YEAR.	Quarter ending the last day of				Total.	Quarter ending the last day of				Total.

AGES.—Of the 17,366 deaths registered last quarter, 2,066, or 11·9 per cent., were of infants under one year of age ; and 7,288 or 42·0 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 87·9 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 13·2 per cent. of the total deaths registered therein ; in Munster, 13·0 per cent. ; in Ulster, 11·4 per cent. ; and in Connaught, 8·1 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 37·1 per cent. ; in Munster, to 42·8 per cent. ; in Ulster, to 42·0 per cent. ; and in Connaught, to 52·7 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,026, and is equivalent to an annual rate of 0·94 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the December quarter of 1912, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1907–1911:

Name of Disease.	Number of Deaths in Dec. quarter, 1912.	Average number of Deaths in Dec. quarter of the 5 years, 1907–1911.
Enteric Fever,	53	92
Typhus,	6	12
Small-pox,	—	—
Measles,	413	126
Scarlet Fever,	85	50
Whooping-cough,	125	176
Diphtheria,	82	94

* See note (†) on page 231.

ENTERIC FEVER.—During the quarter 53 deaths from this cause were registered, equivalent to an annual rate of 0·05 per 1,000 of the population estimated to the middle of 1912. The average number of deaths for the corresponding quarter of the 5 years 1907-11 was 92, and the numbers registered in the March, June and September quarters of 1912 were 64, 56 and 40 respectively. Of the 53 deaths registered during the quarter under notice, 16 belonged to the county borough of Dublin; 8 to the superintendent registrar's district of Cork; 2 to each of the superintendent registrar's districts of Ballyshannon, Clonmel, Londonderry, Loughrea, Newry and Tralee, and in each of fifteen other districts one death was registered.

TYPHUS.—Six deaths from this cause were registered during the quarter ending 31st December, 1912, the average for the corresponding quarter of the previous 5 years being 12, and the numbers registered in each of the 3 preceding quarters of 1912, being 14, 10 and 4 respectively. The deaths during the period under notice were registered in the following superintendent registrars' districts:—Athlone, Belmullet, Castlereagh, Cootehill, Dublin South, and Galway.

SMALL-POX.—No death from this disease was registered, nor was the presence of the disease in any district notified by the Registrar.

MEASLES.—The 413 deaths from this cause, equivalent to a rate of 0·38 per 1,000 of the estimated population, are above the numbers registered in the preceding quarters of 1912 which were 97, 182 and 105 respectively, and also above the average (126) for the corresponding quarter of the 5 years 1907-11. Of the deaths registered during the quarter under review, 122 belonged to the superintendent registrar's district of Limerick, 170 to Belfast county borough, 13 to Dublin county borough, 26 to the registrar's district of Dundalk, and in each of the following superintendent registrars' districts 5 or more deaths were registered:—7 in Athy; 7 in Ballinasloe; 9 in Edenderry; 6 in Larne; 8 in New Ross; 5 in Tipperary; and 5 in Tralee.

SCARLET FEVER.—Eighty-five deaths from scarlet fever were registered, representing an annual rate of 0·08 per 1,000. The average for the corresponding quarter of the 5 years 1907-11 was 50, and the number of deaths registered in the March, June and September quarters of 1912 was 65, 74 and 78 respectively. Eleven deaths each were registered in the county boroughs of Belfast and Dublin; 8 deaths were registered in the superintendent registrar's district of Lisburn, all of which occurred in Purdysburn fever hospital in Ballylesson district, of residents of Belfast; 7 deaths were registered in the superintendent registrar's district of Lurgan, 6 in Mountmellick, 5 in Inishowen, and 4 in Cork.

WHOOPING-COUGH.—There were 125 deaths from this cause registered, representing a rate of 0·11 per 1,000 of the estimated population. The average number of deaths for the corresponding quarter of the previous 5 years was 176, the number in the March, June and September quarters of 1912 being 353, 294 and 199 respectively. In the superintendent registrar's district of Ballymena 13 deaths were registered; in Ballymoney, 9 deaths; in Belfast, 5 deaths; in Clonmel, 8 deaths; in North Dublin, 9 deaths; in South Dublin, 8 deaths; and in the superintendent registrars' districts of Naas, Rathdrum, and Trim 5 deaths each were registered.

DIPHTHERIA.—There were 82 deaths registered from diphtheria, the average being 94, and the number in the March, June and September quarters being 105, 81 and 70 respectively. The 82 deaths are equivalent to an annual rate of 0·07 per 1,000 of the estimated population. Of the total deaths, 8 belonged to the superintendent registrar's district of Dublin North; 13 to Dublin South; and 13 were registered in Lisburn union, of which 10 were of residents of Belfast, in Purdysburn fever hospital in Ballylesson.

DIARRHOEAL DISEASES.—Included in the total are 216 deaths of children under 2 years of age from diarrhoea and enteritis. Of the total, 53 belonged to Dublin county borough, and 64 to Belfast county borough.

TUBERCULOUS DISEASE.—During the quarter under notice 2,009 deaths from all forms of tuberculous disease were registered, equivalent to an annual rate of 1·83 per 1,000 of the population estimated to the middle of the year.

In the notes which follow, which have been kindly furnished by the Registrars, special observations on the status of tuberculous disease and sanitation are included.

Tipperary ; Bansha.—“There were two deaths from pulmonary tuberculosis, both young girls. The death of a sister to one, also a young girl, was registered in the previous quarter from pulmonary tuberculosis. The two had spent some time in the United States and returned suffering from the disease.”

Antrim ; Crumlin.—“Tuberculosis of the lungs seems to be on the wane in this district, and open windows are becoming the rule.”

Armagh ; Armagh.—“For the past few years there has been a steady and marked improvement in the health of my whole district, a satisfactory decline in the general death-rate. Both Urban and Rural District Councils are doing their best to improve the dwelling-houses of the working classes, by getting rid of insanitary dwellings, and compelling owners to put those that they cannot remove into better and more sanitary condition, not only as regards the dwelling itself, but also as to its surroundings which are often as important as the house.”

Cavan ; Killashandra.—“One death from phthisis pulmonalis. The branch of the Women's National Association is doing good work for the district.”

Newtownards ; Newtownards.—“The health of the district has been good. It affords me very great pleasure to be able to say that during the year which is now past I have had fewer cases of sickness among my dispensary patients than in any year during my 21 years' service. The improved sanitary conditions under which the people now live accounts for this, and the sanitary authorities have reason to be proud of the reforms which they have introduced.

Oughterard ; Lettermore.—“Phthisis is on the increase due to bad housing accommodation.”

Tuam ; Tuam, No. 2.—“One case of tuberculosis. A young man who only returned from America a few weeks before he died.”

Westport ; Louisburgh.—“One death registered from pulmonary tuberculosis in which case girl contracted same in America.”

Castlereagh ; Loughglinn.—“The prevailing damp weather has increased the number of deaths due to pulmonary tuberculosis. There is a continued improvement in the dwellings of the people, a fair amount of new slated houses being erected.”

CANCER.—Under the head of cancer 865 deaths were registered, corresponding to an annual rate of 0·79 per 1,000 of the estimated population. The rates in the March, June and September quarters were 0·77, 0·77 and 0·76 respectively.

VIOLENCE.—There were 218 deaths from violence, either accidental, homicidal or suicidal registered.

The Registrars, in their Notes, report the presence of the following diseases :

Enteric fever in 13 districts, typhus in 3, measles in 52, scarlet fever in 48, whooping-cough in 32, diphtheria in 17, influenza in 16, mumps in 3, German measles in one, and chicken-pox in 2, cerebro-spinal meningitis in one district. [See Appendix to this Report commencing on page 289.]

INQUESTS.—There were 444 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 39 of the total deaths registered.

In Leinster there was 1 inquest to every 40 deaths registered, in Munster 1 to 47, in Ulster 1 to 30, and in Connaught 1 to 91.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 17,366 deaths registered, 3,535, or 20·4 per cent., occurred in public institutions. In Leinster the percentage was 28·0, in Munster 22·8, in Ulster 15·4, and in Connaught 12·5.

UNCERTIFIED DEATHS.—According to the returns, 4,012 of the 17,366 deaths which were registered during the quarter were uncertified, being over 23 per cent. of the total. In Leinster the percentage was 17, in Munster 26, in Ulster 18, and in Connaught the uncertified deaths were over 48 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1912, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhoeal Diseases.	Total

(*ti*) Including the deaths of 8 persons from scarlet fever, 10 from diphtheria, 2 from enteric fever, and one from tuberculous meningitis, admitted from the City of Belfast to the hospital for infectious diseases at Purdysburn, in the Registrar's District of Ballylesson, and Union of Lisburn.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1912.

† See note (†) on page 231.

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1912, there were 15,637 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st December last was 4,875 (2,348 males and 2,527 females), being 84 more than in the corresponding quarter of the year 1911, but 603 below the average number for the fourth quarter of the ten years 1902-1911.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November and December in 1911 and 1912 :—

* Including 3,537 emigrants to the United States of America, viz. :—2,465 in the month of October, 811 in November, and 261 in December. Of 3,004 steerage passengers, 880 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $6\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1911 the average price was $6d.$, and in the corresponding quarter of 1902 it was $5\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $16s. 0d.$ per cwt. For the corresponding quarter of the year 1911 the average price was $13s. 6d.$, and for the fourth quarter of 1902 the average price was $15s. 1d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $4s. 2d.$ to $4s. 7d.$ In the fourth quarter of 1911 the average prices were $2s. 10d.$ to $3s. 1d.$, and the prices for the corresponding quarter of 1902 were $2s. 7d.$ to $3s. 2d.$

The price (including cartage) of Whitehaven coal in the City of Dublin during the quarter was $24s.$ per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was $75\frac{5}{8}$ and the lowest $72\frac{3}{4}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland stood at $4\frac{1}{2}$ per cent. from the 1st October to 17th October, and from the latter date till the end of the quarter at 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1912 was 37,565, or 1,000 below the average for the corresponding period in 1911.

The average weekly number of persons receiving out-door relief during the quarter was 39,706, being 761 above the average for the fourth quarter of 1911.

Of the persons receiving in-door relief during the fourth quarter of 1912, an average number of 1,651 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1911 the average weekly number was 1,631.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1912, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Moonoy, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the fourth

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1907 to 1912, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 239).

The mean height of the barometer during the fourth quarter of 1912 was 29·847 inches, being 0·195 above the average for the corresponding quarter of the five years 1907–1911; the highest reading (30·641 inches) was on the 4th October, at 9 A.M., air calm, and the lowest (28·963 inches) on the 26th November, at 9 A.M., wind S.S.W.

The mean temperature of the air during the quarter was 44·9°, being 0·1° above the average for the fourth quarter of the 5 years 1907–1911.

The maximum temperature of the air during the quarter was 63·8° and the minimum 21·2°. The maximum heat in sun was 100·1°.

Rain or snow fell on 48 days during the quarter. The rain-fall measured 5·370 inches, being 3·170 inches below the average for the fourth quarter of the five years 1907–1911. The greatest monthly rainfall was in December, when 2·060 inches were registered.

The wind blew on 31 days from W., on 17 days from S.W., on 14 days from S., on 5 days from E., on 3 days from N., on 2 days from N.E., on 2 days from N.W., on one day from S.E., and the air was calm on 17 days at 9 A.M.

October.—The mean height of the barometer during this month was 29·869 inches; the highest reading (30·641 inches) was on the 4th, at 9 A.M., air calm; and the lowest (29·070 inches) on the 30th, at 9 A.M., wind E.S.E. The mean temperature of the air was 46·4°, the maximum registered was 61·7°, and the minimum 24·0°. The 18th was the warmest day, and the 4th and 25th the coldest nights. The mean of the dry bulb was 47·1°, and of the wet bulb, 44·6°. The maximum heat in the sun was 100·1°, and the minimum on the grass 19·0°. The total amount of sunshine recorded was 109·3 hours, the greatest daily amount being 9·0 hours on the 4th. The minimum on the grass was below 30° on 11 nights. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain or snow fell on 13 days. The rain-fall measured 1·600 inches; the greatest amount in 24 hours was 0·445 inch on the 26th.

November.—The mean height of the barometer during this month was 29·969 inches; the highest reading (30·388 inches) was on the 1st, at 9 P.M., air calm, and the lowest (28·963 inches) on the 26th, at 9 A.M., wind S.S.W. The mean temperature of the air was 43·9°, the maximum registered was 63·8°, and the minimum 21·2°. The 7th was the warmest day, and the 30th the coldest night. The mean of the dry bulb was 43·6°, and of the wet bulb 42·0°. The maximum heat in sun was 80·3°, and the minimum on the grass 14·0°. The total amount of sunshine recorded was 48·9 hours, the greatest daily amount being 6·7 hours on the 1st. The minimum on the grass was below 30° on 9 nights. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·5. Rain or snow fell on 16 days. The rain-fall measured 1·710 inches; the greatest amount in 24 hours was 0·470 inch on the 4th.

December.—The mean height of the barometer during this month was 29·702 inches, the highest reading (30·128 inches) was on the 2nd at 9 P.M., air calm, and the lowest (29·020 inches) on the 26th, at 9 A.M., wind E.N.E. The mean temperature of the air was 44·3°; the maximum registered was 57·0°, and the minimum 25·2°. The 20th was the warmest day, and the 1st the coldest night. The mean of the dry bulb was 44·6°, and of the wet bulb 42·7°. The maximum heat in sun was 72·0°, and the minimum on the grass 20·0°. The total amount of sunshine recorded was 33·0 hours, the greatest daily amount being 4·6 hours on the 6th. The minimum on the grass was below 30° on 12 nights. The maximum ozone was 0·8, the minimum 0·1, and the mean 0·6. Rain or snow fell on 19 days. The rain-fall measured 2·060 inches; the greatest amount in 24 hours was 0·410 inch on the 21st.

THE YEAR 1912.

The total number of births registered in Ireland during the year 1912 (as returned by the Registrars) was 100,884, or 23·0 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 72,275, or 16·5 per 1,000. Of the 72,275 deaths, 3,630, equal to 0·8 per 1,000 living, were caused by one or other of the principal epidemic diseases.† In the Urban Districts, which contain nearly one-third of the total population, the birth-rate was 26·2 per 1,000 of the population; the death-rate (all causes), 18·3, and the epidemic death-rate, 1·5 per 1,000. The corresponding rates for the remainder of the country are—births, 21·4; deaths from all causes, 15·6; and deaths from the principal epidemic diseases, 0·5. According to the returns of Vaccination furnished by the Registrars there were 77,374 successful primary vaccinations performed during the year.

URBAN DISTRICTS.

TABLE VIII. —BIRTHS and DEATHS registered during the YEAR 1912, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL EPIDEMIC DISEASES;† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin, and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-two weeks ending Saturday, 28th December, 1912.

† The rates for the total of Ireland and those for the districts in the Dublin Registration Area, for Belfast and Londonderry, have been calculated on the population estimated to the middle of 1912.
(a) Including the deaths of 9 persons from scarlet fever, 26 from diphtheria, 7 from tuberculosis disease, and 2 from cerebro-spinal fever or cerebro-spinal meningitis; admitted from the City of Belfast to the hospital for infectious diseases at Purdy's-burn, in the Registrars' District of Ballylesson, and the deaths of 2 persons from cerebro-spinal meningitis registered in Belfast.
(b) Including one death from cerebro-spinal meningitis.

URBAN DISTRICTS—continued.

METEOROLOGY.

*[Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq.,
LL.D., Sc.D., F.R.S.]*

The cool weather which had prevailed with little interruption during the summer of 1912 continued throughout the greater part of October, when a striking absence of seasonable warmth was again experienced. In the two following months the thermometer was as a rule well above its average level, the only marked exception occurring at the close of November and the beginning of December, when the northern parts of the country were visited by a frost of considerable severity. In October and November the rainfall was below the normal, but in December there was a large excess, the total amount over the country as a whole being equal to nearly half as much again as the average.

The earlier half of October was mostly dry, and although the thermometer on the 12th and 13th succeeded in rising to a fairly high level (63° at Dublin and 64° at Cahir) the weather was mostly cool, with sharp frost about the middle of the first week, the minima in the early morning of the 4th being as low as 24° at Mountmellick and 25° at Kilkenny. After the 19th the weather, which had hitherto been mainly of an anticyclonic type, was influenced by barometrical depressions which advanced from the Atlantic, and was therefore generally stormy and wet. Between the 20th and 21st a strong gale from between south-west and north-west was experienced (the extreme velocity, in squalls, being as high as 67 miles per hour at Quilty, Co. Clare), while in the closing week there were frequent gales from the westward or south-westward accompanied, in many instances, by considerable falls of rain. At Wexford the amount on the 26th was as large as 1·2 in., but in very few other instances did the daily fall amount to as much as an inch. For the month as a whole the rainfall was, however, very deficient, especially in the eastern and north-eastern parts of the country. At Phoenix Park the total did not amount to more than 56% of the average, and at Armagh the proportion was no higher than 40%. The duration of bright sunshine varied considerably in different parts of the country, but was mostly a little in excess of the average.

November was extremely changeable, but until very nearly the close the weather was for the most part mild and fairly dry. The month opened, however, with a sharp touch of frost, the thermometer falling early on the 2nd to a minimum of 21° at Birr Castle and 25° at Markree Castle. On the 7th, when a warm wind extended over the country from the southward, the temperatures recorded in the east of Ireland were higher than in any other part of the United Kingdom, the thermometer rising to 66° at Dublin (Trinity College) and Kingstown, and to 67° at Newcastle (Co. Wicklow). Between the 10th and 12th strong gales from between west and north were experienced, the change to a polar current being marked by showers of hail and sleet in many northern districts, with thunder and lightning in a few isolated places. Sharp ground frosts occurred between the 12th and 14th, but with a subsequent backing of the wind to west and south-west the thermometer rose above the normal. Between the 22nd and 27th the weather was extremely rough, the passage of a very deep cyclonic system across Scotland on the 26th being attended by heavy gales from south-west and west. Shortly after 7 a.m. on the 26th the anemometer at Quilty registered the passage of a squall blowing with a velocity of 71 miles per hour. Towards the close of the month the weather, although still very unsettled, became much quieter, and over the northern districts a sharp frost set in, accompanied in many places by falls of snow or sleet. Early on the 30th the thermometer in the screen fell below 25° in many parts of the country, the lowest readings reported being 18° at Markree Castle and 20° at Clongowes Wood. Bright sunshine was very deficient; at Birr Castle and Markree Castle less than half the average duration was recorded.

December opened with a continuation of the November frost, the thermometer falling early on the 1st to 20° at Birr Castle and 22° at Clongowes Wood. Later in the day a rapid thaw set in, and for the remainder of the month the thermometer was considerably above its average level, scarcely any frost being experienced in any part of the country. Over the United Kingdom generally the weather was influenced by numerous cyclonic disturbances, which moved along in paths lying mostly to the northward of Scotland, the resulting south-westerly to westerly winds increasing very frequently to the force of a gale. At Quilty, on the 17th, a velocity of 75 miles per hour was registered just before midnight. Generally speaking, the weather was, however, at its worst at about Christmas time. On the 24th a severe gale from the south-westward was experienced, the squalls reaching a velocity of 68 miles per hour at Quilty, while on the 26th another storm of almost equal violence prevailed over the southern parts of the country, the centre of the disturbance passing in the latter instance along the south coast of Ireland and directly across England. Rainfall was unusually frequent (at many places in the western and southern parts of the country a measurable quantity was recorded every day), but owing to the fact that many of the most important storm systems kept well to the northward of these islands the individual amounts were seldom large. In the Dublin district and in many other localities situated in the east of Ireland the total rainfall for the month was below the average. Bright sunshine was again very deficient; at Phoenix Park less than two-thirds of the average duration was recorded.

Mean Temperature was about 1° above the average, and was higher than in the corresponding quarter of the three preceding years, 1909-1911. Over the country generally the highest temperatures occurred (as is normally the case in the closing quarter of the year) in October, mostly between the 8th and 13th, when the thermometer rose slightly above 60° in many parts of the country. In the east of Ireland they were observed on November 7th, when the thermometer in the Dublin district and in one or two other localities exceeded 65° . The lowest temperatures occurred on November 30th or December 1st, the sheltered thermometer falling in many places at least 10° below the freezing point. On the surface of the grass the readings on November 30th were as low as 14° at Phoenix Park and 15° at Markree Castle.

Rainfall.—Over the northern half of the country the number of days with rain was in close agreement with the normal, but the total precipitation was 4% in excess. In the south there were more rain days than usual, but the total amount was 15% less than the average. One most striking feature in respect to this element was the almost entire absence of large individual amounts, very few places reporting as much as an inch in a rainfall day, ending ordinarily with 9 a.m.

Bright Sunshine was deficient in the north, where the mean daily duration amounted to less than 2 hours, only 87 per cent. of the average. In the south the weather was much brighter, the mean daily duration amounting to nearly $2\frac{1}{2}$ hours, or to 6 per cent. more than the average. The finest week was that ended October 12th, when several stations reported a total duration amounting to more than one-half of the time the sun was above the horizon.

MARRIAGES Registered during the Quarter ending 30th September, 1912, in PROVINCES, COUNTIES,* and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1912; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA of PERSONS aged 2 years and upwards; also VIOLENT DEATHS,† INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 31st December, 1912, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

† Including accidental deaths, homicides, and suicides.

‡ The Returns for Carrigahar District, in Cork Union, for Seskian District, in Dungarvan Union, and for Silvermines District, in Nenagh Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1911 have been adopted.

(a) See note (*), page 243.

(a) See note (*), page 243.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 235 and 254 are extracted from the Weekly Returns made by the Registrars, and relate to the weeks extending from 30th September, 1912 to 28th December, 1912. With the exception of 129 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

* Exclusive of 10 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

NOTE.—This table has been constructed for the years 1838 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851 ; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1912.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Tuberculosis is fairly common in the district.

CARLOW; *Bagenalstown*.—During the past quarter an epidemic of measles followed by broncho-pneumonia has been very prevalent in this district, seven deaths of children having been registered; otherwise the district is healthy.

CARLOW; *Borris*.—There were slight outbreaks of scarlatina and measles during the quarter. Sanitary conditions good.

CARLOW; *Fennagh and Myshall*.—A very severe epidemic of measles broke out in the middle of the quarter. It was accompanied by gastro-enteritis as well as bronchitis, in the majority of cases.

CARLOW; *Leighlinbridge*.—Epidemic of measles in district, otherwise health of district good. No death from measles. Weather very damp and wet.

CARLOW; *Tullow*.—With the exception of a very mild form of scarlatina, this district has been in a healthy state.

NEW ROSS; *St. Mullin's*.—Excepting the prevalence of measles and whooping cough, the quarter has been healthy. Sanitation leaves much to be desired.

Dublin County.

BALROTHERY; *Kilsallaghan*.—The health of the district has been good during the past quarter and free from infectious diseases.

DUBLIN, NORTH; *Blanchardstown and Castleknock*.—Pertussis prevalent.

DUBLIN, SOUTH; *Crumlin*.—The district is in a normally healthy condition.

DUBLIN, SOUTH; *Donnybrook, No. 1*.—District healthy.

DUBLIN, SOUTH; *Tallaght*.—Sanitation of district good.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District healthy.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 2*.—The general health of this district is good at present as there is not an epidemic disease prevalent.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary arrangements of my district are good; the district has been free from any infectious disease.

Kildare County.

CELBRIDGE; *Maynooth*.—District very healthy.

NAAS; *Ballymore Eustace*.—Whooping-cough prevalent in the district; one death occurred from it.

NAAS; *Naas and Carragh, W*.—There are some cases in Naas Hospital of persons suffering from diphtheria, both from the urban and rural districts. One death from this disease has been registered, the patient being from the rural portion.

NAAS; *Robertstown and Kilmeage*.—Sanitary condition of district good.

Kilkenny County.

CALLAN; *Callan, W*.—Two cases of scarlatina occurred during the quarter, both ending in recovery. Two deaths were registered as caused by tuberculous disease and one death from cancer.

CALLAN; *Kilmaganny*.—Children suffered severely from various chest affections during the quarter. There were five cases of scarlet fever in the district, all of a mild type.

CASTLECOMER; *Castlecomer, W*.—There were some cases of measles in the district; none of them proved fatal.

KILKENNY; *Gowran*.—Measles prevalent during quarter.

KILKENNY; *Tullaroan*.—Of the seventeen persons whose deaths were registered during the past year, the average age at death was over 71 years. District very healthy.

NEW ROSS; *Dysartmoon*.—District healthy. There were twelve deaths during quarter; ten were seventy years and over. The remaining two were due to pulmonary tuberculosis.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—Bronchitis has been very prevalent during the quarter just ended, and in the aged has accounted for a good many deaths. Otherwise district is in a very healthy condition.

URLINGFORD; *Urlingford, W.*—Health of district good. No epidemic.

King's County.

BIRR; *Birr, W.*—Yards and sanitary accommodation of some houses defective.

BIRR; *Killyon*.—General health of locality good.

BIRR; *Kinnitty*.—Health of district good. Sanitary arrangements satisfactory. The majority of the deaths registered exceeded 60 years of age.

MOUNTMELICK; *Clonygowan, No. 2*.—Epidemic of whooping-cough; no deaths. Sanitary condition bad in certain places.

ROSCREA; *Roscrea, No. 2*.—District very healthy. Slight outbreak of scarlatina.

ROSCREA; *Shinrone*.—Sanitary condition good

TULLAMORE; *Clara*.—Sanitation of district good. During last month of quarter there was an outbreak of measles; no deaths up to present.

TULLAMORE; *Killoughy*.—There has been an outbreak of measles in this district within the past few months; no fatal case.

TULLAMORE; *Tullamore, W.*—Experienced sharp epidemic of measles during the quarter, many adults being attacked. Epidemic now declining.

Longford County.

BALLYMAHON; *Abbeyshrule*.—District healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinallee*.—The district is in fair sanitary condition and free from contagious disease.

GRANARD; *Granard, W.*—District is in good sanitary condition and free from contagious disease.

GRANARD; *Scrabby, No. 2*.—Health of the district good.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 2*.—Whooping-cough has been prevalent in this district during the past quarter.

DUNDALK; *Barronstown*.—The district is in a healthy and sanitary state.

DUNDALK; *Dromiskin*.—District very healthy. All deaths registered were of persons over 65 years of age.

DUNDALK; *Dundalk, W.*—The death rate from zymotic diseases is higher than usual. The quarter may be described as an exceptionally severe one. The epidemic of measles (which is now dying out) with its sequelae of broncho-pneumonia &c., is accountable for twenty-six deaths. It was most prevalent and fatal amongst the poorest classes. There were also many cases of diphtheria and scarlatina. The sanitation of the town is good and cases of the latter two diseases occurred in some of the cleanest and best drained premises in Dundalk. Schools were closed for three weeks.

Meath County.

ARDEE; *Collon, No. 2*.—District free from all zymotic disease and very healthy.

ARDEE; *Drumcondra*.—District healthy.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

DUNSHAUGHLIN; *Dunboyne*.—The sanitary condition of the district is satisfactory.

DUNSHAUGHLIN; *Killeen*.—The district is in a very healthy condition. Seven cases of scarlet fever (five in one family) were sent to hospital.

EDENDERRY; *Ballyboggan*.—Severe epidemic of measles and whooping-cough during the quarter; no fatal cases; schools closed.

KELLS; *Nobber*.—District free of contagious maladies. The smallest death record for any corresponding quarter since 1908. The heaviest list for seven years ended 31st ult. was in 1909 when in the corresponding quarter fourteen were registered.

NAVAN; *Painestown*.—During the quarter measles was prevalent in a part of the district, but I was only called to see two cases. There were also a few cases of diphtheria and scarlatina.

OLDCASTLE; *Oldcastle, W.*—District continues satisfactory.

TRIM; *Summerhill*.—Health of district good.

Queen's County.

ABBEYLEIX; *Durrow*.—Health of district good; sanitary arrangements very fair.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in the district are good.

ATHY; *Stradbally*.—The sanitary condition of the district is fairly good. A mild outbreak of scarlatina occurred and also several cases of measles. Only one death occurred from the hybrid type known as German measles.

CARLOW; *Ballickmoyler and Newtown*.—One case of cancer of lip registered during quarter.

MOUNTMELICK; *Clonygowan, No. 1*.—There has been an epidemic of whooping-cough; only one death has occurred. The sanitary condition of the town is, in some localities, very bad.

MOUNTMELICK; *Maryborough*.—A good deal of scarlatina.

MOUNTMELICK; Mountmellick, W.—Sanitary arrangements in good condition except for the flooding of the River Barrow.

ROSCREA; Borris-in-Ossory.—The number of deaths in this district has been much over the average; nearly all old persons. The health of the district has been fair during the past quarter.

Westmeath County.

ATHLONE; Glassan.—District healthy and sanitary. One death registered at 99 years.

BALLYMAHON; Ballymore.—Sanitary condition of the district good.

MULLINGAR; Castletown Geoghegan.—The sanitary condition of the district is satisfactory. The vast majority of deaths were of people aged over seventy-five; over eighty per cent. were aged 65 and upwards; and most of the deaths were due to senile decay.

MULLINGAR; Killucan.—The district is healthy.

MULLINGAR; Milltown.—The improved sanitary arrangements in the district appear to be kept up very well. Chest complaints, pneumonia and bronchitis, were very prevalent. Some of the former cases proved fatal. The changeable weather during the quarter was the origin of these cases. There were no deaths from tuberculosis.

MULLINGAR; Mullingar, W.—Health of district good.

MULLINGAR; Multyfarnham.—Three out of the nine deaths registered have been caused by pulmonary tuberculosis.

TULLAMORE; Kilbeggan.—Sanitary arrangements of district were good during quarter. An extensive epidemic of whooping-cough prevailed during earlier part of quarter followed by measles, but both were mild in type, and pursued a favourable course. No deaths from pulmonary phthisis registered.

Wexford County.

ENNISCORTHY; Killann.—One case of scarlatina.

GOREY; Camolin.—There were three cases of scarlet fever during first month of the quarter, and one during the last month. Otherwise the health of the district is good.

GOREY; Killenagh and Wells.—Health of district is satisfactory.

NEW ROSS; Fethard, No. 1.—Sanitary condition of the district satisfactory.

NEW ROSS; Fethard, No. 2.—District healthy.

WEXFORD; Bannow.—The sanitary arrangements are satisfactory.

WEXFORD; Bridgetown.—Sanitation good.

Wicklow County.

BALTINGLASS; Dunlavin.—One centenarian died during the quarter.

BALTINGLASS; Kiltegan.—Health of district is normal. Births much below the average.

NAAS; Blessington.—Influenza prevalent in the past month. Otherwise the district is very healthy. Two deaths occurred from pneumonia.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district has been good.

RATHDRUM; Annamoe.—District healthy during the quarter.

RATHDRUM; Arklow.—Twelve of the deaths registered were those of persons aged 70 years and upwards, three of them being aged 97, 88, and 80 years. Total number of deaths during year was 94, representing a death rate of 14.5 per thousand of the inhabitants. There were 132 births registered during the quarter, representing a rate of 20.4 per thousand; 29 marriages, giving rate of 4.49.

RATHDRUM; Newcastle.—General health of district very good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan, W.—Health of district fairly good.

CORROFIN; Corrofin, W.—District on the whole healthy. Two sporadic cases of what looked like the mildest form of scarlatina.

ENNIS; Crusheen.—Health of district good.

ENNIS; Newmarket.—Sanitary condition of the district very satisfactory. Influenza of a mild type prevailed generally, and the unfavourable weather accounted for a large share of chest troubles.

ENNISTIMON; Ennistimon, W.—The health of the district is satisfactory.

ENNISTIMON; Roadford.—District healthy. Sanitary arrangements satisfactory.

KILLADYSERT; Ballynacally, W.—The district is healthy.

KILLADYSERT; Labasheeda.—Health of the district continues good.

KILRUSH; Carrigaholt.—For the past fortnight measles was prevalent in portion of district. Otherwise the health of district during past quarter has been very good.

KILRUSH; Craggaknock.—The sanitary arrangements of the district are good.

KILRUSH; Kilkee.—The sanitary state of district fairly good.

KILRUSH; Kilrush, W.—The health of the district is fairly good. Whooping-cough prevails.

LIMERICK; Bridgetown.—District healthy.

LIMERICK; Coolacasey.—There was no case of cancer during the quarter. The district is very healthy.

SCARRIFF; Feakle.—Health of district good.

SCARRIFF; Kilkishen.—The health of the district is satisfactory.

SCARRIFF; Mountshannon, W.—District very healthy generally.

SCARRIFF; Quin.—The sanitary arrangements are fair. No epidemic in district. One death registered by me from pulmonary tuberculosis.

Cork County and County Borough.

BANDON; Innishannon.—Age of uncertified case 76 years. Five cases of measles in one family brought direct from Limerick. Disease so far has not spread in my district. District very healthy.

BANTRY; Bantry, W.—The sanitary condition of district is fairly good. Three cases of malignant disease registered for the quarter.

BANTRY; Durrus and Kilcrohane.—District very healthy; no infectious diseases. Sanitary arrangements fair. No case of cancer.

BANTRY; Glengarriff.—Two deaths from membranous laryngitis occurred during quarter ended, boy aged six and his sister aged four. Two others in same family had a slight attack; both recovered. Otherwise district is very healthy.

BANTRY; Kealkill.—Health of district good.

CASTLETOWN; Kilcatherine.—District healthy. No deaths from cancer.

CORK; Carrigaline, No. 1.—District very healthy.

CORK; Douglas.—No cancer cases during quarter.

CORK; Queenstown, No. 2.—Scarlatina of a very mild type very prevalent during quarter.

CORK; Whitechurch.—All persons whose deaths were registered are over 65 years.

DUNMANWAY; Ballineen.—There was an epidemic of influenza, especially amongst children.

DUNMANWAY; Coolmountain.—The death-rate is an extremely low one notwithstanding the terribly severe weather. There is little or no sickness, except ordinary colds and a few cases of influenza. Of the five deaths registered the ages of four were stated to be 68 years, 74 years, 80 years, and 101 years.

DUNMANWAY; Dunmanway, W.—The sanitary condition of the district continues fairly satisfactory. Of the deaths registered ten were over 65 years. There was one death from cancer.

FERMOY; Fermoy, W.—Rural and urban district free from disease. In rural district slight outbreak of mild scarlatina.

FERMOY; Rathcormack.—The general health of the district during the quarter was exceptionally good. There was one case of scarlatina and a mild epidemic of whooping-cough.

KANTURK; Milford.—The district is healthy.

KILMALLOCK; Charleville.—The district is fairly healthy. There have been several cases of measles of a mild type.

KINSALE; Ballyfeard.—Health during the quarter has been good. Pharyngitis complicated with tonsillitis with high temperature in many cases was epidemic. No deaths from it, though a few cases were very severe.

MALLOW; Ballyclogh.—Broncho-pneumonia very prevalent at present in the district. One case of scarlatina reported during the last quarter.

MALLOW; Buttevant.—District continues in a satisfactory sanitary condition.

MALLOW; Rahan.—District healthy and free from all infectious diseases.

MIDDLETON; Middleton, No. 2.—There has been very little sickness in district during the quarter.

SKIBBEREEN; Dromdaleague.—Whooping-cough prevalent.

SKIBBEREEN; Skibbereen, W.—A death was registered from the urban district of a woman whose age was 103 years.

SKIBBEREEN; Unionhall.—Of the eighteen deaths registered, nine died at ages varying from 70 to 89 years.

SKULL; Goleen.—Of the seven deaths registered, one was over 90 years, four over 70, the remaining two being respectively 62 and 66.

Kerry County.

CAHERSIVEEN; Caher, W.—Notwithstanding the inclemency of the weather during the quarter the district is in a very healthy condition. Two deaths from tuberculosis have been registered.

CAHERSIVEEN; Darrynane.—With the exception of the sewerage in one village the district is in a fairly good sanitary condition.

CAHERSIVEEN; Emlagh.—District healthy. No cases of infectious disease occurred during the quarter. Sanitary state of the district fairly good.

CAHERSIVEEN; Glanbehy.—District healthy. Sanitary condition of district good.

CAHERSIVEEN; Valencia.—District healthy; no epidemic. Of the nine deaths registered, the ages of seven averaged 77 years.

DINGLE; Castlegregory.—There is an epidemic of measles in the district.

DINGLE; Dingle, W.—District healthy.

DINGLE; Ventry.—District healthy.

KENMARE; Kenmare, W.—District exceptionally healthy.

KENMARE; Tuosist.—District in good sanitary condition and people healthy, notwithstanding the exceptionally inclement year and the extreme poverty of the people.

KILLARNEY; Coom.—District healthy during past quarter, with the exception of two cases of scarlet fever.

KILLARNEY; Killarney, No. 1, W.—Influenza and broncho-pneumonia very prevalent amongst children during last fortnight of December.

KILLARNEY; Molahiffe.—There has been no epidemic of infectious disease of any kind during the quarter in this district.

LISTOWEL; Ballyhorgan.—Bronchitis has been very prevalent amongst children, otherwise the district is healthy.

LISTOWEL; Ballylongford.—District very healthy for quarter; most of the deaths occurring from ripe old age; one death from consumption.

LISTOWEL; Listowel, W.—District healthy.

LISTOWEL; Tarbert.—Good on the whole. Particularly free from tuberculous disease.

TRALEE; Castlemaine.—District very healthy.

TRALEE; Tralee, No. 1, W.—An epidemic of measles of a virulent type amongst children.

TRALEE; Tralee, No. 2.—Measles of a somewhat virulent type at present exists.

Limerick County and County Borough.

CROOM; Castletown.—Some cases of measles originally imported from town of Tipperary.

KILMALLOCK; Bruff.—Measles prevalent in district during latter end of quarter.

KILMALLOCK; Bruree.—The district was very healthy considering the time of the year and such a rainy season. There was one case of scarlatina.

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; *Kilfinnane*.—District very healthy. No epidemic.

KILMALLOCK; *Kilmallock, W.*—Sanitary conditions fair. Five cases of diphtheria in district during quarter.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair; district very healthy. Measles of a mild type prevalent during the past two months.

LIMERICK; *Caherconlish*.—Health of district good. No death registered this quarter from tuberculosis.

LIMERICK; *Clarina*.—During the quarter there has been an epidemic of measles in one district; otherwise the district is in a rather sanitary condition.

LIMERICK; *Limerick, No. 1*.—Severe epidemic of measles.

LIMERICK; *Limerick, No. 2*.—Measles was present in district during quarter.

LIMERICK; *Moroe*.—Severe outbreak of measles, accompanied in many cases by broncho-pneumonia, from which one child died. Heavy death-rate during quarter almost exclusively the aged. There were at 64 years one, at 66 one, at 70 one, at 73 one, at 74 three, at 75 one, at 78 one at 80 two, at 84 one, at 85 one, at 86 one, at 87 one, at 88 one, at 89 one, and at 91 two.

LISTOWEL; *Glin*.—One case of typhoid fever occurred in district during the quarter. Whooping-cough, bronchitis, and pneumonia were very rife, but these diseases are now disappearing.

MITCHELSTOWN; *Galbally*.—Whooping-cough prevalent. One case of measles. District otherwise very healthy.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is in fair condition.

NEWCASTLE; *Broadford*.—The district is in a good sanitary condition and free from infectious disease.

NEWCASTLE; *Feenagh*.—The sanitary arrangements in the district are fairly good.

RATHKEALE; *Askeaton*.—During the past quarter the district was free from all contagious diseases.

RATHKEALE; *Pallaskenry*.—A damp, unhealthy quarter. Influenza prevalent. Diseases of respiratory organs very numerous.

RATHKEALE; *Rathkeale, No. 1, W.*—District free from infectious and contagious disease; six deaths from tuberculosis, and one from cancer.

RATHKEALE; *Rathkeale, No. 2*.—My district was free from all contagious diseases during quarter.

TIPPERARY; *Grean*.—Four cases of scarlatina occurred during the quarter.

Tipperary County, North Riding.

BORRISOKANE; *CloghJordan*.—The district of CloghJordan at present is healthy. There is no zymotic disease prevalent.

BORRISOKANE; *Terryglass*.—The district for quarter has been very healthy, except for the prevalence of bronchitis among children.

NENAGH; *Nenagh, W.*—Bronchitis especially among children during latter portion of the quarter; also three or four cases of scarlatina, which were removed to hospital.

NENAGH; *Newport*.—District fairly healthy.

NENAGH; *Portroe*.—District in a healthy condition. Sanitary arrangements fairly good.

NENAGH; *Toomyvara*.—Two deaths from pulmonary tuberculosis were registered during the quarter ended, and two cases of enteric fever occurred during the quarter.

THURLES; *Templemore*.—No prevailing disease

THURLES; *Thurles, W.*—Pneumonia rather prevalent during the latter part of the quarter.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—Influenza of a severe type was prevalent during the quarter.

CALLAN; *Mullinahone*.—The sanitary condition of district fairly good; no disease prevalent; one case of typhoid fever not yet registered. No death from either tubercle or cancer, nor persons suffering from either that I know of in district.

CASHEL; *Cashel, W.*—Whooping-cough very prevalent during the quarter.

CASHEL; *Killenaule*.—Whooping-cough has been prevalent in village, a large proportion of children being affected.

CASHEL; *Kilpatrick*.—Whooping-cough prevalent last month of quarter.

CLOGHEEN; *Caher*.—Whooping-cough and bronchitis very prevalent amongst children during past quarter; otherwise district is in a very healthy state.

CLOGHEEN; *Clogheen, W.*—District is free from epidemic diseases notwithstanding that there are no systems of modern sanitation.

CLONMEL; *Kilsheelan, No. 1*.—One case of chronic pulmonary tuberculosis under treatment.

TIPPERARY; *Bansha*.—There was an epidemic of measles during the quarter. There were two deaths from pulmonary tuberculosis, both young girls. The death of a sister to one, also a young girl, was registered in the previous quarter from pulmonary tuberculosis. The two had spent some time in the United States and returned suffering from the disease.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—A slight epidemic of measles.

TIPPERARY; *Tipperary, W.*—Measles was present in district during quarter.

URLINGFORD; *Kilcooly*.—Sanitary arrangements good and fairly observed by people in general. An epidemic of influenza during months of November and December with lung complication in a great many cases.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—The sanitary condition of the district is satisfactory. There have been but two cases of infectious disease, namely, one of diphtheria and one of scarlatina, respectively, which came under my notice during the past quarter.

CLONMEL; *Ballymacarbry*.—Sanitary arrangements good. A few cases of whooping-cough of a mild type.

CLONMEL; *Kilsheelan, No. 2*.—District healthy.

DUNGARVAN; *Dungarvan, W.*—Influenza in district during past quarter.

DUNGARVAN; *Whitechurch*.—Two cases of diphtheria during the quarter.

LISMORE; *Ballyduff*.—Sanitation and general health of district very satisfactory.

LISMORE; *Tallow*.—Many young children suffered from bronchitis during the quarter. District otherwise healthy.

WATERFORD; *Kilmeadan*.—Health of district good. Undue prevalence of bronchitis and rheumatic affections due doubtless to the wet weather.

WATERFORD; *Waterford, Rural, No. 1*.—District healthy. Sanitary condition good and improving.

WATERFORD, *Waterford, Urban, No. 1, W*.—The district has been free from zymotic disease. There has been a prevalence of bronchial affection in children and young people. The sanitary condition of district is improving but there is still much to be desired.

WATERFORD; *Woodstown*.—The health of the district is very good.

YOUGHAL; *Ardmore*.—District healthy.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—Tuberculosis of the lungs seems to be on the wane in this district, and open windows are becoming the rule. During this quarter one death was registered at the age of 105 years.

ANTRIM; *Doagh*.—During the last month of the quarter there was a very widespread epidemic of measles. It seems to be still increasing, but, so far, there have been no deaths from the disease.

ANTRIM; *Randalstown*.—Deaths of persons of the following ages registered during the quarter:—80 years, 80 years, 85 years, 87 years, 90 years and 91 years.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Influenza and diseases of the respiratory organs are common.

BALLYCASTLE; *Ballycastle, W*.—There were nine cases of scarlet fever and one of diphtheria during the quarter. The number of tuberculous cases in the district is large, five deaths from all forms being registered this quarter; and there are at present five cases of pulmonary tuberculosis.

BALLYCASTLE; *Cushendall*.—Sanitary arrangements of district good. No infectious disease. Not one case of tuberculous disease.

BALLYMENA; *Ahoghill*.—Health of district above the average for the season of the year.

BALLYMENA; *Ballymena, W*.—Whooping-cough and measles, which were prevalent some time ago causing a number of deaths, have now almost entirely disappeared. Public health at present satisfactory.

BALLYMENA; *Broughshane*.—One death registered at 102 years and two at 91 years. An epidemic of measles has broken out in one corner of the district; so far no deaths.

BALLYMENA; *Clogh*.—District has been very healthy during quarter. It is rather strange that out of twenty-five births registered twenty-one are boys. The majority of the deaths are persons over 65 years of age.

BALLYMENA; *Galgorm*.—There was an epidemic of measles of a mild type during the month of October, also a number of cases of pertussis.

BALLYMENA; *Glenwhirry*.—Health of district good.

BALLYMENA; *Portglenone*.—Measles epidemic during the quarter.

BALLYMENA; *Toome*.—Health of the district good. There has been a mild outbreak of whooping-cough, which necessitated the closing of one of the schools during the quarter. No deaths resulted therefrom.

BALLYMONEY; *Dirraw*.—Measles prevalent during past quarter; no death.

BELFAST; *Belfast, Rural, No. 3*.—No deaths from cerebro-spinal fever occurred during the quarter.

BELFAST; *Belfast, Rural, No. 4*.—The health of the district has been very satisfactory. There was one death from diphtheria. Measles of a mild type is prevalent.

LARNE; *Ballycarry*.—Sanitary condition of district fairly good. Epidemic of measles in one part of district during the months of November and December, necessitating closing of schools.

LARNE; *Waterfoot*.—Sanitary arrangements excellent.

LISBURN; *Dunmurry*.—The sanitary condition of this district good, no epidemic of any kind.

LISBURN; *Glenavy*.—One death of person aged 105 years. Fairly well authenticated; born near Newry, but no record can be obtained. Quarter on whole healthy. Cold, wet weather has been severe on aged with chest affections. No epidemic.

Armagh County.

ARMAGH; *Armagh, W*.—For the past few years there has been a steady and marked improvement in the health of my whole district, a satisfactory decline in the general death-rate. Both Urban and Rural District Councils are doing their best to improve the dwelling-houses of the working classes, by getting rid of insanitary dwellings and compelling owners to put those that they cannot remove into better and more sanitary condition, not only as regards the dwelling itself but also as to its surroundings which are often as important as the house.

ARMAGH; *Blackwatertown*.—The district has been healthy during the past quarter.

ARMAGH; *Keady*.—Measles has been prevalent in the urban district during the quarter but there have not been any fatal cases.

ARMAGH; *Loughgall*.—The quarter was free from diphtheria, but there were numerous cases of rheumatic fever.

ARMAGH; *Markethill*.—Diphtheria was prevalent in the district during the past quarter.

ARMAGH; *Rich Hill*.—District very healthy.

ARMAGH; *Tynan*.—The health of the district during the past quarter very satisfactory.

LURGAN; *Lurgan, No. 1, W*.—Some cases of scarlet fever have occurred in different parts of the district and four deaths have resulted. Otherwise the district has been free from infectious disease.

LURGAN; *Lurgan, No. 2*.—The district is in a good healthy condition.

NEWRY; *Forkill*.—There was a widespread epidemic of measles during the last month of the quarter.

NEWRY; *Mullaghglass*.—Had four cases of diphtheria; patients treated in their own home, all recovered. District otherwise healthy.

Belfast County Borough.

BELFAST; *Belfast, Urban, No. 3.*—One death was registered on 30th December and was certified as cerebro-spinal meningitis.

BELFAST; *Belfast, Urban, No. 4, W.*—No deaths from cerebro-spinal fever.

BELFAST; *Belfast, Urban, No. 9.*—No deaths from cerebro-spinal fever occurred during the quarter.

BELFAST; *Belfast, Urban, No. 11.*—There has been a considerable number of cases of measles in the district during the quarter.

BELFAST; *Belfast, Urban, No. 13.*—No deaths from cerebro-spinal meningitis.

BELFAST; *Belfast, Urban, No. 15.*—Measles epidemic in this district.

Cavan County.

BAILIEBOROUGH; *Shercock.*—District healthy.

BAWNBOY; *Swanlinbar.*—Sanitation is improving generally. No epidemic of infectious disease occurred during quarter.

CAVAN; *Belturbet.*—No infectious diseases in the district for this quarter. Sanitary condition fair.

CAVAN; *Cavan, W.*—The sanitary arrangements are fairly good.

CAVAN; *Killashandra.*—Two cases of diphtheria registered during the quarter, one death from phthisis pulmonalis and one of cancerous infiltration of pylorus were registered during the quarter. District healthy. The branch of the Women's National Health Association is doing good work in the district.

COOTEHILL; *Tullyvin.*—Whooping-cough was prevalent during quarter.

ENNISKILLEN; *Dowra.*—The sanitary condition of district is fairly good.

ENNISKILLEN; *Holywell, No. 2.*—The sanitary condition of the district is fairly good; no infectious diseases.

GRANARD; *Scrabby, No. 1.*—Health of district good.

OLDCASTLE; *Ballyjamesduff.*—District healthy.

OLDCASTLE; *Virginia.*—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra.*—The sanitary condition of district fairly good.

DONEGAL; *Donegal, W.*—A few cases of scarlatina of a mild type occurred during the quarter and were at once removed to fever hospital.

DONEGAL; *Dunkineely.*—No case of infectious disease during quarter. Health of district during quarter exceptionally good.

DONEGAL; *Laghy.*—District healthy.

DONEGAL; *Mountcharles.*—There has been a number of cases of diphtheria of a mild type in the district during the quarter.

DONEGAL; *Pettigoe.*—Health of the district good no epidemic during the quarter.

DUNFANAGHY; *Crossroads.*—District free from any epidemic during the quarter.

DUNFANAGHY; *Dunfanaghy, W.*—District healthy.

GLENTIES; *Ardara.*—Pneumonia and influenza were rife in the district during quarter.

GLENTIES; *Carrick.*—District healthy.

GLENTIES; *Doocharry.*—District healthy.

GLENTIES; *Dunglow, No. 2.*—There has been a great number of cases of pleurisy and some of pneumonia and influenza during the quarter. The sanitation is bad.

GLENTIES; *Glenties, W.*—Sanitation fair.

INISHOWEN; *Buncrana.*—District healthy.

INISHOWEN; *Carndonagh, W.*—District fairly healthy.

INISHOWEN; *Clonmany.*—Measles present in district at the end of the past quarter.

INISHOWEN; *Malin.*—District healthy. Influenza and croup prevailed amongst the children during the quarter.

INISHOWEN; *Moville.*—There was an epidemic of scarlet fever in this district during the first and second month of the quarter; five deaths have been registered from it. Tonsillitis was also prevalent. At present the district is healthy.

LETTERKENNY; *Church Hill.*—District healthy. No epidemic.

LETTERKENNY; *Manorcunningham.*—Health of district good; no zymotic disease.

LONDONDERRY; *Killea.*—Influenza of a mild form present since the beginning of December.

MILLFORD; *Rathmullan.*—The district has been healthy during the quarter.

MILLFORD; *Rosquill.*—One death occurred during the quarter from whooping-cough of a child aged two months. No other cases of this disease at present nor any other infectious disease. Birth-rate in this district shows a gradual increase each year for past six years.

STRABANE; *Raphoe.*—Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan.*—Sanitary arrangements satisfactory. The deaths are all at advanced ages.

STRANORLAR; *Killygordon.*—Of deaths registered during quarter, three-fourths were of persons over 65 years; the average age of the whole being 67. Sanitation excellent.

Down County.

BANBRIDGE; *Ballyward.*—The general sanitary condition has been satisfactory. No outbreak of infectious disease has occurred.

BELFAST; *Castlereagh, No. 1.*—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch.*—There have been several cases of scarlet fever in the district during the quarter (with one death). There were also cases of measles and chicken-pox.

DOWNPATRICK; *Killyleagh.*—The death-rate has been low and I have seen very few cases of serious pulmonary disease. I have not attended a case of pneumonia during the quarter just ended. There is an epidemic of whooping-cough in the district but no deaths from the disease have been registered.

DOWNPATRICK; *Portaferry.*—District healthy. One case of scarlatina occurred and patient and contacts sent to Union Hospital.

DOWNPATRICK; *Strangford.*—Mumps prevalent during the quarter.

KILKEEL; Kilkeel, No. 2, W.—Two cases of diphtheria occurred; one died, one recovered. Every precaution has been taken to stop the spread. No case has occurred for three weeks.

KILKEEL; Rosstrevor.—Sanitary arrangements and condition of district highly satisfactory. We had a slight epidemic of whooping-cough during quarter, but no deaths therefrom. Otherwise district quite healthy. The majority of deaths was amongst old people ranging from 70 years to 98 years.

LISBURN; Annahilt.—The sanitary condition of the district is good. There are no cases of infectious disease.

LISBURN; Ballylessan.—No deaths from cerebro-spinal fever.

LISBURN; Hillsborough.—District particularly healthy. I am not aware of a single case of an infectious disease during the quarter.

LISBURN; Saintfield.—A few cases of scarlet fever and a good deal of whooping-cough and chicken-pox.

LURGAN; Moira.—There have been incursions of scarlatina into the district from an adjoining one, but no deaths. Two deaths each from tuberculosis and cancer. Birth and death rates low, exactly balancing.

LURGAN; Waringstown.—During the quarter there were forty-two cases of scarlet fever—the epidemic of the previous quarters having continued—although most of the cases were sent to hospital, the homes and clothing disinfected, and the neighbouring schools closed for a time. There were also eleven cases of diphtheria, but in a different part of the district; however, there has been no case of it since November 29th. Otherwise the district is healthy, although the deaths exceed the births. Seventeen of the thirty-two deaths were of persons over 65 years of age.

NEWRY; Rathfriland.—Sanitation of this district is good.

NEWTOWNARDS; Bangor.—Sanitary arrangements good. Slight epidemic of scarlet fever; no death. Otherwise public health is good.

NEWTOWNARDS; Comber.—Health of district very good; no epidemics, and only one case of infectious disease.

NEWTOWNARDS; Kilmoody.—There is at present a mild epidemic of whooping-cough without any deaths reported; otherwise the health of the district is excellent. The death-rate is the lowest on record for the past twenty-one years at least.

NEWTOWNARDS; Newtownards, W.—The health of the district has been good. It affords me very great pleasure to be able to say that during the year which is now past I have had fewer cases of sickness among my dispensary patients than in any year during my twenty-one years' service. The improved sanitary conditions under which the people now live accounts for this, and the sanitary authorities have reason to be proud of the reforms which they have introduced.

Fermanagh County.

CLONES; Newtown Butler.—District very healthy for past quarter; the very severe rainy weather has not, so far, produced corresponding illness.

ENNISKILLEN; Enniskillen, W.—Sanitation fairly good.

ENNISKILLEN; Florencecourt.—Sanitary condition of district fairly satisfactory. No infections occurred during the quarter.

ENNISKILLEN; Holywell, No. 1.—The sanitary condition of the district is fairly good; no infectious diseases.

IRVINESTOWN; Clonelly.—District healthy; sanitary condition of district improving.

IRVINESTOWN; Ederney.—District healthy.

IRVINESTOWN; Irvinestown, W.—Some deaths from tuberculosis; two of these cases in adults 59 and 67 years, and in three there is a history of tuberculous disease.

LISNASKEA; Derrylin.—There has been one case of typhoid fever.

LISNASKEA; Lisnaskea, W.—Sanitary state of district fair. One case of neglected diphtheria died in Fever Hospital. No other infectious disease prevalent.

Londonderry County and County Borough.

COLERAINE; Aghadowey.—There has been an outbreak of measles imported from Ballymena Union; otherwise district is healthy.

COLERAINE; Garvagh.—Health of the district is good. No epidemic during quarter except a few cases of whooping-cough.

COLERAINE; Kilrea.—District healthy.

COLERAINE; Portstewart.—Whooping-cough has been very prevalent during the past quarter, but otherwise the health of the people has been good.

LIMAVADY; Ballykelly.—Health of the district good; only one case of scarlet fever during the quarter, no spread. Of the three deaths of infants under one year, two were twins, born at the seventh month, the other death was from pneumonia occurring in a house where whooping-cough was prevalent.

LIMAVADY; Bellarena.—District healthy and no contagious disease.

LIMAVADY; Dungiven.—The birth and death rates are very low.

LIMAVADY; Limavady, W.—Whooping-cough was very prevalent in urban district.

LONDONDERRY; Claudy.—No epidemic in district.

MAGHERAFELT; Draperstown.—Health of district fairly good.

MAGHERAFELT; Maghera.—District very healthy during quarter. A considerable number (thirty) of deaths of aged people accounts for the large proportion of uncertified deaths.

MAGHERAFELT; Moneymore.—Death-rate low, and consisting mostly of old people. No death from any infections took place during the quarter. One case of typhoid fever occurred during the first month; impure water supply; removed to hospital; no other case. Two cases of scarlatina occurred in one family in Larne Union. Infection imported; removed to hospital; no other case. In a different part of district four cases in one family occurred of same disease; cause not known; isolation; no spread.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—District in fair sanitary condition. One case of scarlet fever notified; patient being removed to hospital; there were no further cases.

CARRICKMACROSS; Donaghmoyne.—Measles reported prevalent in one part of district, having been carried from a neighbouring union. Otherwise district very healthy.

CARRICKMACROSS; Raferagh.—Sanitation and general health of district is good.

CASTLEBLAYNEY; *Ballybay*.—The health of the district during the quarter was good. No outbreak of infectious disease occurred.

COOTEHILL; *Dausongrove*.—The sanitary condition of the district is fair.

MONAGHAN; *Castleshane*.—The district is healthy.

MONAGHAN; *Emyvale*.—No epidemic of any kind during quarter.

MONAGHAN; *Kilmore*.—Measles introduced into a l, and almost all the children attending that l have taken the disease, but up to the present e heard of no cases outside that school. District wise healthy.

NAGHAN; *Monaghan, W*.—The sanitary condition of Monaghan remains in an unsatisfactory

During last quarter there was an epidemic of scarlet fever among children in Monaghan, ere are no deaths.

Tyrone County.

CASTLEDERG; *Castlederg, W*.—Sanitary state of it satisfactory, only nineteen deaths (below ge); two deaths from diphtheria, which did pread. No epidemic at present. No case of ulosis registered this quarter.

CASTLEDERG; *Drumquin*.—The sanitary arrangements in the district are fairly satisfactory. There has been no case of infectious disease in the district during the quarter with the exception of one case of scarlet fever in October, which was removed to hospital and recovered, since which there has been no further spread of the disease.

CASTLEDERG; *Killeter*.—District healthy.

CLOGHER; *Aughnacloy*.—District generally healthy.

CLOGHER; *Ballygawley*.—One case of enteric fever.

CLOGHER; *Fivemiletown*.—The health of the district was pretty fair during the quarter. The birth-rate was rather low.

COOKSTOWN; *Coagh*.—Health of district good.

COOKSTOWN; *Pomeroy*.—Health of district good; sanitary conditions improving.

COOKSTOWN; *Stewartstown*.—District very healthy. Of thirteen deaths registered four were of persons between 70 and 80 years old, seven between 80 and 90 years, one 90, and one 94; three under one year.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Public health of district good. No infectious diseases with the exception of four cases of scarlet fever (imported) in one house; patients included two medical men.

DUNGANNON; *Clonavaddy*.—The sanitary arrangements in the district are good. No infectious diseases.

DUNGANNON; *Coalisland*.—Three cases of enteric fever and one of scarlatina during the quarter; all recovered. No death from cancer.

OMAGH; *Drumquin*.—The sanitary condition of the district is, with one or two exceptions, satisfactory. There have been no fever cases of any kind, but influenza, fatal in one or two instances, has been pretty prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter and free from epidemic diseases. The death-rate has been exceptionally low. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—There was no disease prevalent during the quarter.

OMAGH; *Omagh, No. 1, W*.—Health of district good. Sanitary condition, urban, fairly satisfactory; rural, unsatisfactory.

OMAGH; *Omagh, No. 2*.—District healthy with the exception of three cases of typhoid fever which occurred in one house. They were all removed to hospital.

OMAGH; *Sixmilecross*.—We had one case of enteric fever and one of diphtheria during the quarter.

IV. PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin*.—Sanitation fairly good.

CLIFDEN; *Roundstone, No. 1*.—District healthy.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—The health of the district continues good; and is remarkably free from zymotic diseases.

GALWAY; *Oranmore*.—The district continues healthy.

GALWAY; *Spiddle*.—District continues healthy; one death certified as typhus fever.

GALWAY; *Turloughmore*.—Sanitation fair. Few cases of scarlatina.

GORT; *Gort, W*.—The health of the district has been fairly good during the quarter.

GORT; *Ardrahan*.—There was an epidemic of measles in this district in 1912. Not a single child died and not a single child has been brought to me for any sequel or after condition such as measles produces. In my opinion these results are due to the existence or growing up here (which all appearances go to prove) of a race of children more virile than those of earlier generations and the production of a race more virile and stalwart than the parents.

GORT; *Kinvarra*.—The health of the district is good. The death of a woman, aged 100 years, has been registered; her daughter is in receipt of the old age pension.

LOUGHREA; *Bullaun*.—One of the nine deaths was at the age of 77 years.

MOUNT BELLEW; *Killeroran*.—Two cases of typhus fever.

MOUNT BELLEW; *Mount Bellew, W*.—Sanitary condition of Mount Bellew bad. Surrounding district satisfactory. One case of typhus fever. No serious epidemic.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district very good. No zymotics now prevailing.

OUGHTERARD; *Lettermore*.—The district is in a very unhealthy condition. Enteric fever is very prevalent, there being upwards of twenty cases within the district for past quarter. Phthisis is on the increase due to bad housing accommodation.

OUGHTERARD; *Oughterard, W*.—No deaths from cancer.

PORTUMNA; *Portumna, No. 1, W*.—The sanitary condition of the district is fairly good.

TUAM; *Tuam, No. 1, W*.—There was a large number of cases of bronchitis with influenza in children during November.

TUAM; *Tuam, No. 2*.—One case of tuberculosis, a young man who only returned from America a few weeks before he died. One case of cancer in a middle aged domestic servant who had been attending a cancer case for a long time some years ago. District free from all zymotic diseases during quarter.

Leitrim County.

BALLYSHANNON; *Kinlough*.—Deaths under average. One death from tubercular peritonitis and one from carcinoma of stomach.

BAWNBOY; *Ballinamore*.—Sanitary state of district fair.

CARRICK-ON-SHANNON; *Drumshanbo*.—District healthy and in good sanitary condition.

MANORHAMILTON; *Manorhamilton, W.*—There have been some cases of mild scarlatina.

MOHILL; *Carrigallen*.—The health and sanitary conditions of the district were good during the quarter. The few cases of scarlatina continued from last quarter have now ceased.

MOHILL; *Mohill, W.*—The condition of the district fairly healthy.

MOHILL; *Rinn*.—The general health of the district is good. Sanitary arrangements are working fairly well.

MOHILL; *Rowan*.—District free from infectious diseases.

Mayo County.

BALLINA; *Ballina, W.*—Health of the district good. No epidemic during the quarter.

BALLINA; *Crossmolina*.—District continues in fair sanitary condition, quite free from infectious disease.

BALLINROBE; *Ballinrobe, W.*—There was an epidemic of scarlet fever in the district during the quarter; there were two deaths not yet registered.

BALLINROBE; *Cappaghdruff*.—District in a fair way. No infectious diseases.

BALLINROBE; *Cong.*—The health of district good.

BALLINROBE; *Hollymount*.—Births under, and deaths about the average. There were some cases of mild scarlatina during last quarter but no fresh case came under notice during this quarter. Though the weather continued wet and damp the general health of the people is good.

BELMULLET; *Bangor*.—Sanitary state of district is at present fairly good. No zymotic disease during quarter.

BELMULLET; *Binghamstown, W.*—State of district satisfactory.

BELMULLET; *Knocknabower*.—No contagious disease during current quarter.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar, No. 1, W.*—Health of district good. Free from all zymotic diseases.

CASTLEBAR; *Castlebar, No. 2*.—Sanitary condition of district is showing improvement.

CLAREMORRIS; *Ballyvaunis*.—Health of district good. No zymotics. Two cases of carcinoma; one of axillary glands and one of breast. Sanitation progressive.

CLAREMORRIS; *Claremorris, W.*—The health of the district is good.

KILLALA; *Killala, W.*—The health of the district during the quarter was very good. Sanitary arrangements, especially in town, not satisfactory. Filth of every description allowed to accumulate on the streets and remain there for days. About twenty tuberculosis cases in entire district.

SWINEFORD; *Swineford, W.*—The district was in a fairly healthy state during past quarter. No exotic diseases prevalent. There was a small epidemic of acute tonsillitis.

WESTPORT; *Achill*.—General health and sanitary state of district good. No epidemic present.

WESTPORT; *Ballycroy*.—Bronchial, or, more properly, tracheal trouble, very prevalent. Influenza hitherto.

WESTPORT; *Islandeady*.—The district is in a sanitary condition. No record of any infectious disease occurring during the current quarter.

WESTPORT; *Louisburgh*.—The general sanitary condition of district fair during quarter. No infectious disease occurred. Health of district very good. One death registered from pulmonary tuberculosis which case girl contracted same in America.

WESTPORT; *Newport*.—Three deaths from w. ing-cough and one from cancer registered.

WESTPORT; *Westport, W.*—The district is very healthy state.

Roscommon County.

ATHLONE; *Kiltoom*.—Health and sanitary condition of district good.

BALLINASLOE; *Creagh*.—Public health of district good on the whole.

BOYLE; *Boyle, No. 1, W.*—The district was healthy during the past quarter.

CARRICK-ON-SHANNON; *Aughrim*.—One case of enteric fever. Otherwise district healthy.

CASTLEREAGH; *Loughglinn*.—The very wet weather during the past quarter has been the cause of a great number of pulmonary complaints, and especially amongst the aged. The prevailing damp weather has increased the number of deaths due to pulmonary tuberculosis. There is a continued improvement in the dwellings of the people, a fair amount of new slated houses being erected. No death from cancer.

ROSCOMMON; *Roscommon, W.*—There were five deaths due to tuberculosis and two deaths due to cancer.

STROKESTOWN; *Roosky*.—Sanitary arrangement fair. One case of chronic tuberculosis of lungs. No death from cancer registered this time.

Sligo County.

BOYLE; *Gurteen*.—District healthy. Sanitation improving.

DROMORE, WEST; *Easky, W.*—Health of district very good. No case of infectious disease during quarter.

DROMORE, WEST; *Skreen*.—Sanitary condition of the district is good. The rainfall during the quarter was exceptionally heavy. No epidemics.

SLIGO; *Carney, No. 1*.—Sanitary arrangements good.

SLIGO; *Carney, No. 2*.—District is in a healthy condition. Sanitary arrangements are good.

SLIGO; *Collooney*.—Fourteen cases of scarlatina during quarter, with no deaths.

SLIGO; *Riverstown*.—A mild outbreak of mumps during the quarter.

TOBERCERRY; *Aclare*.—Sanitary conditions are improving. There was one case of typhoid fever (fatal), one of scarlet fever, and one of meningitis (fatal).

TOBERCERRY; *Coolaney*.—Sanitation excellent.

SUPPLEMENT

TO THE

Quarterly Returns

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN

IRELAND DURING THE YEAR

1912.

Being Statistics regarding the Vaccination of Children whose Births were registered in Ireland in that year.

LONDON :

PRINTED UNDER THE AUTHORITY OF HIS MAJESTY'S STATIONERY OFFICE.

T. FISHER UNWIN, LONDON, W.C.

Price 6½d.

Vaccination Statistics.

Of the 101,035 children whose births were registered in Ireland during the year 1912, there were 66,934 returned as having been successfully vaccinated; 3,375 as having had their vaccinations postponed; 91 were returned as unsuccessful, on the ground of constitutional insusceptibility of the vaccine disease; 5,778 as having died before vaccination; 3,143 were returned as "unaccounted for owing to removal from district or otherwise," and 21,714 were reported as defaulters who had not been granted an extension of time under Form B., First Schedule. When expressed in percentages, it appears that 66·3 per cent. of the total were reported as successfully vaccinated; that 3·3 per cent. were postponed on account of the children being unfit for vaccination; that 0·1 per cent. were insusceptible of vaccination; that 5·7 per cent. died before they were vaccinated; that 3·1 per cent. were "unaccounted for owing to removal from district or otherwise"; and that 21·5 per cent. were returned as defaulters.

The following table gives the condition as regards vaccination of the children whose births were registered in the year 1912, as compared with each of the preceding 8 years:—

TABLE I.—Showing particulars regarding the Vaccination of the Children whose Births were registered in Ireland during each of the nine years 1904–1912, with their percentage to the total Births registered during each year.

Years.			Successful Vaccina- tions. (Form A, First Schedule).	Vaccina- tions postponed. (Form B, First Schedule).	Insusceptible of Vaccine Disease (Schedule D).		Died before Vaccina- tion.	Unac- counted for owing to removal from District or other- wise.	De- faulters who have not been granted an ex- tension of time under Form B, First Schedule.	Total Births registered.
					On the ground of Constitu- tional Insuscep- tibility of the Vaccine Disease.	In respect of the Children already having had Small- pox.

From a comparison of the figures in Abstract I. (page 4) relating to the provinces, it appears that the successful cases of vaccination in the province of Leinster numbered 12,370, or 45.8 per cent. of the total births registered; that in Munster the successful vaccinations numbered 14,847 or 64.0 per cent. of the total births registered therein; that in Ulster the successful vaccinations numbered 30,417 or 81.3 per cent. of the total births registered; and that in the province of Connaught the number of successful vaccinations reported was 9,300 or 69.2 per cent. of the total births registered.

Detailed information regarding vaccinations for the counties; superintendent registrars' districts (or poor law unions), arranged by provinces and counties; registrars' districts; and superintendent registrars' districts, arranged alphabetically, will be found in Abstracts I., II., III., and IV., respectively, appended to this Report. Extracts from the notes presented by the registrars are also published.

In the following tabular statement the number of successful vaccinations returned for each of the years 1882-1912 is given:—

TABLE II.—Showing the Number of Successful Primary Vaccinations in Ireland during each of the years 1882 to 1912. [Extracted from Quarterly Reports.]

Year.	Number of Successful Primary Vaccinations in each year.	Year.	Number of Successful Primary Vaccinations in each year.	Year.	Number of Successful Primary Vaccinations in each year.
1882	107,613	1893	88,695	1903	95,955
1883	106,961	1894	107,204	1904	91,976
1884	105,021	1895	92,227	1905	89,394
1885	102,680	1896	88,817	1906	90,171

1887	96,866	1898	87,169	1908	88,576
1888	93,520	1899	84,937	1909	86,799
1889	92,621	1900	91,150	1910	88,698
1890	93,368	1901	88,520	1911	84,011
1891	92,267	1902	94,303	1912	77,374
1892	89,527				

The following table shows the number of deaths from small-pox registered in Ireland in each of the years 1864-1912:—

TABLE III.—Showing the Number of Deaths from Small-pox registered in Ireland in each of the 49 years. 1864 to 1912.

Year.	Number of Deaths registered from Small-pox.	Year.	Number of Deaths registered from Small-pox.	Year.	Number of Deaths registered from Small-pox.
1864	854	1881	72	1897	3
1865	461	1882	129	1898	-
1866	194	1883	16	1899	1
1867	21	1884	1	1900	1
1868	23	1885	4	1901	2
1869	20	1886	2	1902	1
1870	32	1887	14	1903	40
1871	665	1888	3	1904	16
1872	3,248	1889	-	1905	5
1873	504	1890	-	1906	-
1874	569	1891	7	1907	1
1875	535	1892	-	1908	-
1876	24	1893	1	1909	-
1877	71	1894	72	1910	-
1878	873	1895	146	1911	-
1879	672	1896	4	1912	-
1880	389				

It will be observed that the last record of mortality from small-pox in Ireland was in the year 1907, when one death was registered.

VACCINATION STATISTICS, IRELAND.

RETURN of Particulars relative to VACCINATION regarding the CHILDREN whose BIRTHS were registered during the year 1912 in the Provinces, Counties, Superintendent Registrars' Districts (or Poor Law Unions), and Registrars' Districts of Ireland.

ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area in Statute Acres.	Population in 1911.	Successful Vaccina- tions up to 31st Dec., 1913, of Children whose births were registered in 1912 (Form A, First Schedule).	Vaccina- tions still postponed at 31st Dec., 1913, on ground of Children being unfit (Form B, First Schedule).	Insusceptible of Vaccine Disease (Schedule D).		Died before Vaccina- tion.	Unac- counted for owing to removal from District or other- wise.	De- faulters who have not been granted an ex- tension of time under Form B, First Schedule.	Total Births registered in 1912.
					On the ground of Constitu- tional Insuscep- tibility of the Vaccine Disease.	In respect of the Children having already had Small- pox.

WILLIAM J. THOMPSON,
Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
DUBLIN, 29th June, 1914

APPENDIX.

EXTRACTS from the REGISTRARS' NOTES to the RETURNS of VACCINATIONS regarding the CHILDREN whose BIRTHS were registered in IRELAND in 1912.

The Registrars alone must be considered responsible for the opinions which they express.

I. PROVINCE OF LEINSTER.

COUNTY CARLOW.

BALTINGLASS; *Rathvilly*.—Some of the parents have an objection to having their children vaccinated. I am making out list of defaulters to have notices served.

CARLOW; *Fennagh and Myshall*.—The Guardians decided about a year ago not to prosecute defaulters.

CARLOW; *Leighlinbridge*.—Vaccination at a stand-still owing to anti-vaccination crusade.

CARLOW; *Tullow*.—Vaccination has not been carried out in this district owing to District Council not enforcing Act.

New Ross; *St. Mullin's*.—Prevalence of epidemics of measles, scarlatina, and whooping-cough delayed vaccination.

DUBLIN COUNTY.

BALROTHERY; *Holmpatrick*.—Twelve children born in the Union Workhouse, and I don't know whether they are vaccinated or not.

DUBLIN SOUTH; *Clondalkin*.—Of the two cases of insusceptibility one was vaccinated three times and the other on four occasions, an interval of 14 days being allowed between each operation.

DUBLIN SOUTH; *Tallaght*.—It is useless to serve notices on most of the defaulters, as they tell me when cautioned that they know vaccination is not compulsory.

RATHDOWN; *Killiney*.—Vaccination steadily decreasing owing to the fact that the Vaccination Act is not enforced.

DUBLIN COUNTY BOROUGH.

DUBLIN SOUTH; *South City No. 2*.—Vaccination has ceased in this district.

KILDARE COUNTY.

ATHY; *Athy*.—No action is being taken by the Board of Guardians to enforce the Vaccination Order.

ATHY; *Castledermot*.—Vaccination Act is not being enforced in Athy Union.

BALTINGLASS; *Baltinglass No. 2*.—Vaccination is much in arrears in this district. There is a strong feeling against it amongst the public. Defaulters will have to be prosecuted, that is if the Guardians are willing to do so. They have refused in many Unions.

NAAS; *Ballymore-Eustace*.—Some of the parents consider that vaccination is not compulsory.

NAAS; *Robertstown and Kilmeage*.—Parents of children think the Vaccination Acts are no longer compulsory, hence the large number of defaulters.

KILKENNY COUNTY.

KILKENNY; *Kilkenny No. 1*.—The Vaccination Act is not enforced in this district.

KILKENNY; *Kilkenny No. 2*.—Impossible to get parents to bring their children for vaccination.

URLINGFORD; *Urlingford*.—There is a fairly large number of children born before 1912 still unvaccinated

WATERFORD; *Ullid*.—Owing to failure of Guardians to prosecute it is difficult to secure compliance with Act.

KING'S COUNTY.

BIRR; *Kinnitty*.—No defaulters.

TULLAMORE; *Philipstown*.—With regard to defaulters, notice has been served in each case. Postponement was owing to measles last summer.

LONGFORD COUNTY.

GRANARD; *Scrubby No. 2*.—Guardians do not press parents, if defaulters, to have their children vaccinated.

LOUTH COUNTY.

ARDEE; *Castlebellingham*.—Vaccination for the last 6 months not satisfactory, owing to the Board of Guardians voting against it.

DROGHEDA; *Drogheda No. 2*.—I do not believe that there are really 47 defaulters, but as mothers in some cases will not bring their children back for inspection, I must return these cases as defaulters.

MEATH COUNTY.

KELLS; *Moynalty*.—Vaccination well attended to by parents.

NAVAN; *Castletown*.—Defaulter in Column 7 refuses to have his child vaccinated, although noticed every quarter since child was 3 months' old.

QUEEN'S COUNTY.

ABBEYLEIX; *Ballinakill*.—The Guardians are not enforcing the Vaccination Act in Abbeyleix Union.

ABBEYLEIX; *Ballyroan*.—No vaccinations in this district since July, 1912, and those were nearly a year old.

ATHY; *Stradbally*.—The Athy Board of Guardians resolved not to enforce the vaccination laws, and the anti-vaccination craze prevails in this district.

MOUNTMELICK; *Coolrain*.—Measles prevalent in district.

WESTMEATH COUNTY.

MULLINGAR; *Ballynacargy*.—The fifteen defaulters are from remote parts of this district, who from one reason or another, distance, illness, &c., have not been able to attend with their children.

MULLINGAR; *Mullingar*.—The number in col. 6 refer to soldiers' children principally.

WEXFORD COUNTY.

ENNISCORTHY; *Enniscorthy*.—None of the children born in 1912 were vaccinated.

ENNISCORTHY; *Ferns*.—The Vaccination Act is not being carried out in this Union.

GOREY; *Camolin*.—I did not vaccinate one single case since I took up duty here two years ago—owing to anti-vaccination league.

GOREY; *Coolgreany*.—The large number of defaulters is due to the anti-vaccination agitation.

GOREY; *Killenagh and Wells*.—Vaccination is at a stand-still owing to anti-vaccination movement in the county.

NEW ROSS; *Fethard No. 1*.—Very few children have been presented for vaccination during the last two years.

NEW ROSS; *Fethard No. 2*.—Owing to the anti-vaccination literature in local Press parents are afraid to get their children vaccinated.

WEXFORD; *Bannow*.—Vaccination is absolutely at a stand-still at present. The parents strongly object.

WEXFORD; *Bridgetown*.—Vaccination not enforced in district.

WICKLOW COUNTY.

BALTINGLASS; *Baltinglass No. 1*.—There is a strong feeling against vaccination amongst the public in this district, and many defaulters.

NAAS; *Blessington*.—Some of the parents consider vaccination not now compulsory.

RATHDRUM; *Aughrim*.—Compulsory vaccination is not enforced in this Union.

RATHDRUM; *Dunganstown*.—There is a kind of passive resistance to the Vaccination Law now.

RATHDRUM; *Rathdrum*.—The majority in Col. 6 were born in the Union Workhouse and cannot be traced.

II. PROVINCE OF MUNSTER.

CLARE COUNTY.

ENNIS; *Crusheen*.—I am sure the four defaulters entered in Col. 7 will turn up soon when the weather gets milder.

KILRUSH; *Kilmihil*.—Vaccinations were somewhat below average owing to severe epidemic of measles.

SCARRIFF; *Kilkishen*.—An epidemic of measles during the middle period of 1913 caused vaccination to be neglected.

CORK COUNTY.

CLONAKILTY; *Clonakilty*.—One defaulter was fined in Court.

CORK; *Douglas*.—Will bring the defaulters in without delay.

CORK; *Dripsey*.—All are fairly ready to comply with vaccination if the weather is suitable.

FERMOY; *Kilworth*.—Vaccination not being done as Guardians will not enforce the law.

MALLOW; *Buttevant*.—Number of removals are due principally to soldiers' children.

KERRY COUNTY.

CAHERSIVEEN; *Caher*.—The Guardians have refused to enforce the Vaccination Acts in this district.

CAHERSIVEEN; *Enlagh*.—As the Guardians have not enforced compulsory vaccination, there has been a falling off, but I have explained to parents the necessity of vaccination, and I expect to have the deficit rectified during 1914.

DINGLE; *Anascaul*.—There is a resolution on the Guardians' books that vaccination is unnecessary.

KILLARNEY; *Killarney No. 1*.—Very little vaccination during 1913, owing to epidemics of pneumonia and measles.

LISTOWEL; *Ballybunion*.—Board of Guardians will not prosecute defaulters.

LISTOWEL; *Listowel*.—Board of Guardians have declined to carry out the Vaccination Acts.

TRALEE; *Ardfert*.—Nothing done to compel parents to bring children for vaccination.

TRALEE; *Castlemaine*.—Vaccination not complied with in this district.

TRALEE; *Tralee No. 1*.—Vaccination was not performed owing to the prevalence of measles amongst the children in the first half of the year, and pertussis during the second half.

TRALEE; *Tralee No. 2*.—Parents will not bring their children for vaccination. The influence in this direction is due to a series of letters appearing in the local papers, and the Guardians are not disposed to prosecute.

TIPPERARY COUNTY, NORTH RIDING.

NENAGH; *Portroe*.—Vaccination in the district very much improved.

TIPPERARY COUNTY, SOUTH RIDING.

CLOGHEEN; *Clogheen*.—Vaccination is in a satisfactory condition in the district. The defaulters are such owing to their failure to return with children for inspection.

WATERFORD COUNTY.

WATERFORD; *Waterford Urban No. 2*.—Vaccination is very much neglected owing to the magistrates not enforcing the legal penalty in cases of neglect brought before the Courts.

III. PROVINCE OF ULSTER.

ANTRIM COUNTY.

LARNE; *Larne*.—Owing to the proximity of Larne to Belfast as well as to England and Scotland, a number of children are annually removed from the district before vaccination takes place.

ARMAGH COUNTY.

NEWRY; *Mullaghglass*.—I fear the defaulters for 1913 will be much more owing to the Board of Guardians failing to enforce the Act.

BELFAST COUNTY BOROUGH.

BELFAST; *Belfast Urban No. 10*.—The nine cases entered in Col. 7 were reported to have been vaccinated, but no certificates have been received.

BELFAST; *Belfast Urban No. 11*.—Of the 899 cases of successful vaccination entered in Col. 1, 28 have been reported to me by the vaccination officer as vaccinated, but I have not received any medical certificates. One defaulter has been prosecuted and fined.

CAVAN COUNTY.

BAWNBOY; *Swanlinbar*.—Owing to the presence of measles, scarlatina, and scabies, vaccination has been postponed.

CAVAN; *Belturbet*.—Defaulters who have been reported seven times have not complied. The Board of Guardians are unwilling to prosecute.

COOTEHILL; *Tullyvin*.—There was an epidemic of whooping cough during 1913, which, I believe, prevented some children coming out for vaccination.

GRANARD; *Scrabby No. 1*.—The Board of Guardians do not press the parents of defaulters to have their children vaccinated.

DONEGAL COUNTY.

INISHOWEN; *Clonmany*.—The two defaulters live a great distance from any vaccination depot. When the weather improves there will be no difficulty in getting them to comply.

STRANORLAR; *Killygordan*.—Vaccination average increased from that of some years ago.

DOWN COUNTY.

DOWNPATRICK; *Clough*.—The postponed cases have all been examined by me, and are children not likely to live, and at present unfit for vaccination.

KILKEEL; *Kilkeel No. 2*.—In this district vaccination is not neglected by the parents.

KILKEEL; *Rosstrevor*.—Vaccination is very well attended to in this district.

LURGAN; *Moir*.—Several of the defaulters are no doubt children vaccinated, but not brought back to be inspected.

LONDONDERRY COUNTY.

COLERAINE; *Garvagh*.—Parents attend to the vaccination of their children in this district without giving any trouble.

LIMAVADY; *Dungiven*.—More children would have been vaccinated in December, 1913, had it not been for an epidemic of measles.

MAGHERAFELT; *Maghera*.—One of the two removals from district was the child of a travelling showman born in a van in Maghera. The parents left Maghera in a few days. The family of the other was supposed to have gone to Derry City, but their address could never be obtained.

MONAGHAN COUNTY.

CARRICKMACROSS; *Donaghmoyn*.—Board of Guardians and parents are becoming more and more careless as regards vaccination.

MONAGHAN; *Emyvale*.—Vaccination attended to very well in this district.

TYRONE COUNTY.

COOKSTOWN; *Stewartstown*.—I am happy to say that with some trouble we are still able to get so many children vaccinated, although there are people going about the country preaching against it.

OMAGH; *Gortin*.—I have the defaulters reduced from 86—quarter ending 30th June—to 29, quarter ending 31st December, 1913, and I hope to get a greater reduction in the present quarter (quarter ended 31st March, 1914).

OMAGH; *Omagh No. 1*.—The three defaulters have been notified.

IV. PROVINCE OF CONNAUGHT.

GALWAY COUNTY.

BALLINASLOE; *Laurencetown*.—Some of the defaulters were vaccinated, but did not return for inspection.

CLIFDEN; *Inishbofin*.—Measles rife in district since January, 1914.

GLENNAMADDY; *Dunmore*.—No wilful defaulters, children unvaccinated due to skin affections.

GORT; *Kinvarra*.—Vaccination was very backward during the year 1913 owing to epidemics of measles, whooping cough and mumps.

LOUGHREA; *Loughrea*.—The Loughrea Board of Guardians decline to enforce the Vaccination Acts, and hence small number vaccinated.

PORTUMNA; *Portumna No. 1*.—Some people are not inclined to have their children vaccinated.

TUAM; *Dunmore*.—Children still unvaccinated due to skin troubles—no wilful defaulters in this district.

LEITRIM COUNTY.

MOHILL; *Carrigallen*.—A number of those entered in Col. 7 have, I believe, been successfully vaccinated, but did not return for inspection.

MAYO COUNTY.

BALLINA; *Ballina*.—With regard to the large number of defaulters, the medical officers, who, of course, have control of this matter, inform me that they have great difficulty in getting parents to bring in their children for vaccination, and the Board of Guardians do not order prosecutions.

BALLINROBE; *Hollymount*.—Very few vaccinations are done in this district during the winter months, and the people are not so keen about having their children vaccinated of late years.

KILLALA; *Killala*.—The people in the country parts of the district wish to have the children able to walk before vaccination.

SWINEFORD; *Kiltimagh*.—It is a common thing in this locality for children of 2 or even 3 or 4 years to be brought for vaccination. They all eventually get vaccinated.

WESTPORT; *Achill*.—I am not aware of any reason why the 56 defaulters should not have their children vaccinated.

ROSCOMMON COUNTY.

BOYLE; *Ballinameen*.—Whooping cough very prevalent, otherwise district very healthy.
